

TABLE OF CONTENTS

CHAPTER 1: Internal Combustion Systems	1
1.1 Car Engines	1
1.2. Carburetor type engine fuel	4
1.3. Diesel engines fuels	5
References	6
CHAPTER 2: Spark Plug Material Selection & Manufacturing	8
2.1 Electric spark ignition of combustion mixture	8
2.1.1 Spark plug breakdown voltage	8
2.1.2 Moment of applying the spark	9
2.1.3 Spark plug arrangement	10
2.1.4 Electrodes	12
2.1.5 Insulator	12
2.1.6 Shell	13
2.1.7 Shield	13
2.2 Spark Plug Thermal Characteristics	13
2.3 Manufacture	14
2.3.1 Body shell manufacture	14
2.3.2 Selecting materials and manufacturing spark plug insulator	15
References	16
CHAPTER 3: High Energy Rate (Her) Forming	18
3.1 Explosives and physical nature of explosions	19
3.2 Characteristics & Technological Features Of Hydro-Explosive Deformation	21
References	24
CHAPTER 4: Gear Drive Assembly	25
4.1 Explanatory	25
4.2 Operation principle	25
4.3 Design calculations	26
4.4 Description of the Mechanism	29
4.5 Mechanism specification& design	30
References	45
CHAPTER 5: Local Bending Stresses in Axi-Symmetrical Thin Shells for Storing Pressure Vessels	47
5.1 Introduction	47

5.2	Aluminium Small Capacity, Highly Pressurized Shell	47
5.2.1.	Material selection	47
5.2.2.	Thin-wall cylinder theory: Strength calculations & dimensioning	48
5.2.3.	Safety factor selection and allowable stress determination.	49
5.2.4.	Stressed state and strength requirements	49
5.2.5.	Dimensioning	50
5.2.6.	Strength and deformation calculations using the Finite Element Method (FEM)	52
5.3	HSS Large Capacity, Low Pressure Loading Tank	56
5.4	Discussion	63
5.4.1.	Aluminium small capacity, highly pressurized shell: finite element calculation results	63
5.4.2.	HSS large capacity, low pressure loading tank: finite element calculation results	67
5.5.	Selecting Acid-Resistant Materials	70
5.5.1	Introduction	70
5.5.2	Anodic passivation	71
5.5.3	Mechanics of anodic passivation	71
5.5.4	Experimental studies – anodic protection of mild steel in sulphuric acid solution	72
5.5.5	Selecting materials for the tank	74
5.5.6	Factors influencing the efficiency of the tank and its usage	76
5.5.7	Using the tank for storage of 10% hydrochloric acid.	77
5.6	Additional Tank Protection Techniques	77
5.7.	Selecting the Metal Material for Making Another Storage Tank for 10% Sulphuric Acid	79
5.7.1	For a cost limit of 3 Pounds per kilogram	79
5.7.2	For a cost limit of 1 Pound per kilogram	80
5.7.3	Selecting the steel for designing the storage tank	81
5.7.4	Anodic protection	82
5.7.5	Cathode protection	82
5.7.6	Protection by using additives (inhibitors)	83
5.7.7	Factors affecting tank efficiency and usage	83
5.7.8	Using the tank for the storage of 10% hydrochloric acid	84
	References	84
CHAPTER 6:	A Manual Winch Design	86
6.1	Introduction	86
6.2	Design Requirements	86
6.3	Conceptualisation & Design Creativity	87
6.4	The Design Concept	88
6.5	Development Stages	89
6.6	Market Research	90
6.7	Initial Parameters Determination	90
6.8	Mechanical Diagram Selection	91

6.9	Calculations & Assemblies & Components Selection	91
6.10	Marketing criteria. End-user & market requirements.	96
6.11	Product Functionality, End Use & Performance Specification	98
	References	105
CHAPTER 7: A Bench Drilling Machine		106
7.1	Introduction	106
7.2	Available Product Types	106
7.3	Design Development Of The Bench Drilling Machine	110
7.4	Determining the Rotation Speed & Power of The Electrical Motor	111
7.5	Kinematical Calculations for the Belt Drive	112
7.6	Bearings Calculations	115
7.7	Calculating the Feed Gear Drive	116
7.8	Design Conceptualisation of THE Work Table Moving Mechanism	117
7.9	Support Base of the Bench-Drilling Machine (Figure 16)	118
7.10	Ergonomic & Aesthetic Appearance Machine Conceptualisation	118
7.11	Operation of the Machine	119
7.12	Conclusions	120
	References	136
