4 Hydrokinetic fluid couplings.and torque converters

-4.1.Hydrokinetic.fluid.couplings

4.2 Hydrokinetic fluid coupling efficiency and torque capacity

4.3 Fluid friction coupling

4.4 Hydrokinetic three element torque converter

4.5 Torque converter performance terminology

4.6 Overrun clutches

4.7 Three stage hydrokinetic converter

4.8 Polyphase hydrokinetic torque converter

4.9 Torque converter with lock-up and gear change friction clutches

5 Semi- and fully automatic transmission

5.1 Automatic transmission consideration

5.2 Four speed and reverse longitudinally mounted automatic transmission mechanical power flow

5.3 The fundamentals of a hydraulic control system

5.4 Basic principle of a hydraulically controlled gearshift

5.5 Basic four speed hydraulic control system

5.6 Three speed and reverse transaxle automatic transmission mechanical power flow

5.7 Hydraulic gear selection control components

5.8 Hydraulic gear selection control operation

5.9 The continuously variable belt and pulley transmission

5.10 Five speed automatic transmission with electronic-hydraulic control

5.11 Semi-automatic (manual gear change two pedal control) transmission system

6 Transmission bearings and constant velocity joints

6.1 Rolling contact bearings

6.2 The need for constant velocity joints

7 Final drive transmission

7.1 Crown wheel and pinion axle adjustments

7.2 Differential locks

7.3 Skid reducing differentials

7.4 Double reduction axles

7.5 Two speed axles

7.6 The third (central) differential

7.7 Four wheel drive arrangements

7.8 Electro-hydraulic limited slip differential

7.9 Tyre grip when braking and accelerating with good and poor road surfaces

7.10.Traction control system

8 Tyres

8.1.Tractive and braking properties of tyres

8.2.Tyre materials

8.3.Tyre tread design

8.4.Cornering properties of tyres

8.5.Vehicle steady state directional stability

8.6.Tyre marking identification

8.7.Wheel balancing

9.Steering

9.1.Steering gearbox fundamental design

9.2.The need for power assisted steering

9.3.Steering linkage ball and socket joints

9.4.Steering geometry and wheel alignment

9.5.Variable-ratio rack and pinion

9.6 Speed sensitive rack and pinion power assisted steering

9.7 Rack and pinion electric power assisted steering

10.Suspension

10.1.Suspension geometry

10.2.Suspension roll centres

10.3.Body roll stability analysis

10.4.Anti-roll bars and roll stiffness

10.5.rubber spring bump or limiting stops

10.6.Axle location

10.7.Rear suspension arrangements

10.8.Suspension design consideration

10.9.Hydrogen suspension

10.10 Hydropneumatic automatic height correction suspension

10.11.Commercial vehicle axle beam location

10.12 Variable rate leaf suspension springs.....

10.13.Tandem and tri-axle bogies

10.14.Rubber spring suspension

10.15.Air suspensions for commercial vehicles

10.16. Lift axle tandem or tri-axle suspension

10.17. Active suspension

10.18. Electronic controlled pneumatic (air) suspension for on and off-road use

11. Brake system

11.1. Braking fun

11.2. Brake shoe and pad fundamentals

11.3. Brake shoe expanders and adjusters

11.4. Disc brake pad support arrangements

11.5. Dual- or split-line braking systems

11.6. Apportional braking

11.7. Antilocking brake system (ABS)

11.8. Brake servos

11.9. Pneumatic operated disk brakes.(for trucks and trailers)

12 Air operated power brake equipment and vehicle retarders

12.1. Introductions to air powered brakes

12.2. Air operated power brake systems

12.3. Air operated power brake equipment

12.4. Vehicle retarders

12.5. Electronic-pneumatic brakes

13. Vehicle refrigeration

13.1. Refrigeration terms

13.2. Principles of a vapour-compression cycle refrigeration system

13.3. Refrigeration system components

13.4. Vapour-compression cycle refrigeration system with reverse cycle defrosting

14. Vehicle body aerodynamics

14.1. Viscous air flow fundamentals

14.2. Aerodynamic drag

14.3. Aerodynamic lift

14.4. Car body drag reduction

14.5. Aerodynamic lift control

14.6. Afterbody drag

14.7. Commercial vehicle aerodynamic fundamentals

14.8. Commercial vehicle drag reducing devices
