

## TABLE OF CONTENTS

<b>1</b>	<b>INTRODUCTION .....</b>	<b>1</b>
1.1	Purpose.....	1
1.2	Intended Audience .....	1
1.3	Navigating the Document .....	1
1.4	About the Icons .....	2
<b>2</b>	<b>WHY USE SYSTEMS ENGINEERING? .....</b>	<b>3</b>
2.1	Value of Systems Engineering .....	3
2.2	US DOT Policy .....	4
<b>3</b>	<b>WHAT IS SYSTEMS ENGINEERING? .....</b>	<b>5</b>
3.1	A Few Definitions .....	5
3.2	Key Principles.....	6
3.3	The “V” Systems Engineering Model.....	10
<b>4</b>	<b>ITS TECHNICAL PROCESSES .....</b>	<b>13</b>
4.1	Using the Regional ITS Architecture .....	15
4.2	Feasibility Study/Concept Exploration .....	20
4.3	Concept of Operations .....	26
4.4	System Requirements.....	33
4.5	System Design .....	43
4.6	Software/Hardware Development and Testing .....	54
4.7	Integration and Verification .....	59
4.8	Initial Deployment .....	65
4.9	System Validation .....	70
4.10	Operations and Maintenance.....	75
4.11	Retirement/Replacement.....	80
<b>5</b>	<b>ITS PROJECT MANAGEMENT PROCESSES.....</b>	<b>82</b>
5.1	Project Planning .....	82
5.2	Project Monitoring and Control .....	84
5.3	Risk Management .....	87
5.4	Configuration Management .....	90
<b>6</b>	<b>APPLYING SYSTEMS ENGINEERING.....</b>	<b>93</b>
6.1	The Traditional Project Life Cycle and Systems Engineering .....	93
6.2	Applying Systems Engineering in Your Project .....	96
6.3	Applying Systems Engineering in Your Organization.....	104
<b>7</b>	<b>RESOURCES.....</b>	<b>108</b>
7.1	ITS-Specific Publications .....	108
7.2	General Systems Engineering References .....	108
7.3	Selected Systems Engineering Standards.....	109
7.4	Systems Engineering Training .....	109

## LIST OF FIGURES

Figure 1: Systems Engineering Improves Project Cost Performance.....	3
Figure 2: FHWA/FTA Systems Engineering Analysis Requirements .....	4
Figure 3: Examples of Systems Engineering Analysis Requirements Checklist .....	4
Figure 4: Cone of Uncertainty .....	6
Figure 5: Late Changes Drive Project Costs .....	7
Figure 6: Standish Group: 2004 CHAOS Report Project Success Rate.....	8
Figure 7: Systems Engineering “V” Diagram .....	11
Figure 8: Regional ITS Architecture Framework for Integration.....	16
Figure 9: Example: MaineDOT DMS Project Architecture Subset .....	19
Figure 10: Concept Exploration Uses Basic Trade Study Techniques.....	21
Figure 11: Example of High-Level Economic Comparison of Alternatives .....	25
Figure 12: Concept of Operations (Adapted from ANSI/AIAA-G-043-1992) .....	27
Figure 13: Industry-Standard Outlines for Concept of Operations .....	29
Figure 14: Example of System Overview Graphic (from <i>Communicating with the Public</i> .....	31
Figure 15: Operational Scenario Description .....	32
Figure 16: Requirements Engineering Activities .....	34
Figure 17: Example of Hierarchy of High-Level and Detailed Requirements .....	37
Figure 18: System Design is the Bridge from Requirements to Implementation.....	44
Figure 19: High-Level Design Activities .....	45
Figure 20: Electronic Toll Collection Subsystems and Components (Excerpt) .....	46
Figure 21: Detailed Design Activities .....	48
Figure 22: Architectural Design within a System Component.....	48
Figure 23: High-Level Design May Include Several Views .....	50
Figure 24: Metro Transit MyBus System Architecture .....	51
Figure 25: User Interface Prototype Example: ODOT TripCheck Wireframe Diagram.....	52
Figure 26: Monitoring Software/Hardware Development.....	55
Figure 27: Iterative Integration and Verification.....	60
Figure 28: Transition from Development Team to Operations and Maintenance Team.....	66
Figure 29: I-680 Smart Lane Project Deployment Activities Overview .....	69
Figure 30: Validation Occurs Throughout the Systems Engineering Process.....	71
Figure 31: ORANGES Evaluation – Cumulative Transponders Issued.....	74
Figure 32: Changes/Upgrades Performed Using Systems Engineering .....	76
Figure 33: Kentucky ITS M&O Plan Best Practices .....	78
Figure 34: CHART II O&M Procedures .....	79
Figure 35: Project Management Activities Cut Across All Steps of the “V”.....	82
Figure 36: The Traditional Transportation Project Development Process .....	93
Figure 37: Systems Engineering as an Extension of the Traditional Project Life Cycle.....	95
Figure 38: Tailoring Process Based on Risk .....	100
Figure 39: Quality Leverage Points.....	104
Figure 40: CMMI Maturity Levels.....	106

## LIST OF TABLES

Table 1: Technical Documentation in the “V” Systems Engineering Process .....	14
Table 2: MaineDOT DMS Project Functional Requirements (Partial List) .....	19
Table 3: Comparison of Alternatives – Supported Traffic Volumes for 2025 .....	24
Table 4: Example of Alternatives Benefit Estimation.....	25
Table 5: Roles and Responsibilities (Excerpt from CATMS Concept of Operations).....	30
Table 6: The “Five Whys” Technique in Action .....	36
Table 7: Validating Quality Attributes of Good Requirements.....	38
Table 8: ODOT TripCheck User Requirements (Excerpt) .....	41
Table 9: CHART II System Requirements (Excerpt).....	42
Table 10: Sample Traceability Matrix.....	42
Table 11: CHART II Software Subsystems (Excerpt) .....	51
Table 12: Detailed Software Design Example: ODOT TripCheck Software Class Definition.....	53
Table 13: Verification Procedure Example: ODOT TripCheck Functional Test Plan (Excerpt)..	63
Table 14: CHART II Integration Test Plan (Excerpt) .....	64
Table 15: ODOT TripCheck 2.0 System Test Results (Excerpt) .....	64
Table 16: ORANGES Evaluation Goals and Performance Measures .....	74
Table 17: Metro Transit AVL System Upgrade .....	79
Table 18: Example Performance Measures .....	85
Table 19: Risk Prioritization Matrix.....	89
Table 20: Procurement Approaches for ITS Projects .....	96
Table 21: Development Strategy Comparison.....	99
Table 22: Development Strategy Opportunities and Risks .....	99
Table 23: Tailoring the Process Based on Project Risk.....	102
Table 24: Systems Engineering Application Examples .....	103
