
Contents

Chapter 1	Practical Cost Estimating for Manufacturing	1
	<i>John P. Tanner</i>	
1.0	Introduction to Cost Estimating	1
1.1	Understanding the Estimate Requirements	5
1.2	Developing the Manufacturing Plan	17
1.3	The Concept-Type Cost Estimate	25
1.4	Learning Curves	36
1.5	Material and Subcontract Estimating	47
1.6	The Manufacturing Direct Labor Estimate	58
1.7	Manufacturing Support Labor Costs	82
1.8	Summarizing the Elements of Cost	89
Chapter 2	Product Tooling and Equipment	101
	<i>Richard D. Crowson, with Clyde S. Mutter</i>	
2.0	Introduction to Tooling and Equipment	101
2.1	Planning and Definition	103
2.2	Design, Documentation, and Control	109
2.3	Construction and Maintenance	122
2.4	Hand Tools	123
2.5	Tooling for Parts Fabrication	124
2.6	Tooling for Assembly	127
Chapter 3	Computer-Aided Process Planning	133
	<i>Alexander Houtzeel</i>	
3.0	An Observation	133
3.1	The Challenge of Current Manufacturing Trends	133
3.2	Responding Effectively to the Key Issues	134
3.3	The Evolution of the Manufacturing Engineering Department	136
3.4	Getting to a Process Plan: What Must Happen First?	139
3.5	Variant vs. Generative Planning	142
3.6	The First 15 Years of CAPP	142
3.7	Some Examples of What Is Really Happening	144
3.8	Where to Go from Here?	150
3.9	An Afterword on Group Technology	153

Chapter 4	Work Measurement	155
	<i>Kjell Zandin</i>	
	4.0 Why Work Measurement?	155
	4.1 Methods of Measuring Work	156
	4.2 Methods of Developing, Administering, and Maintaining Time Standards	159
	4.3 Most Work Measurement Systems	160
	4.4 Application of Time Standards	180
	4.5 Summary and Future Trends	182
	4.6 Bibliography	184
Chapter 5	Control of Production and Materials	185
	<i>Stephen C. Cimorelli, with Greg Chandler</i>	
	5.0 Introduction to Control of Production and Materials	185
	5.1 Capacity Planning and Simulation <i>Greg Chandler</i>	191
	5.2 Scheduling	203
	5.3 Just in Time	229
	5.4 Theory of Constraints	241
	5.5 Material Requirements Planning Systems	245
	5.6 Inventory Management	251
	5.7 Bibliography	259
Chapter 6	Control of Quality	261
	<i>Robert L. Lints</i>	
	6.0 Introduction to Control of Quality	261
	6.1 Quality Engineering and Planning	263
	6.2 Inspection	276
	6.3 Testing	283
	6.4 Reliability	285
	6.5 Cost of Quality	288
	6.6 Data Management	291
	6.7 Statistical Process Control	294
Index		297
