

# CONTENTS

---

Preface to Second Edition    xi

---

## Chapter 1. Magnetic and Electric Fundamentals 1.1

---

- 1.1. Introduction / 1.1
- 1.2. Fundamentals of Magnetic Circuits / 1.2
- 1.3. Current, Flux, and Inductance in Magnetic Circuits / 1.5
- 1.4. Ampere's Law / 1.7
- 1.5. Application of Faraday's Law / 1.10
- 1.6. Magnetic Circuits / 1.14
- 1.7. RMS Current / 1.20

---

## Chapter 2. Circuit Analysis 2.1

---

- 2.1. The Ideal Transformer / 2.1
- 2.2. The Transformer Equivalent Circuit / 2.2
- 2.3. Simplifications of the Equivalent Circuit / 2.5
- 2.4. Power Sources and Loads / 2.7
- 2.5. Effect of Transformers on Circuit Performance / 2.9

---

## Chapter 3. Circuit Performance of Power Transformers 3.1

---

- 3.1. Efficiency / 3.1
- 3.2. Regulation / 3.2
- 3.3. Phase Shift / 3.3
- 3.4. Frequency Range / 3.4
- 3.5. Starting Transients / 3.5
- 3.6. Harmonic Distortion / 3.6
- 3.7. Spurious Coupling Effects / 3.7
- 3.8. Low-Capacitance Transformers / 3.8
- 3.9. High-Voltage Isolation Transformers / 3.9
- 3.10. Current Transformers / 3.9
- 3.11. Autotransformers / 3.10

---

## Chapter 4. Circuit Performance of Audio and Wideband Transformers 4.1

---

- 4.1. Insertion Loss / 4.1
- 4.2. Low-Frequency Response / 4.2
- 4.3. High-Frequency Response / 4.5

---

**Chapter 5. Circuit Performance of Pulse Transformers** **5.1**

---

- 5.1. Characteristics of Various Types of Pulse Transformers / 5.3
- 5.2. Analysis of Pulse Rise in Transformers / 5.4
- 5.3. Analysis of Top of Pulse in Transformers / 5.9
- 5.4. Analysis of Trailing Edge Response of Pulse Transformers / 5.11

---

**Chapter 6. The Use of Ferromagnetic Materials in Transformers and Inductors** **6.1**

---

- 6.1. The Magnetization Curve / 6.1
- 6.2. Core Loss / 6.3
- 6.3. The Effect of Core Materials on Bandwidth / 6.9
- 6.4. Magnetic Materials for Transformers and Inductors / 6.10

---

**Chapter 7. Mechanical Considerations** **7.1**

---

- 7.1. Enclosures / 7.2
- 7.2. Types of Cores / 7.16
- 7.3. Types of Windings / 7.30
- 7.4. Terminations / 7.36
- 7.5. Miniaturization Techniques / 7.44
- 7.6. Special Problems in High-Voltage Applications / 7.46

---

**Chapter 8. Insulation Systems** **8.1**

---

- 8.1. Insulation Aging / 8.1
- 8.2. Field Enhancement by Composite Dielectrics / 8.3
- 8.3. Field Enhancement by Electrode Geometry / 8.4
- 8.4. Surface Creepage / 8.5
- 8.5. Corona / 8.5
- 8.6. Dielectric Stresses in Magnetic Devices / 8.6
- 8.7. Dielectric Heat Loss / 8.8
- 8.8. Insulation Classes / 8.9
- 8.9. Magnetic Device Insulation Systems / 8.10
- 8.10. Potting Materials / 8.10
- 8.11. Impregnating and Filling Processes / 8.19
- 8.12. Sheet Insulation / 8.22
- 8.13. Magnet Wire Coatings / 8.23

---

**Chapter 9. Thermal Considerations** **9.1**

---

- 9.1. Steady-State Analysis / 9.1
- 9.2. Simplified Calculations for Temperature Rise / 9.10
- 9.3. Transient Thermal Response / 9.15
- 9.4. Adiabatic Loading / 9.19

- 14.4. Saturable Reactors / 14.9
- 14.5. Ferroresonant Transformers / 14.20

---

**Chapter 15. Magnetic Device Economics** **15.1**

---

- 15.1. General / 15.1
- 15.2. Standardization / 15.2
- 15.3. Size, Weight, and Cost Relationships / 15.6
- 15.4. Electrical Requirements and Their Effect on Size, Weight, and Cost / 15.6
- 15.5. Effect of Ambient and Mechanical Requirements on Size, Weight, and Cost / 15.10
- 15.6. Tolerances and Cost / 15.14
- 15.7. Tolerance Economics of Common Attributes / 15.16

---

**Chapter 16. Procurement Practice** **16.1**

---

- 16.1. Quotations / 16.1
- 16.2. Prototype Procurement / 16.2
- 16.3. Specification Procedures / 16.4
- 16.4. Economics of Quantity Procurement / 16.5
- 16.5. Evaluating Bids / 16.9
- 16.6. Delivery Schedules and Cost / 16.12
- 16.7. Captive Shops / 16.13
- 16.8. Procurement Scheduling / 16.15
- 16.9. Coordination of Specification, Design, and Use / 16.17

---

**Chapter 17. Magnetic Device Specifications and Quality Assurance** **17.1**

---

- 17.1. Design Specifications / 17.2
- 17.2. Production Specifications / 17.7
- 17.3. Design Verification Testing / 17.10
- 17.4. Production Testing / 17.16
- 17.5. Reliability / 17.22
- 17.6. Common Failure Mechanisms / 17.23
- 17.7. Reliability Enhancement / 17.26
- 17.8. Safety / 17.30

---

**Chapter 18. Computer Applications** **18.1**

---

- 18.1. Rectifier Transformer Analysis / 18.2
- 18.2. Wideband Transformer Analysis / 18.15
- 18.3. Pulse Transformer Analysis / 18.17
