Introduction	xix
--------------------	-----

Part I – Introduction to AutoCAD LT

1 AutoCAD LT 2006 Quick Tour	3
Starting AutoCAD LT 2006	3
The AutoCAD LT Window	5
Basic User Interface Tour	8
Crosshair and Arrow Cursors	8
Menu Bar	9
Command Area	14
Command Prompts	14
Dynamic Input	16
UCS Icon	18
Online Help	19
Context-Sensitive Help	19
Info Palette Window	20
Electronic Documentation	21
Exiting AutoCAD LT	21

2 Navigating the AutoCAD LT Interface 23

Title Bar 24

Menu Bar 24

Toolbars 24

 Toolbar Buttons and Macros 25

 The Standard Toolbar 26

 Flyouts 27

 Layer and Object Properties Toolbars 28

 Layers Toolbar 28

 Object Properties Toolbar 28

Layout Tabs 30

Scroll Bars 31

Status Bar 31

 Help Text 32

 Tray 32

Text Window 33

Palettes 33

Summary 34

3 Setting Up New Drawings 35

Before You Begin 35

 Preparing for Drawing the Yard 36

Starting New Drawings 37

 Units 39

 Angle, Measure, and Direction 40

 Angle Measure 41

 Angle Direction 41

 Area 42

Drawing Aids 44

 Setting the Snap and Grid 44

Create Layers 46

 Naming Layers 47

Saving Drawings 52

 Automatic Backups 53

Summary 55

Part II – Drafting with AutoCAD LT

4	Creating Your First Drawing	59
	Bringing Back the Yard Drawing.....	59
	Drawing the Lot Boundary	61
	Planning the Next Steps	65
	Changing Layers	65
	Drawing the House Outline	67
	Moving the House into Position	72
	Starting on the Driveway	74
	Finishing the Driveway	75
	Putting Drawings to Paper	78
	Summary	80
5	Adding Details to Drawings	81
	Dividing the Lot	81
	Smoothing Polylines	84
	Grips Editing	86
	Hatching the Lawn	89
	Creating Symbols	93
	Drawing Circles	93
	Creating Arrays	95
	Making Blocks	98
	Adding Many More Trees	100
	Drawing the Pond	102
	Summary	105
6	Making Changes to Drawings	107
	Changing the Look of Lines	107
	Changing the Linetype Scale	113
	Changing Line Lengths	115
	Changing the Look of the Pond	117
	Adding the Fence	120
	Summary	125
7	Adding Notes and Dimensions	127
	Adding Notes to Drawings	129
	Determining the Size of Text	130
	Creating Text Styles	132

Text Alignment	133
Changing Existing Text	135
Placing Rotated Text	135
Adding More Text	137
Text Background Color	138
Reducing Text Display Time	139
Global Text Modifications	140
Searching and Replacing Text	140
Changing Text Size	141
Changing Text Justification	141
Setting Properties for Plotted Text	142
Converting Text to Other Formats	142
Placing Dimensions in Drawings	143
Dimensioning the Yard	144
Vertical and Baseline Dimensions	146
Aligned and Radial Dimensions	148
Summary	149

8 Creating Block Libraries and Attributes 151

Before You Begin	153
Preparing the Drawing for Blocks	153
Selecting the Parts	155
Unit Size Blocks	156
Drawing the First Block	156
Defining Attributes	157
Adding Additional Attributes	158
Combining Objects and Attributes into Blocks	160
Inserting Blocks with Attributes	162
Alternatives to the Insert Command	163
AutoCAD DesignCenter	163
Touring the DesignCenter GUI	163
Shortcut Menus	165
Inserting Blocks with DesignCenter	166
Tool Palettes	167
Adding Blocks to Palettes	168
Inserting Blocks from Palettes	171
Creating Additional Blocks	171
The Remaining Symbols	174
Drawing the Electrical Schematic	177
Dynamic Blocks	179
Working with Dynamic Blocks	179
Summary	181

9 Bills of Material	183
Attribute Extraction	183
Step 1: Creating Template Files	185
Step 2: Extracting Attribute Data	186
Step 3: Importing Bills of Material into Excel	188
Importing Spreadsheet Data Into AutoCAD LT	189
Building Tables	191
Placing Tables	192
Populating the Table	194
Summary	198
 10 Isometric Drafting.....	 199
What Is Isometric Drafting?	201
Setting Up LT for Isometric Drafting	202
Drawing Isometric Circles and Arcs	205
Text and Dimension Styles	207
Creating Isometric Text Styles	209
Applying Isometric Text Styles	211
Creating Isometric Dimension Styles	213
Applying Isometric Dimension Styles	216
Isometric Drafting Tutorial	218
Applying Isometric Dimensions	224
Summary	224
 11 Region Modeling	 225
Regions	225
Boolean Operations	227
Creating Waffle Shapes	228
Measuring Regions	234
List, Area, and Properties	235
Summary	235

Part III – Managing AutoCAD LT

12 Implementing CAD Management	239
Solving CAD Problems	241
Ongoing Budgeting	241
Continuing Education	242
Organizational Changes	242

Standardizing File Formats	243
Dealing with Finite Resources	244
Creating CAD Standards	244
Layer Names	244
Block Names	245
Text Styles	246
Dimension Styles	246
Creating Template Drawings	247
Archival Longevity	248
Media Obsolescence	248
File Format Changes	249
Using Drawings Beyond Projects	250
Summary	250

13 Practicing Safe Computing..... 251

Backing Up Is Easy to Do	251
Backup Media	252
Tape	253
CD and DVD	253
DVDs	255
CD and DVD Rot	256
Removable Drives	257
External Hard Drives	257
Advanced Hard Drive Usage	257
USB Keys	258
Comparing Backup Media Costs	258
Implementing Backup Strategies	258
1. Do Backups on a Regular Schedule	259
2. Maintain Physical Security for the Backup Media	260
3. Rotate Your Backup Media	261
4. Create a Boot Diskette	261
5. Make a Copy of the Restore Utility	262
6. Verify the Backup Data	262
7. Keep a Backup Log	263
8. Label the Backup Media	263
9. Practice Restoration	264
Malware Protection	264
AutoCAD LT Is Safe, So Far	265
Malware and Firewalls	265
Firewalls	266
Summary	266

14 Introduction to Networking 267

Benefits of Networking	269
File Sharing.....	270
Revision Control	270
Peripheral Sharing	271
Installation Ease	271
Floating Software Licenses	271
Workgroup Capability.....	271
Standards Enforcement	272
Disadvantages of Networking	272
Network-aware Software Costs More	273
History of Networking.....	273
Early Networking with PCs	274
The Internet Becomes the Network	275
Network Standards Today	275
Ethernet.....	275
10BaseT Cables and Connectors	277
Other Cables and Connectors	278
Network Topology.....	278
Star Topology	278
Daisy Chain Topology	280
Assigning Internet Addresses	281
Types of IP Addresses	281
Private Network Addresses	281
Planning IP Addresses	282
Assigning IP Addresses	283
Wireless Networking	283
How Wireless Networking Works	284
Wireless Security	284
Summary	285

15 Working with Networked AutoCAD LT 287

Setting Up Windows for the Network	287
Giving Computers Network Names	288
Turning On Drive and Printer Sharing	290
Sharing Computer Drives and Printers	291
Adding Networked Drives and Printers	292
Mapping Network Drives	295
Adding Network Printers	296
Making Local Printers Shareable	297
Installing Network Printers	298

- Accessing AutoCAD LT Files on Networks 300
 - Opening Drawings on Networks 300
 - The AutoCAD DesignCenter 302
 - Saving Drawings on Networks 302
 - Finding Files on Networks 303
 - Running LT Over a Network 303
- Summary 304

16 Connecting AutoCAD LT to the Internet 305

- Opening Drawings from the Internet 305
 - Understanding Hyperlinks 306
 - Accessing Hyperlinks with the Open Command 307
 - Searching the Web 309
 - Inserting Blocks from the Internet 310
- Starting Web Browsers 310
- Sending Drawings via the Internet 311
 - Sending Drawings through Email 311
 - Packaging Drawings and Support Files 312
 - Transmittal Type and Location 313
 - Transmittal Options 314
 - Saving Drawings to the Internet 315
 - Setting Up FTP 316
- Working with DWF Files 318
 - Exporting Drawings in DWF Format 319
 - General DWF Options 320
 - Multi-sheet DWF Options 320
 - DWF Data Options 321
 - Drawings in Web Pages 321
 - Viewing DWF Files on the Internet 325
- Online Project Management 326
 - Buzzsaw and ProjectPoint 326
- A Look at XML for CAD 327
 - What XML Means to CAD Users 328
 - aecXML for Architecture 328
 - LandXML for Surveying 328
- Summary 329

17 Translating AutoCAD LT Drawings 331

- Exchanging Autodesk Drawings 331
 - How DWG Files Differ 332
 - Shading Modes 332

Multiple UCSs	333
Nonrectangular Viewports	333
Proxies Represent Custom Objects	333
Object Enablers	333
Proxy Objects	334
Older Versions of DWG	335
Saving to Older Versions	335
Autodesk's Incompatible Formats	337
May Require Object Enablers	338
Compatible Software Products	338
Incompatible Software Products	338
Drawings from Other CAD Programs	339
Drawing Translation	340
IGES	341
PDES/STEP	341
DXF	342
IAI and MAI	342
Summary	342

Part IV – Customizing AutoCAD LT

18 Introduction to Customizing AutoCAD LT 345

Customizing LT's Startup	346
Adding Command-Line Switches	346
Catalog of Startup Switches	348
Programming AutoCAD LT	349
How LT Cannot Be Programmed	349
Summary	350

19 Customizing Commands 351

Command Aliases	352
Writing Aliases	353
Using System Variables	354
Accessing System Variables	354
Read-Only Variables	354
Toggle Variables	354
User Variables	355
Environment Variables	356
Other Environment Variables	357

- Writing Script Files..... 357
 - About Script Files 358
 - Drawbacks to Scripts 358
 - Methods for Scripts to Call Commands 359
 - Hyphen Prefix 359
 - System Variables 359
 - No Command-Line Alternative 360
 - Script Commands 360
 - Script 360
 - RScript 360
 - Resume 360
 - Delay 360
 - Special Characters in Scripts 361
 - Examples of Script Files 362
 - Opening Multiple Drawings 362
 - Creating Layers 363
 - Drawing Boundaries 363
 - Saving and Plotting 364
 - Starting AutoCAD LT with Scripts 364
- Summary 364

20 Customizing Menus and Shortcut Keystrokes ... 365

- The History of Menus 365
 - The Menu Moves from the Side to the Top 367
- Customizing Menus 367
 - Menu Groups 368
 - Loading Menu Files 368
 - Guided Tour of the CUI 369
- Understanding Menu Macros 372
 - Menu Macro Metacharacters 374
 - Creating Menus 375
 - Writing Macros 378
- Shortcut Keystrokes 380
 - Customizing Shortcut Keystrokes 380
 - Control Key 380
 - Function Keys 381
 - Alt Key 381
 - Temporary Override Keys 381
 - Customizing Keystroke Shortcuts 383
 - Creating Keystroke Shortcuts 385
- Summary 386

21 Customizing Toolbars and Workspaces 387

Changing Toolbar Properties	388
Further Changes to Toolbar Properties	389
Customizing Toolbars	391
Adding Buttons to Toolbars	391
Adding Separator Lines between Buttons	392
Adding Flyouts to Toolbars	392
Creating and Editing Icons for Buttons	393
Removing Buttons from Toolbars	395
Writing Toolbar Macros	395
Toolbar Macro Syntax	396
Macro Options	397
Workspaces	399
Saving the State of the User Interface	399
Configuring Workspaces	399
Summary	400

22 Customizing Buttons, Shortcut Menus, and Tablets 401

Customizing Mouse Buttons	401
Understanding the Button2 Macro	403
Second Button Macro	404
Other Button Macros	404
Shortcut Menus	405
Tablet Menus and Buttons	406
Tablet Menus	407
Rows x Columns = Cells	408
Tablet Menu 1	409
Other Tablet Menu Areas	409
Tablet Buttons	409
Image Tile Menus	410
Summary	410

23 Advanced Programming Issues 411

DIESEL	411
The History of DIESEL	412
DIESEL Programming	413
DIESEL Code Basics	415
Writing Simple DIESEL Macros	415
Using DIESEL in Menus	418

- DIESEL Error Messages 420
 - Tracing Bugs in DIESEL 421
- Other Programming Interfaces 421
 - AutoLISP 422
 - Visual LISP 422
 - DCL 422
 - Making AutoLISP and DCL Work in LT 422
 - VBA 423
 - ARX..... 423
 - Making ARX Work in LT 423
 - Writing ARX Applications for LT 425
- The DWG and DXF Formats 426
 - The OpenDWG Alliance 426
 - Documenting DWG 427
 - DXF Documentation 428
- Summary 428

Appendices

- A AutoCAD LT Command Reference 429
- B System Variables 443
- C Setting Up Printers and Plotters 449
- D Compatibility with AutoCAD 2006 461

- Index 469
