

Sa ponosom možemo istaći da je InfoReview postao medijski partner Vienna Economic Forum. To je jedan od koraka koji smo realizovali u cilju približavanja časopisa Evropi i regionu. Glavna konferencija Foruma, koja se svake godine održava u novembru mesecu, okuplja premijere zemalja SEE regiona. Beč, grad na lepom plavom Dunavu, ugostiće 10. i 11. novembra ove godine najistaknutije državne zvaničnike. Ovo je peta, jubilarna VEF ministarska konferencija na kojoj će se govoriti o mogućnostima investiranja u zemlje od Jadranskog do Crnog mora i Kaspijske regije.

Grad Beč bio je nedavno domaćin i godišnjeg ECDL Foruma koji je okupio predstavnike svih zemalja sveta, sa ciljem unapređenja informatičkog obrazovanja i ulaganja u edukaciju. Gde smo mi u tome i koliko nam treba da stignemo razvijeni svet, pročitate u tekstu koji je posvećen regionalnoj ECDL konferenciji koja je prošlog meseca održana na Bledu. O razvoju informatike i rezultatima informatičkog obrazovanja u Italiji govorim nam, specijalno za InfoReview, Giulio Occhini dugogodišnji predsednik italijanske asocijacije i ovogodišnji organizator svetskog kompjuterskog Kongresa WCC 2008 održanog u Milanu.

Kada su u pitanju konferencije i događaji koji su obeležili ovu jesen u regionu, na kojima smo učestvovali kao medijski partneri, svakako bi trebalo istaći Treći svetski kongres za unapređenje u biznisu, održan u Salzburgu, Zagrebački velesajam i Infofest u Budvi, kojima posvećujemo posebnu pažnju u ovom izdanju InfoReview.

Od događaja iz naše zemlje izdvajamo SAP World Tour koji je okupio u Beogradu oko 500 privrednika iz regije, pripadnika ICT zajednice, IT stručnjaka, analitičara, SAP partnera i predstavnika medija kojima su najbolji SAP stručnjaci iz celog sveta, specijalisti za privredu i razvoju, predstavili najnovije ideje, strategije i mogućnosti za povećanje profitabilnosti, efikasnosti i smanjenje troškova. Ovo je bio najuspešniji SAP® World Tour na Zapadnom Balkanu do sada. Zahvaljujući ljubaznosti domaćina bili smo pozvani i na proslavu koju su organizovali Telekom Srbija povodom obeležavanja deset godina rada Mobilne telefonije i SBS-a koji je slavio sedamnaest godina uspešnog poslovanja.

Iza svakog poslovnog uspeha stoji savremena organizacija. JISA, u saradnji sa Evropskim informatičkim asocijacijama i privrednim komorama već četrnaest godina u nazad, tradicionalno dodeljuje priznanje Diskobolos za najuspešnije primene savremenih tehnologija u svakodnevnom poslovanju.

Očekujući Vas na Diskobolosu 2008, srdačno Vas pozdravljam
Dubravka Đukić

We can proudly emphasize that magazine InfoReview has become a media partner of Vienna Economic Forum. It is one of the steps we took in order to bring the magazine closer to Europe and the region. The main conference of this Forum, which takes part every year in November, assembles the prime ministers of the countries in SEE region. Vienna, the city on the beautiful blue Danube, will host the most distinguished state officials this year, on the 10th and 11th of November. This is the fifth jubilee VEF ministerial conference, whose main topics are investment opportunities in the countries from the Adriatic to the Black Sea and the Caspian region.

Vienna has recently been a host of annual ECDL Forum, which compiled the representatives of all countries of the world, with the

aim to promote digital literacy and investments in education. Where we are in this and how much we need to reach the developed world, read through in the text that is dedicated to regional ECDL conference, which was held in Bled last month. About development of informatics and the results of digital education in Italy, for InfoReview, talks Giulio Occhini, a long-standing President of the Italian Association and the organizer of this year's World Computer Congress WCC2008 held in Milan.

When it comes to conferences and events that marked this autumn in the region where we participated as media partners, we should certainly point out the Third World Congress for improving the business, held in Salzburg, Zagreb Fair and Infofest in Budva, which we gave our full attention to in this issue of InfoReview.

From the events in our country, we point out SAP World Tour, which in Belgrade assembled about 500 regional business people, members of ICT society, IT professionals, analysts, SAP partners and media representatives. The best SAP experts from all over the world, specialists in developing economy presented the

newest ideas, strategies and opportunities for increasing the profitability and efficiency, and cost reducing to all people present. This has been the most successful SAP® World Tour in West Balkans so far. Due to host's kindness, we were invited to attend the celebrations organized by Telekom Serbia regarding the tenth anniversary of Mobile telephony and SBS, which celebrated seventeen years of successful business.

Behind each business success there is a modern organization standing. JISA, in cooperation with European IT associations and Chambers of commerce, for fourteen years now, has been traditionally awarding Diskobolos, for the most successful modern technologies applying in everyday business.

Awaiting you at Diskobolos 2008,
Kind regards,
Dubravka Đukić
