<b>About the Author . . . . .</b>	<b>v</b>
<b>Foreword . . . . .</b>	<b>vii</b>
<b>Preface . . . . .</b>	<b>ix</b>
<b>Acknowledgments . . . . .</b>	<b>xvii</b>
<hr/>	
<b>Part I: AutoCAD and AutoCAD LT Basics</b>	<b>1</b>
<hr/>	
<b>Quick Start: Drawing a Window . . . . .</b>	<b>3</b>
<b>Chapter 1: Starting to Draw . . . . .</b>	<b>13</b>
AutoCAD's Advantages .....	13
Comparing AutoCAD and AutoCAD LT .....	14
Starting AutoCAD and AutoCAD LT .....	15
Creating a New Drawing .....	15
Using the AutoCAD and AutoCAD LT Interface .....	16
The drawing area .....	16
The menus and toolbars .....	18
The command line and dynamic input tooltip .....	19
The status bar .....	19
Creating a New Folder .....	19
Using the Interface .....	20
Saving a Drawing .....	22
Closing a Drawing and Exiting from AutoCAD and AutoCAD LT .....	24
Summary .....	25
<b>Chapter 2: Opening a Drawing . . . . .</b>	<b>27</b>
Creating a New Drawing from a Template .....	27
Working with Templates .....	29
Customizing the default template .....	29
Creating your own templates .....	30
Creating a Drawing with Default Settings .....	30
Opening an Existing Drawing .....	30
Using other ways to open drawings .....	31
Using shortcuts in dialog boxes .....	32
Using an Existing Drawing as a Prototype .....	32
Saving a Drawing under a New Name .....	33
Summary .....	34

## **Contents**

<b>Chapter 3: Using Commands . . . . .</b>	<b>35</b>
The AutoCAD and AutoCAD LT Interface .....	35
Using menus .....	35
Using shortcut menus .....	36
Using dialog boxes.....	37
Using toolbars .....	38
Using palettes.....	39
The Command Line and Dynamic Input .....	41
Using Dynamic Input.....	41
Understanding command names .....	42
Responding to commands .....	43
Command Techniques .....	45
Repeating commands .....	45
Using recent input .....	46
Canceling commands.....	46
Undoing a command .....	47
Redoing a command .....	48
Using one command within another command .....	50
Of Mice and Pucks .....	51
Getting Help.....	52
Getting help on a command.....	53
Finding help with Quickstart links.....	53
Using the main Help system.....	54
Working with Help screens .....	55
Using the InfoCenter .....	55
Getting more help .....	56
Summary .....	58
<b>Chapter 4: Specifying Coordinates . . . . .</b>	<b>59</b>
Understanding the X,Y Coordinate System.....	59
Drawing units .....	60
Types of measurement notation .....	60
Typing Coordinates .....	61
Using the Dynamic Input tooltip to enter coordinates .....	61
Absolute Cartesian coordinates .....	64
Relative Cartesian coordinates .....	67
Polar coordinates .....	68
Direct distance entry .....	70
Orthogonal mode.....	70
Polar tracking.....	70
Displaying Coordinates .....	74
Picking Coordinates on the Screen .....	75
Snap settings .....	75
Object snaps .....	80
Running object snaps and OSNAP mode .....	84
Overriding Coordinate Settings .....	85

Locating Points.....	88
Object snap tracking .....	88
Using the temporary tracking feature .....	92
Point filters .....	92
From feature .....	92
Summary .....	94
<b>Chapter 5: Setting Up a Drawing . . . . .</b>	<b>95</b>
Choosing Unit Types .....	95
Setting the drawing units .....	96
Setting the angle type .....	97
Setting the angle measure and direction .....	98
Drawing Limits.....	99
Understanding Scales .....	100
Working with scale formats .....	102
Using annotative scales .....	103
Customizing the scale list.....	105
Deciding on a scale and sheet size .....	106
Creating a Title Block .....	107
Specifying Common Setup Options .....	107
Customizing with the MVSETUP Command .....	109
Using the Setup Wizards .....	110
Summary .....	110
<b>Part II: Drawing in Two Dimensions</b>	<b>111</b>
<b>Chapter 6: Drawing Simple Lines . . . . .</b>	<b>113</b>
Using the LINE Command .....	113
Drawing Rectangles .....	115
Drawing Polygons .....	116
Creating Construction Lines.....	118
Creating Rays .....	119
Summary .....	120
<b>Chapter 7: Drawing Curves and Points . . . . .</b>	<b>121</b>
Drawing Circles .....	121
Understanding the circle options .....	121
Drawing circles .....	122
Drawing Arcs .....	124
Understanding arc options .....	124
Drawing arcs .....	126
Creating Ellipses and Elliptical Arcs .....	128
Understanding ellipse options .....	129
Drawing ellipses.....	129
Making Donuts.....	132
Understanding DONUT options .....	132
Drawing donuts .....	133

## **Contents**

Placing Points.....	133
Changing the point style .....	133
Creating points .....	134
Summary .....	136
<b>Chapter 8: Viewing Your Drawing . . . . .</b>	<b>137</b>
Regenerating and Redrawing the Display .....	137
Panning .....	138
Using the PAN command .....	138
Using the scroll bars.....	138
Using the ZOOM Command .....	140
Understanding ZOOM options.....	141
Using ZOOM Dynamic .....	142
Using Aerial View.....	145
Creating Named Views .....	147
Saving a view .....	147
Displaying a view.....	150
Managing named views .....	150
Using named views to manage a drawing.....	151
Working with Tiled Viewports .....	153
Configuring tiled viewports .....	154
Using tiled viewports .....	156
Saving and restoring viewport configurations.....	156
Using Snap Rotation.....	159
Understanding User Coordinate Systems .....	161
Understanding UCS options.....	161
Saving and restoring a custom UCS .....	162
Controlling the UCS icon .....	163
Using a custom UCS .....	164
Creating Isometric Drawings .....	166
Understanding isometric planes.....	166
Drawing in Isometric mode .....	167
Summary .....	169
<b>Chapter 9: Editing Your Drawing with Basic Tools . . . . .</b>	<b>171</b>
Editing a Drawing .....	171
Understanding object-selection basics .....	172
Erasing objects.....	173
Moving objects.....	174
Copying objects .....	176
Copying and moving objects from one drawing to another .....	179
Rotating objects .....	181
Scaling objects .....	184
Using the CHANGE command.....	185
Selecting Objects .....	187
Selecting objects after choosing a command.....	187
Cycling through objects .....	191

Selecting objects before choosing a command .....	192
Implied windowing .....	192
Customizing the selection process .....	194
Summary .....	197
<b>Chapter 10: Editing Your Drawing with Advanced Tools . . . . .</b>	<b>199</b>
Copying and Moving Objects .....	199
Using the MIRROR command .....	200
Using the ARRAY command .....	201
Offsetting objects .....	207
Aligning objects .....	209
Resizing commands .....	213
Trimming objects .....	213
Extending objects.....	217
Lengthening objects.....	219
Stretching objects.....	222
Using Construction Commands .....	224
Breaking objects.....	225
Joining objects .....	225
Creating chamfered corners .....	228
Creating rounded corners .....	230
Creating a Revision Cloud .....	233
Hiding Objects with a Wipeout .....	234
Double-Clicking to Edit Objects.....	235
Grips .....	235
Stretching with grips .....	237
Moving with grips .....	238
Rotating with grips.....	238
Scaling with grips.....	239
Mirroring with grips.....	240
Customizing grips .....	242
Editing with the Properties Palette .....	243
Managing the Properties palette .....	243
Using the Properties palette .....	244
Selection Filters .....	245
Using Quick Select to select objects .....	246
Using the FILTER command .....	247
Naming and editing filters .....	250
Using filters .....	250
Groups .....	252
Creating and modifying groups in AutoCAD .....	252
Changing a group .....	253
Creating and modifying groups in AutoCAD LT.....	254
Using groups .....	255
Summary .....	255

## **Contents**

<b>Chapter 11: Organizing Drawings with Layers, Colors, Linetypes, and Lineweights . . . . .</b>	<b>257</b>
Working with Layers .....	257
Understanding layers .....	258
Creating new layers .....	258
Using layers .....	268
Using special layer tools.....	273
Modifying layers .....	276
Changing Object Color, Linetype, and Lineweight .....	281
Changing an object's color .....	282
Changing the current color .....	283
Changing an object's linetype .....	283
Changing the current linetype .....	284
Changing an object's linewidth .....	284
Changing the current linewidth .....	285
Working with Linetype Scales .....	287
Changing linetype spacing by using a different linetype .....	287
Changing linetype spacing by changing the global linetype scale .....	288
Changing linetype spacing by changing the object linetype scale .....	290
Importing Layers and Linetypes from Other Drawings .....	292
Matching Properties .....	293
Summary .....	295
<b>Chapter 12: Obtaining Information from Your Drawing . . . . .</b>	<b>297</b>
Drawing-Level Information .....	297
Listing the status of your drawing .....	297
Listing system variables .....	298
Tracking drawing time .....	299
Object-Level Information .....	301
Listing objects .....	301
Calculating distances .....	302
Finding coordinates .....	302
Calculating area and perimeter.....	304
Getting information from the Properties palette .....	307
Measurement Commands.....	307
Dividing objects .....	308
Measuring objects .....	309
AutoCAD's Calculator.....	310
Calculating numbers .....	312
Using coordinates .....	313
Using object snaps .....	314
Using the scientific calculator.....	314
Converting units .....	315
Working with QuickCalc variables.....	316
Using QuickCalc in the Properties palette .....	316
Summary .....	319

<b>Chapter 13: Creating Text . . . . .</b>	<b>321</b>
Creating Single-Line Text .....	321
Justifying single-line text .....	322
Setting the height .....	324
Setting the rotation angle .....	325
Adding special characters and formatting.....	325
Editing single-line text .....	328
Understanding Text Styles .....	331
Creating a new text style .....	331
Renaming and deleting text styles .....	334
Modifying a text style.....	335
Making a style current or changing a text object's style.....	335
Importing a text style .....	336
Creating Multiline Text.....	336
Using the In-Place Text Editor .....	336
Creating text for different scales .....	344
Editing paragraph text .....	346
Importing text .....	347
Creating Tables.....	349
Inserting a table .....	349
Specifying a table style .....	350
Adding data to a table .....	353
Modifying a table .....	359
Inserting Fields.....	364
Creating fields .....	365
Editing and updating fields .....	367
Managing Text .....	368
Using Quicktext.....	368
Using AutoCAD and AutoCAD LT fonts.....	369
Freezing text layers .....	370
Using MIRRTEXT.....	370
Finding Text in Your Drawing .....	372
Checking Your Spelling .....	374
Customizing the Spelling Dictionary .....	375
Summary .....	376
<b>Chapter 14: Drawing Dimensions . . . . .</b>	<b>377</b>
Working with Dimensions .....	377
The elements of a dimension .....	377
Preparing to dimension .....	379
Drawing Linear Dimensions .....	380
Specifying the dimensioned object .....	380
Using dimension options .....	383
Creating jogged dimension lines .....	385
Drawing Aligned Dimensions .....	386
Specifying the dimensioned object .....	386
Using the options.....	386

## Contents

Creating Baseline and Continued Dimensions .....	388
Drawing baseline dimensions.....	388
Drawing continued dimensions .....	389
Dimensioning Arcs and Circles.....	392
Marking arc and circle centers .....	392
Dimensioning arc lengths.....	392
Creating radial dimensions.....	393
Creating diameter dimensions .....	393
Dimensioning Angles .....	394
Creating Ordinate Dimensions .....	398
Drawing Leaders .....	401
Creating a multileader .....	401
Creating a multileader style .....	402
Aligning and combining leaders.....	406
Using Quick Dimension .....	409
Creating Inspection Dimensions.....	412
Creating Geometric Tolerances .....	413
Starting the tolerance frame .....	414
Inserting the tolerance frame .....	416
Editing a tolerance frame .....	416
Editing Dimensions .....	418
Editing associativity .....	418
Using the DIMEDIT command.....	420
Using the DIMEEDIT command .....	420
Flipping dimension arrows .....	421
Editing dimension text.....	422
Using the Properties palette to edit dimensions .....	422
Changing annotative scales .....	422
Spacing dimensions equally apart .....	423
Breaking dimensions .....	423
Using Quick Dimension to edit dimensions .....	424
Using grips to edit dimensions .....	425
Editing objects and dimensions together .....	425
Summary .....	428
<b>Chapter 15: Creating Dimension Styles . . . . .</b>	<b>429</b>
Understanding Dimension Styles .....	429
Defining a New Dimension Style .....	431
Managing dimension lines .....	432
Defining symbols and arrows.....	435
Managing dimension text .....	438
Fitting dimensions into tight spaces .....	441
Defining primary units.....	447
Defining alternate units .....	449
Formatting tolerances .....	452
Changing Dimension Styles .....	455
Choosing a new current dimension style .....	455
Creating a variant of a dimension style.....	455
Modifying a dimension to use a new dimension style.....	456

Modifying dimension styles .....	456
Overriding a dimension style .....	457
Updating dimensions .....	457
Comparing dimension styles .....	457
Copying dimension styles from other drawings .....	458
Summary .....	461
<b>Chapter 16: Drawing Complex Objects . . . . .</b>	<b>463</b>
Creating and Editing Polylines .....	463
Using the PLINE command .....	464
Editing polylines with the PEDIT command .....	467
Editing polylines using the Properties palette .....	469
Drawing and Editing Splines .....	470
Creating splines .....	471
Editing splines .....	472
Creating Regions .....	475
Creating Boundaries .....	477
Creating Hatches .....	479
Understanding hatch patterns .....	480
Defining a hatch .....	480
Determining the hatch boundary .....	484
Dragging and dropping hatch patterns .....	488
Creating gradient fills .....	488
Editing hatches .....	490
Using the SOLID command .....	492
Creating and Editing Multilines .....	492
Creating a multiline style .....	493
Drawing multilines .....	497
Editing multilines .....	498
Creating Dlines in AutoCAD LT .....	500
Using the SKETCH Command .....	501
Digitizing Drawings with the TABLET Command .....	503
Summary .....	505
<b>Chapter 17: Plotting and Printing Your Drawing . . . . .</b>	<b>507</b>
Preparing a Drawing for Plotting or Printing .....	507
Doing a draft plot .....	507
Plotting a drawing from model space .....	508
Creating a Layout in Paper Space .....	508
Entering paper space .....	509
Using the Layout Wizard .....	510
Laying out a drawing in paper space on your own .....	513
Annotating a layout .....	523
Saving a layout template .....	527
Working with Plot Styles .....	530
Setting the plot-style mode .....	531
Creating a plot-style table .....	532
Attaching a plot-style table to a layout .....	536
Setting the plot-style property for a layer or object .....	536

## Contents

Plotting a Drawing .....	538
Specifying plot settings .....	539
Previewing your plot .....	541
Creating a plot stamp.....	542
Creating the plot .....	542
Summary .....	543

## Part III: Working with Data 545

---

### Chapter 18: Working with Blocks and Attributes . . . . . 547

Combining Objects into Blocks .....	548
Understanding base points and insertion points.....	548
Creating a block.....	549
Redefining a block .....	551
Saving blocks as files .....	552
Replacing an existing file .....	553
Inserting Blocks and Files into Drawings .....	554
Using the Insert dialog box .....	555
Using the DesignCenter .....	557
Managing Blocks .....	561
Working with layers.....	561
Exploding blocks .....	564
Using the Xplode command .....	565
Editing blocks .....	566
Creating and Using Dynamic Blocks.....	569
Understanding the work flow of dynamic blocks .....	570
Defining a dynamic block .....	571
Inserting and modifying dynamic blocks .....	580
Using Windows Features to Copy Data .....	586
Manipulating objects with the Windows Clipboard .....	586
Using drag-and-drop .....	587
Working with Attributes.....	590
Creating attribute definitions .....	590
Inserting blocks with attributes .....	595
Editing attributes .....	597
Extracting a database from attributes .....	604
Summary .....	612

### Chapter 19: Referencing Other Drawings . . . . . 613

Understanding External References .....	613
Attaching an external reference .....	614
Opening an xref.....	615
Using the External References palette.....	615
Editing an Xref within Your Drawing .....	619
Choosing the xref or block to edit .....	619
Editing the xref .....	620

Controlling Xref Display.....	622
Xrefs and dependent symbols .....	622
Circular references .....	623
Clipping xrefs .....	624
Speeding up the display of large xrefs .....	625
Managing Xrefs .....	629
Xref notification .....	631
DesignCenter .....	631
The xref log file .....	632
Working with DWF and DGN Underlays .....	633
Attaching a DWF underlay.....	633
Underlaying DGN files .....	635
Summary .....	636
<b>Chapter 20: Working with External Databases . . . . .</b>	<b>637</b>
Understanding External Database Access .....	638
Preparing for Database Connectivity.....	639
Organizing the database structure .....	639
Configuring a data source .....	641
Connecting to Your Database .....	645
Connecting a database to a drawing .....	645
Opening a data table .....	646
Editing data in the Data View window .....	650
Linking Data to Drawing Objects .....	651
Creating a link template .....	651
Creating a link .....	653
Creating Labels.....	658
Creating label templates.....	658
Creating attached labels .....	660
Creating freestanding labels .....	660
Querying with the Query Editor.....	661
Using the Quick Query tab .....	662
Using the Range Query tab .....	664
Using the Query Builder tab.....	664
Using the SQL Query tab .....	666
Creating selection sets with Link Select .....	668
Working with Query Files .....	669
Storing queries.....	669
Importing and exporting queries .....	669
Summary .....	670
<b>Part IV: Drawing in Three Dimensions</b>	<b>671</b>
<b>Chapter 21: Specifying 3D Coordinates. . . . .</b>	<b>673</b>
Working in a 3D Environment .....	674
Using 3D Coordinates .....	675
Absolute and relative Cartesian coordinates in 3D .....	676
Cylindrical and spherical coordinates.....	676

## Contents

Using the Dashboard for 3D drawings .....	678
Using editing commands with 3D wireframes .....	678
Using point filters, object snaps, object tracking, and grips in 3D .....	681
Creating 3D polylines .....	684
Creating helixes .....	684
Using Elevation and Thickness.....	685
Creating surfaces with thickness .....	685
Using the HIDE command .....	687
Controlling the display of hidden lines and objects .....	687
Adding elevation to objects .....	689
Working with the User Coordinate System .....	691
Using the UCS icon .....	691
Using UCS options to change the UCS.....	692
Changing the UCS dynamically .....	694
Summary .....	698
<b>Chapter 22: Viewing 3D Drawings . . . . .</b>	<b>699</b>
Working with the Standard Viewpoints .....	700
Using the VPOINT command .....	701
Looking at a drawing from the standard viewpoints.....	701
Using DDVPOINT .....	703
Creating a Named View with a Camera .....	704
Creating a camera .....	704
Editing a camera .....	705
Adding a Background to a Named View .....	708
Working with the Tripod and Compass .....	710
Displaying a Quick Plan View .....	712
Working with Visual Styles.....	713
Displaying visual styles in AutoCAD .....	713
Creating custom visual styles .....	715
Using the shading options in AutoCAD LT.....	717
Display materials, textures, and lights as you work .....	718
Displaying Parallel and Perspective Projections .....	720
Using 3D Orbit.....	720
Starting 3D Orbit .....	721
Navigating with 3D Orbit.....	722
Refining your 3D Orbit view .....	724
Using Tiled Viewports .....	726
Walking Through a Model .....	727
Navigating in Walk mode.....	727
Specifying Walk mode settings.....	729
Flying through a model .....	730
Saving the walk as a movie file .....	730
Using a motion path to save a movie file .....	731
Using DVIEW to Create a Perspective View .....	735
Using DVIEW .....	736
Understanding the DVIEW options .....	736

Laying Out 3D Drawings .....	738
Using SOLVIEW to lay out paper space viewports .....	738
Using SOLDRAW to create hidden lines and hatching .....	739
Using SOLPROF to create profiles .....	740
Flattening 3D drawings .....	741
Summary .....	743
<b>Chapter 23: Creating 3D Surfaces . . . . .</b>	<b>745</b>
Converting Objects to Surfaces.....	746
Drawing Surfaces with 3DFACE .....	747
Using the 3DFACE command .....	747
Making 3D face edges invisible .....	748
Drawing Surfaces with PFACE .....	752
Creating Plane Surfaces .....	757
Creating Polygon Meshes with 3DMESH .....	757
Drawing Standard 3D Shapes .....	759
Box .....	759
Wedge .....	761
Pyramid .....	761
Cone .....	763
Sphere .....	763
Dome .....	764
Dish .....	765
Torus .....	766
Mesh .....	766
Drawing Revolved Surfaces .....	769
Understanding the REVSURF command .....	769
Working with the REVOLVE command .....	773
Drawing an Extruded Surface .....	773
Working with the TABSURF command .....	773
Working with the EXTRUDE command .....	776
Sweeping objects along a path .....	776
Drawing Surfaces Between 2D Objects .....	777
Creating ruled surfaces.....	777
Lofting objects .....	780
Drawing Edge Surfaces.....	781
Working with Multiple Types of 3D Objects .....	783
Thickening a surface into a solid .....	783
Extracting edges from a surface or a region .....	783
Slicing solids with a surface .....	784
Summary .....	784
<b>Chapter 24: Creating Solids and Editing in 3D . . . . .</b>	<b>785</b>
Drawing Basic Shapes.....	786
Drawing a box .....	786
Drawing a wedge .....	787
Drawing a cone .....	788
Drawing a sphere .....	790

## Contents

Drawing a cylinder .....	790
Drawing a torus .....	791
Drawing a pyramid .....	792
Creating Extruded Solids .....	794
Managing objects used to make other objects.....	795
Using the EXTRUDE command .....	795
Drawing Swept Solids.....	797
Drawing Revolved Solids .....	798
Drawing Lofted Solids .....	800
Drawing Polyline-Like Solids .....	802
Creating Complex Solids .....	805
Combining solids.....	805
Subtracting solids.....	806
Creating a solid from the intersection of two solids .....	806
Creating a new solid using INTERFERE .....	807
Pressing or pulling a region .....	810
Using solid history.....	811
Sectioning and Slicing Solids .....	812
Using the SECTION command .....	812
Creating an interactive section object .....	814
Using the SLICE command .....	815
Using Editing Commands in 3D .....	817
Grip-editing solids .....	818
Subselecting solids .....	818
Using the move grip tool and the 3DMOVE command .....	820
Mirroring in 3D .....	821
Arraying in 3D .....	822
Rotating in 3D .....	826
Aligning in 3D .....	829
Trimming and extending in 3D .....	831
Filletting in 3D .....	833
Chamfering in 3D .....	835
Exploding and converting 3D objects.....	838
Using the SOLIDEDIT Command .....	839
Editing faces.....	839
Editing edges .....	846
Editing bodies .....	847
Listing Solid Properties.....	850
Summary .....	851
<b>Chapter 25: Rendering in 3D . . . . .</b>	<b>853</b>
Understanding Rendering.....	854
Learning the steps .....	854
Doing a default rendering .....	854
Creating Lights.....	855
Setting the default light .....	856
Creating a point light .....	856
Creating a target point light .....	859
Creating a spotlight .....	859

Creating a Free spotlight .....	860
Creating a distant light .....	861
Simulating the sun .....	862
Managing lights .....	865
Working with Materials .....	869
Attaching a material from the Tool Palettes window .....	870
Using the Materials palette .....	871
Creating your own materials .....	872
Attaching materials .....	878
Using backgrounds .....	879
Doing the Final Render .....	880
Statistics .....	884
Saving rendered images .....	884
Summary .....	885

**Part V: Organizing and Managing Drawings****887**

---

<b>Chapter 26: Keeping Control of Your Drawings . . . . .</b>	<b>889</b>
Accessing Drawing Components with the DesignCenter.....	889
Navigating with the DesignCenter .....	890
Accessing named drawing components .....	893
Controlling the DesignCenter display.....	895
Accessing Drawing Content with Tool Palettes .....	896
Creating a new tool palette.....	896
Adding content tools .....	897
Adding command tools .....	898
Copying a tool .....	899
Setting tool properties .....	900
Organizing tool palettes .....	902
Using a tool palette .....	903
Setting Standards for Drawings.....	905
Using the CAD Standards tools .....	906
Using layer notification .....	910
Translating layers .....	914
The Communication Center.....	917
Renaming named objects .....	918
Working with Sheet Sets.....	919
Understanding sheet sets .....	920
Creating a sheet set .....	922
Setting up sheet-set references .....	926
Using a sheet set .....	934
Organizing Your Drawings .....	939
Archiving drawings .....	939
Finding drawings .....	940
Specifying drawing properties .....	941
Maintaining Security .....	941
Password protection.....	941
Digital signatures .....	942

## **Contents**

Keeping Track of Referenced Files .....	943
Handling Errors and Crashes .....	945
Taking care of temporary files .....	945
Repairing corrupted drawing files .....	945
Using backup drawings .....	946
Recovering from a crash .....	947
Managing Drawings from Prior Releases .....	948
Summary .....	949
<b>Chapter 27: Working with Other Applications . . . . .</b>	<b>951</b>
Importing and Exporting Other File Formats .....	952
Exporting drawings .....	952
Importing files .....	957
Working with Raster Images .....	959
Inserting images .....	960
Managing images .....	961
Clipping images .....	963
Controlling image display .....	963
Pasting, Linking, and Embedding Objects .....	966
Embedding objects into a drawing .....	967
Using Paste Special .....	969
Linking data .....	973
Summary .....	975
<b>Chapter 28: Getting on the Internet. . . . .</b>	<b>977</b>
Sending Drawings .....	977
Using eTransmit .....	977
Specifying transmittal settings .....	978
Opening Drawings from the Web .....	981
Using the Browse the Web – Open dialog box .....	981
Using i-drop to drag objects into a drawing .....	981
Creating Object Hyperlinks .....	981
Creating a hyperlink .....	982
Using a hyperlink .....	983
Editing a hyperlink .....	983
Publishing Drawings .....	985
Understanding DWF files .....	985
Creating 2D DWF files .....	985
Creating 3D DWF files .....	989
Using the Publish to Web Wizard .....	992
Posting DWF files directly .....	995
Editing Web pages .....	995
Viewing DWF drawings .....	995
Summary .....	1000

**Part VI: Customizing AutoCAD and AutoCAD LT                    1001**

---

<b>Chapter 29: Customizing Commands, Toolbars, Tool Palettes, and the Dashboard . . . . .</b>	<b>1003</b>
Working with Customizable Files.....	1003
Editing customizable files.....	1005
Backing up customizable files .....	1006
Using the command line form of commands .....	1006
Documenting your files .....	1009
Creating Shortcuts for Commands .....	1009
Creating shortcuts to Windows programs .....	1010
Creating keyboard shortcuts to commands .....	1010
Customizing Toolbars.....	1012
Using the Customize User Interface dialog box .....	1013
Removing buttons from an existing toolbar .....	1014
Creating a new toolbar .....	1014
Customizing Tool Palettes .....	1023
Customizing the Dashboard .....	1025
Create a new control panel.....	1025
Modify a control panel .....	1025
Summary .....	1026
<b>Chapter 30: Creating Macros and Slide Shows with Script Files . . . . .</b>	<b>1027</b>
Creating Macros with Script Files .....	1027
Creating the script file .....	1027
Running a script file.....	1029
Creating Slide Shows .....	1033
Creating slides .....	1033
Viewing slides .....	1034
Using scripts to create slide shows .....	1034
Creating Slide Libraries .....	1036
Summary .....	1037
<b>Chapter 31: Creating Your Own Linetypes and Hatch Patterns . . . . .</b>	<b>1039</b>
Creating Linetypes .....	1039
Creating simple linetypes .....	1039
Creating complex linetypes .....	1041
Creating Hatch Patterns .....	1044
Summary .....	1050
<b>Chapter 32: Creating Shapes and Fonts . . . . .</b>	<b>1051</b>
Creating Shapes .....	1051
Using shape files .....	1052
Creating shape files .....	1052
Editing shape files .....	1060
Creating Fonts .....	1061
Summary .....	1062

## **Contents**

<b>Chapter 33: Customizing Menus . . . . .</b>	<b>1063</b>
Working with the Customization File .....	1063
Understanding the menu file .....	1063
Loading and unloading customization files .....	1064
Customizing a Menu .....	1067
Looking at a drop-down menu.....	1068
Writing menu macros.....	1070
Swapping menus .....	1071
Customizing mouse buttons and tablet buttons .....	1072
Customizing drop-down menus.....	1074
Customizing image-tile menus .....	1086
Customizing tablet menus .....	1089
Working with the Screen menu .....	1090
Creating keyboard shortcuts .....	1090
Summary .....	1094
<b>Part VII: Programming AutoCAD</b>	<b>1095</b>
<b>Chapter 34: Understanding AutoLISP and Visual LISP Basics. . . . .</b>	<b>1097</b>
Introducing Visual LISP .....	1098
Opening Visual LISP .....	1098
Opening and loading an AutoLISP file with Visual LISP .....	1098
Loading an AutoLISP file .....	1099
Using an AutoLISP routine in AutoCAD.....	1101
Looking at an AutoLISP routine .....	1101
Using the Visual LISP interface.....	1103
Closing a file and Visual LISP.....	1104
Getting Help in Visual LISP .....	1105
Working with AutoLISP Expressions .....	1106
Understanding AutoLISP syntax.....	1106
Working with numbers and text.....	1106
Using AutoLISP on the Command Line .....	1109
Creating AutoLISP Files .....	1109
Summary .....	1112
<b>Chapter 35: Exploring AutoLISP Further. . . . .</b>	<b>1113</b>
Creating Variables.....	1113
Working with AutoCAD Commands .....	1114
Accessing AutoCAD commands .....	1114
Creating functions .....	1115
Creating functions with arguments .....	1118
Working with system variables.....	1119
Working with Lists .....	1121
Using lists for coordinates .....	1121
Creating dotted pairs .....	1122

Setting Conditions .....	1122
Conditional structures .....	1122
Loop structures .....	1124
Managing Drawing Objects .....	1126
Getting information about an object.....	1127
Modifying objects .....	1129
Creating selection sets .....	1129
Getting Input from the User .....	1132
Putting on the Finishing Touches .....	1133
Summary .....	1137

Understanding Local and Global Variables .....	1139
Working with Visual LISP ActiveX Functions .....	1141
Reviewing AutoLISP retrieval and modification .....	1141
Using ActiveX with Visual LISP .....	1145
Debugging Code.....	1148
Using the Error Trace window .....	1149
Working with break points.....	1150
Using the Watch window .....	1153
Summary .....	1154

Chapter 37: Programming with Visual Basic for Applications . . (On the DVD)

Starting to Work with VBA.....	BC2
Opening the VBA environment .....	BC2
Getting acquainted with VBA .....	BC3
Investigating the hierarchy model .....	BC4
Accessing help.....	BC6
Writing VBA Code .....	BC7
Looking at VBA syntax .....	BC9
Saving a VBA routine .....	BC10
Loading a VBA routine .....	BC11
Running a VBA routine .....	BC11
Using the Visual Basic Editor.....	BC11
Understanding variables .....	BC13
Creating VBA statements .....	BC14
Getting User Input.....	BC15
Creating Dialog Boxes .....	BC18
Understanding the Toolbox toolbar .....	BC18
Changing dialog-box properties.....	BC20
Adding dialog-box controls .....	BC20
Modifying Objects .....	BC25
Using constants .....	BC25
Using functions .....	BC27
Debugging and Trapping Errors.....	BC27
Moving to Advanced Programming .....	BC28
Summary .....	BC29
A Final Word .....	BC29
