Part A Highway Planning and Development Issues

1	Financing Highways	<i>Anthony T.H. Chin</i>	1-1
1.1	Introduction		1-1
1.2	Financing Structure and Sources		1-3
1.3	Role of Donor Agencies		1-9
1.4	An Analysis of Highway Project Financing		1-10
1.5	“Template” for Successful Highway Financing		1-16
	References		1-20
	Further Reading		1-21
2	Access Management of Highways	<i>K. Raguraman and Kumares C. Sinha</i>	2-1
2.1	Introduction		2-1
2.2	Principles of Access Management		2-2
2.3	Economic Impacts of Access Management and Public Participation		2-14
2.4	Conclusion		2-16
	Acknowledgment		2-17
	References		2-17
3	Environmental Impact Assessment of Highway Development	<i>M.A. Aziz</i>	3-1
3.1	Introduction		3-1
3.2	EIA in Phases of Highway Development		3-6
3.3	EIA Activities in Highway Development		3-8
3.4	EIA Methodologies		3-14
3.5	Summary		3-21
	References		3-22
4	Highway Safety	<i>Ian Johnston</i>	4-1
	Part A — Fundamental Concepts in Road Traffic Safety		4-2
4.1	Safe System Design Is Paramount		4-2
4.2	The Dimensions of the Road Traffic Injury Problem		4-3
4.3	Measuring Road Traffic Safety Performance		4-5

4.4	Is Safety Just a “By-Product” of the Road Transport System?	4-9
4.5	Modern Thinking about Road Traffic Safety	4-12
Part B — The “Tool Box” for Road and Traffic Engineers		4-20
4.6	A Safety Engineering Mindset	4-20
4.7	Matching Systems to Users	4-22
4.8	Moving beyond Standards	4-27
4.9	Travel Speed and Journey Time — the Horns of the Mobility and Safety Dilemma	4-29
4.10	Will “Information Technology” Be the Springboard to a Safer System?	4-32
4.11	The Decision Making Process	4-34
Part C — Summary and Conclusions		4-35
4.12	Bringing It All Together	4-35
References		4-36
5	Road Traffic Noise <i>Stephen Samuels</i>	5-1
5.1	Introduction and Fundamentals	5-1
5.2	Road Traffic Noise	5-7
5.3	A Case Study	5-26
5.4	Summary	5-29
References		5-30
Further Reading		5-32
Part B Functional and Structural Design of Highways		
6	Highway Geometric Design <i>R.L. Cheu</i>	6-1
6.1	Design Concept and Philosophy	6-1
6.2	Highway Alignment Design	6-3
6.3	Design Control and Criteria	6-6
6.4	Design Elements	6-8
6.5	Level of Service Consideration	6-21
6.6	Summary	6-22
References		6-22
7	Highway Materials <i>Weng On Tam</i>	7-1
7.1	Introduction	7-1
7.2	Hot-Mix Asphalt Concrete	7-1
7.3	Emulsified and Cutback Asphalts	7-34
7.4	Portland Cement Concrete	7-37
7.5	Base and Subbase Materials	7-39
References		7-39
Further Information		7-40
8	Design of Flexible Pavements <i>Michael S. Mamlouk</i>	8-1
8.1	Introduction	8-1
8.2	Design Objectives, Constraints, and Evolution	8-9
8.3	Stresses and Strains in Flexible Pavements	8-11
8.4	Major Road Experiments	8-14
8.5	AASHTO, 1993 Design Method	8-15
8.6	Proposed AASHTO Mechanistic-Empirical Design Method	8-26

8.7	Summary	8-33
	References	8-34
9	Design of Rigid Pavements <i>T.F. Fwa and Liu Wei</i>	9-1
9.1	Characteristics of Rigid Pavements	9-2
9.2	Considerations for Structural Design of Rigid Pavement	9-4
9.3	Computation of Design Traffic Loading	9-5
9.4	Material Properties for Design of Rigid Pavement	9-11
9.5	Computation of Load-Induced Stresses: Conventional Methods	9-15
9.6	Computation of Load-Induced Stresses: Improved Methods	9-18
9.7	Computation of Thermal Stresses: Conventional Methods	9-23
9.8	Computation of Thermal Stresses: Improved Methods	9-26
9.9	Thickness Design of Concrete Pavement	9-28
9.10	Reinforcement Design of Rigid Pavement	9-40
9.11	Joints and Load Transfer Design	9-44
9.12	Future Developments	9-49
	References	9-50
	Appendix 9A User's Manual for MSLAB_LOAD	9-53
	Appendix 9B User's Manual for WARP-NONLINEAR	9-57
10	Design of Segmental Pavements <i>John W. Bull</i>	10-1
10.1	Introduction to Segmental Pavements	10-2
10.2	History of Segmental Pavements	10-2
10.3	Types of Segmental Pavements	10-3
10.4	Where Segmental Pavements are Used	10-4
10.5	Traffic Loading	10-6
10.6	Design Procedures for Segmental Pavements	10-7
10.7	Maintenance and Reinstatement of Segmental Pavements	10-13
10.8	Manufacture of Segmental Pavements	10-15
10.9	Laying of Segmental Pavements	10-16
10.10	Materials and Definitions Used for Segmental Pavements	10-17
10.11	International Segmental Paving	10-19
10.12	Model Specification Clauses for Segmental Paving	10-20
10.13	The Future of Segmental Paving	10-22
	Acknowledgments	10-23
	References	10-23
11	Overlay Design for Flexible Pavements <i>Mang Tia</i>	11-1
11.1	Introduction	11-1
11.2	Evaluation of Pavement Performance for Overlay	11-3
11.3	Procedures for Design of AC Overlay on Flexible Pavement	11-6
11.4	Procedures for Design of PCC Overlay on Flexible Pavement	11-17
11.5	Summary	11-23
	References	11-23
12	Overlay Design for Rigid Pavements <i>T.F. Fwa</i>	12-1
12.1	Introduction	12-1
12.2	Concrete Overlays of Concrete Pavement	12-2

12.3	Asphalt Concrete Overlays of Concrete Pavement	12-10
12.4	Future Development	12-16
	References	12-16
13	Highway Drainage Systems and Design <i>Khaled Ksaibati and Laycee L. Kolkman</i>	13-1
13.1	Introduction	13-1
13.2	Surface Drainage	13-3
13.3	Erosion Prevention	13-4
13.4	Hydraulic Design	13-5
13.5	Subdrainage Design	13-44
13.6	Summary	13-62
	Acknowledgments	13-62
	References	13-63
	Further Reading	13-63
	Appendix 13A	13-63
Part C Construction, Maintenance and Management of Highways		
14	Highway Construction <i>K.N. Gunalan</i>	14-1
14.1	Introduction	14-1
14.2	Highway Elements and Layout	14-1
14.3	Construction Methods and Means	14-2
14.4	Subgrade Preparation and Stabilization	14-5
14.5	Embankment Materials and Construction	14-6
14.6	Subbase Course Materials and Construction	14-8
14.7	Base Course Materials and Construction	14-8
14.8	Surface Course Construction	14-9
14.9	Summary	14-13
15	Project Management in Highway Construction <i>Derek Walker and Arun Kumar</i>	15-1
15.1	Project Management Overview	15-1
15.2	Project Planning	15-2
15.3	Organizational Framework	15-14
15.4	Monitoring and Control	15-15
15.5	Risk Management	15-24
15.6	Human Resources Management	15-32
	References	15-34
16	Highway Maintenance <i>Ian van Wijk</i>	16-1
16.1	General	16-2
16.2	Description and Definition of Highway Maintenance	16-3
16.3	Description of Defects and Appropriate Maintenance Actions	16-4
16.4	Planning and Management	16-21
16.5	Maintenance Criteria	16-24
16.6	Remedial Maintenance Activities	16-28
16.7	Preventive Maintenance Activities	16-33

16.8	Dust Suppressants	16-37
16.9	Design and Construction of Surface Dressings	16-38
16.10	Design and Construction of a Slurry Seal	16-47
16.11	Winter Maintenance	16-48
16.12	Execution of Highway Maintenance	16-49
16.13	Performance-Based Specifications	16-51
16.14	Labor-Based Techniques	16-53
16.15	Other Considerations	16-54
16.16	Summary	16-56
	Acknowledgments	16-56
	References	16-56
	Further Reading	16-59
	Appendix 16A Repair of Defects in Flexible Pavements	16-61
	Appendix 16B Repair of Defects in Rigid Pavements	16-65
	Appendix 16C Repairs of Other Defects	16-68
17	Asset Management <i>Sue McNeil and Pannapa Herabat</i>	17-1
17.1	Introduction	17-1
17.2	Highway Asset Management Framework	17-7
17.3	Tools for Highway Asset Management	17-17
17.4	An Application: GASB 34 and Asset Valuation	17-23
17.5	Implementation and System Sustainability Issues	17-27
17.6	An Application: Asset Financial Management	17-29
17.7	Efforts and Challenges	17-33
17.8	Conclusion and Future Directions	17-39
	References	17-39
18	Pavement Management Systems <i>Waheed Uddin</i>	18-1
18.1	Historical Overview of PMS	18-2
18.2	Network Level vs. Project-Level PMS Functions	18-6
18.3	Data Needs, Decision-Support Systems, GIS, Database Design	18-10
18.4	Network Partitioning, Inventory and Monitoring Databases	18-14
18.5	Traffic Data History and Environmental Data Needs	18-16
18.6	Pavement Condition Monitoring and Evaluation Technologies	18-18
18.7	Pavement Condition Deterioration and Performance Models	18-26
18.8	Pavement LCC Analysis and User Cost Models	18-35
18.9	Maintenance, Rehabilitation & Reconstruction (M,R&R) Policies and Analysis	18-39
18.10	Priority Ranking and Prioritization Methodologies	18-49
18.11	PMS Program Management Reports and Contract Packaging	18-53
18.12	PMS Development, Implementation, and Institutional Issues	18-54
18.13	PMS Case Studies	18-59
18.14	Innovative Technologies and Future Directions	18-61
	References	18-64
19	Highway Condition Surveys and Serviceability Evaluation <i>Zahidul Hoque</i>	19-1
19.1	Introduction	19-1
19.2	Types of Pavement Distresses and Their Identification	19-3
19.3	Measurement and Reporting of Pavement Distress Data	19-20
19.4	Methods and Equipment for Pavement Condition Surveys	19-21

19.5	Pavement Condition Indices	19-25
19.6	Serviceability and Roughness Measurements	19-29
19.7	Summary and Future Developments	19-43
	References	19-44
20	Structural Evaluation of Highway Pavements <i>T.F. Fwa</i>	20-1
20.1	Approaches of Structural Evaluation of Pavements	20-1
20.2	Equipment for Nondestructive Deflection Test	20-8
20.3	Backcalculation of Rigid-Pavement Properties	20-13
20.4	Backcalculation of Flexible-Pavement Properties	20-22
20.5	Artificial Intelligence Techniques for Backcalculation Analysis	20-28
20.6	Future Developments	20-29
	References	20-30
	Appendix 20A User's Manual for NUS-BACK	20-34
	Appendix 20B User's Manual for NUS-BACK3	20-37
	Appendix 20C User's Manual for NUS-BACK2	20-40
	Appendix 20D User's Manual for NUS-BACK4	20-43
	Appendix 20E User Manual for 2L-BACK	20-46
21	Pavement Skid Resistance Management <i>Kieran Feighan</i>	21-1
21.1	Introduction	21-1
21.2	Measurement of Frictional Resistance	21-5
21.3	Measurement of Texture	21-13
21.4	International Friction Index	21-18
21.5	Skid Resistance Policy	21-20
21.6	Skid Resistance Management for Networks	21-25
21.7	Maintenance Treatments to Restore Frictional Resistance	21-29
	References	21-30
22	Bridge Management Systems <i>Yi Jiang</i>	22-1
22.1	Introduction	22-1
22.2	Components and Functions of Bridge Management System	22-2
22.3	Bridge Condition Data Collection and Management	22-5
22.4	Bridge Performance Analysis and Prediction	22-8
22.5	Cost Analysis and Needs Assessment	22-20
22.6	Bridge Project Selection and System Optimization	22-27
22.7	Summary	22-50
	References	22-51
