

C O N T E N T S

Introduction	1	Who pays for loops?	32
The difference between optimizing and profiling	2	Logging callers	35
Hardware and software requirements	3	Sampling vs. counting	37
Installing Turbo Profiler	3	Profiler memory use	38
The README file	3	Chapter 3 Profiling strategies	39
What's in this manual	4	Preparing to profile	40
A note on terminology	5	Adjust your program	41
How to contact Borland	5	Compile your program	42
Chapter 1 A sample profiling session	7	Set profile areas	42
Profiling a program (PRIME0)	9	What level of detail do you need?	44
Setting up the profile options	10	What type of data do you need?	44
Collecting data	11	When should data collection start?	45
Displaying statistics	12	How do you want time data grouped?	46
Printing modules and statistics	14	Which data do you want to look at?	46
Time and counts profile listing	14	Profiling your program	47
Profile statistics report	16	What are you trying to find out?	47
Saving and restoring statistics	17	Testing algorithms	48
Analyzing the statistics	17	Verifying and testing programs	48
Viewing both source code and statistics	18	Timing execution and monitoring performance	49
Saving the window configuration	19	Studying unfamiliar code	50
Measuring an area's efficiency	20	Which analysis mode do you use?	50
A modularized primes test (PRIME1)	21	Active analysis	51
Modifying the program and reprofiling	22	Passive analysis	51
Loading another program (PRIME2)	23	Some things to watch out for	51
Reducing calls to a routine (PRIME3)	24	Profiling object-oriented programs	52
Still more efficiency (PRIME4)	24	How to speed up profiling	52
Reducing I/O time (PRIME5)	26	How to improve statistical accuracy	53
Eliminating CR/LF pairs (PRIME6)	26	Insufficient data	53
Where to now?	27	Resonance	53
Chapter 2 Inside the profiler	29	Some tips for profiling overlays	54
Phantom tollbooths	30	Interpreting and applying the profile results	55
Determining the overhead of routine calls	31	How to analyze profile data	55

Execution Profile window	55	Get Info	76
Callers window	56	DOS Shell	77
Overlays window	56	Quit	78
Interrupts window	56	View menu	78
Files window	56	Module	79
How to filter collected data	56	Line	80
Revise your program	57	Search	80
Modify data structures	58	Next	81
Store precomputed results	58	Goto	81
Cache frequently accessed data	59	Add Areas	81
Evaluate data as needed	59	Remove Areas	82
Optimize existing code	59	Operation	82
Loops	59	Callers	83
Routines	60	Module	84
Expressions	60	File	85
Wrapping it up	61	Edit	86
Chapter 4 The Turbo Profiler		Execution Profile	86
environment	63	Display	88
Part 1: The environment components	63	Filter	89
The menu bar and menus	63	Module	90
Choosing menu commands from the keyboard	64	Remove	91
Choosing menu commands with the mouse	64	Callers	91
Shortcuts	65	Inspect (in left pane)	94
Turbo Profiler windows	65	Inspect (in right pane)	94
Window management	67	Sort (in right pane)	94
The status line	68	Overlays	95
Dialog boxes	68	Display	95
Check boxes and radio buttons	69	Inspect	96
Input boxes and lists	70	Interrupts	96
Part 2: The menu reference	71	Collection (in top pane)	97
≡ menu (System)	71	Subroutines (in top pane)	97
Repaint Desktop	73	Add (in top pane)	97
Restore Standard	73	Pick (in top pane)	98
About	73	Remove (in top pane)	98
File menu	73	Delete All (in top pane)	98
Open	73	Display (in bottom pane)	98
Using the File Name input box	74	Files	98
Using the Files list box	75	Collection (in top pane)	100
Change Dir	75	Detail (in top pane)	100
New Directory dialog box components	76	When Full (in top pane)	100
		Display (in bottom pane)	100
