

Contents

Section 1	INTRODUCTION	1
1.1	Introduction.	3
Section 2	THE DESIGN PROCESS	17
2.1	The structure of the design process	19
2.2	Designing to ensure quality.	43
2.3	Solving the requirements problem	57
2.4	Design specification	77
Section 3	PRODUCT DEVELOPMENT	101
3.1	The business objective	103
3.2	The market opportunity.	135
Section 4	DESIGN AND MATERIALS	171
4.1	Materials and the environment	173
4.2	Materials and industrial design	187
4.3	Forces for change.	197
Section 5	NEW MATERIALS	205
5.1	Advanced alloys	207
Section 6	DESIGN AND ERGONOMICS	231
6.1	Personal factors	233
6.2	Physical factors.	249
6.3	Environmental factors	273
Section 7	RELIABILITY AND MAINTAINABILITY	293
7.1	Quality and reliability.	295
7.2	Designing capable components and assemblies	319
Section 8	PRODUCT SAFETY AND LEGAL LIABILITY	369
8.1	Project management.	371
8.2	Contract clauses and their pitfalls	377
8.3	Product liability and safety legislation	385

CONTENTS

Section 9	DESIGN TECHNIQUES: ELECTRONICS	389
9.1	Circuit simulation	391
9.2	The PIC microcontroller	401
9.3	Introduction to EMC	415
9.4	The EMC directive	431
Section 10	DESIGN TECHNIQUES: MECHANICS	453
10.1	Introduction to mechanical design	455
10.2	Mechanical elements	473
Section 11	DESIGN TECHNIQUES: PLASTICS	481
11.1	Overview	483
11.2	Product design	507
11.3	Material and shape selection	583
	Index	599
