

CONTENTS

INTRODUCTION

| | PAGE |
|--|------|
| Aim and Method of Physical Sciences. | 1 |
| Fundamental Conceptions. | 4 |
| Units and Measurement. | 6 |

MECHANICS

I. GENERAL PRINCIPLES.

| | |
|--|----|
| Ideas and Definition of Kinematics. | 10 |
| Displacement, Velocity, Acceleration | 10 |
| First Principles of Dynamics. | 18 |
| Inertia Mass and Force. | 19 |

II. STATICS.

| | |
|--|----|
| Equilibrium of a Particle | 24 |
| Equilibrium of a Rigid Body | 29 |
| Moment of Force, Parallel Forces | 30 |
| Torque, Center of Mass | 35 |
| Work and Energy | 39 |
| Friction. | 44 |
| Machines | 48 |

III. KINETICS OF A PARTICLE.

| | |
|---|--------|
| Rectilinear Motion of a Mass | 54 |
| Laws of Motion | 58 |
| Motion with Constant Acceleration | 60 |
| Falling Bodies | 62 |
| Units of Force | 59, 64 |
| Kinetic Energy | 66 |
| Impact | 68 |
| Motion in a Curved Path | 72 |
| Projectiles. | 72 |
| Motion in Circle | 73 |
| Centripetal and Centrifugal Force | 77 |
| Vibratory Motion | 81 |
| Simple Harmonic Motion | 81 |
| Force in S. H. M | 84 |
| Pendulum. | 85 |

| | PAGE |
|--|------|
| IV. ROTATION OF RIGID BODIES. | |
| Kinematics of Rotation | 88 |
| Kinetics of Rotation about Fixed Axis | 91 |
| Angular Momentum | 93 |
| Kinetic Energy of Rotating Body | 94 |
| Moment of Inertia | 95 |
| Compound Pendulum | 96 |
| Some Cases of Motion with Partly Free Axis | 99 |
| Foucault Pendulum, Top and Gyroscope | 99 |

V. UNIVERSAL GRAVITATION.

| | |
|---|-----|
| Kepler's laws | 103 |
| Gravitation Constant | 104 |
| Masses of Earth and Planets | 106 |
| Variation of Gravity on Earth's Surface | 107 |

LIQUIDS AND GASES

I. FLUIDS AT REST.

| | |
|---|-----|
| Pressure in Liquids and Gases | 110 |
| Liquid Surfaces | 114 |
| Buoyancy and Floating Bodies | 117 |
| Specific Gravity | 120 |
| Gases and Atmospheric Pressure and Buoyancy | 123 |
| Compressibility of Gases, Boyle's Law | 128 |
| Pumps and Pressure Gauges | 133 |

II. FLUIDS IN MOTION.

| | |
|--|-----|
| Momentum | 140 |
| Water Wheels and Hydraulic Ram | 141 |
| Torricelli's Theorem | 143 |
| Bernoulli's Theorem | 144 |
| Pressure in Fluid Stream | 145 |

PROPERTIES OF MATTER AND ITS INTERNAL FORCES

| | |
|---|-----|
| Structure | 150 |
| Elasticity and Viscosity | 151 |
| Diffusion and Solution | 159 |
| Capillarity and Surface Tension | 163 |
| Kinetic Theory | 173 |

WAVE MOTION AND SOUND

| | |
|-------------------------------|-----|
| Surface Waves | 178 |
| Compressional Waves | 182 |
| Sound | 185 |

CONTENTS

vii

PAGE

| | |
|--|-----|
| Reflection and Refraction of Waves | 190 |
| Sound Characteristics, Intensity, Pitch, Quality | 195 |
| Doppler's principle | 200 |
| Resonators and Analysis of Sound | 201 |
| Interference and Beats | 208 |
| Standing Waves and Vibrating Bodies | 211 |
| Velocity of Wave in a Cord | 213 |
| Organ Pipes and Wind Instruments | 217 |
| Vibration of Rods and Plates | 225 |
| Laws of Similar Systems. | 227 |
| Musical Relations of Pitch. | 228 |
| The Ear and Hearing. | 231 |
| Helmholtz's Theory of Dissonance. | 235 |

HEAT

| | |
|---|-----|
| Thermometry | 238 |
| Expansion of (a) Solids | 246 |
| (b) Liquids | 250 |
| (c) Gases | 255 |
| Absolute Scale of Temperature. | 256 |
| Calorimetry and Specific Heat | 260 |
| Dulong and Petit's Law. | 267 |
| Sources and Mechanical Equivalent of Heat | 268 |
| Cooling due to Work of Expansion | 273 |
| Nature of Heat | 274 |
| Transmission of Heat | 276 |
| Change of State | 281 |
| Fusion | 281 |
| Vaporization. | 288 |
| Sublimation | 297 |
| Condensation of Gases | 300 |
| Heat Engines | 307 |
| Radiation and Absorption. | 311 |

MAGNETISM

| | |
|---|-----|
| Properties of Magnets. | 320 |
| Law of Force and Magnetic Field | 324 |
| Terrestrial Magnetism | 330 |
| Unit Tubes of Force | 337 |
| Magnetic Induction | 341 |
| Permeability, Diamagnetism, and Influence of Medium | 344 |

ELECTROSTATICS

| | |
|---------------------------|-----|
| Electrification | 348 |
|---------------------------|-----|

| | PAGE |
|---|------|
| Law of Force and Distribution of Charge | 352 |
| Induction | 356 |
| Potential | 368 |
| Electrometers | 372 |
| Electron Theory | 374 |
| Condensers and Capacity | 378 |
| Energy of Charge | 383 |
| Calculation of Potential. | 387 |
| Capacity of Sphere and Condenser | 392 |
| Electric Discharge | 394 |

ELECTRIC CURRENTS

| | |
|---|-----|
| Electric Current | 399 |
| Voltaic Cell | 402 |
| Chemical Effects of Current | 409 |
| Faraday's Laws | 410 |
| Battery Cells | 417 |
| Primary Cells | 418 |
| Secondary Cells | 420 |
| Modes of Connecting Cells | 423 |
| Fall of Potential in Circuit | 425 |
| Ohm's Law | 427 |
| Resistance and its Measurement | 429 |
| Energy and Heating Effect of Currents | 435 |
| Thermo electricity | 442 |
| Magnetic Effects of Currents | 447 |
| Hysteresis and Electromagnets. | 453 |
| Interaction between Current and Magnetic Field. | 457 |
| Instruments Measuring Currents and Potentials | 462 |
| Application to Bells and Telegraph. | 471 |
| Electromagnetic Induction. | 475 |
| Electromotive Force of Induction | 479 |
| Energy in Induction and Lenz Law | 482 |
| Self-induction | 485 |
| Induction Coil and Telephone | 487 |
| Electromagnetic Units | 492 |
| Dynamo Electric Machines and Motors. | 495 |
| I. Direct Current Dynamos | 495 |
| II. Direct Current Motors | 502 |
| III. Alternating Currents | 505 |
| Alternating Current Motors. | 511 |
| Electric Oscillations and Waves | 516 |
| Wireless Telegraphy and Telephony | 521 |
| Electric Discharge through Gases | 525 |
| Cathode Rays, Röntgen Rays, Canal Rays | 527 |

CONTENTS

ix

RADIOACTIVITY

| | PAGE |
|---|------|
| Radioactivity | 532 |
| The Alpha, Beta, and Gamma Rays | 534 |
| Radioactive Transformations | 535 |
| Electron Theory of Matter | 539 |

LIGHT

| | |
|--|-----|
| Shadows and Photometry | 541 |
| Velocity of Light. | 548 |
| Wave Theory | 554 |
| Reflection of Light and Mirrors | 557 |
| Refraction of Light. | 568 |
| Prisms and Lenses | 575 |
| Dispersion of Light. | 589 |
| Achromatism | 592 |
| Rainbow | 594 |
| Optical Instruments | 596 |
| Photographic Camera and Projecting Lantern | 597 |
| The Eye | 600 |
| Microscope and Telescopes | 604 |
| Analysis of Light. | 612 |
| The Spectrum | 612 |
| Kinds of Spectra. | 617 |
| Doppler's Principle in Spectroscopy. | 622 |
| Colors of Bodies | 625 |
| Fluorescence. | 629 |
| Color Vision, Young-Helmholtz Theory | 631 |
| Interference of Light | 632 |
| Newton's Rings, Interferometer | 634 |
| Diffraction. | 639 |
| Resolving Power of Optical Instruments | 645 |
| Diffraction Grating. | 645 |
| Measurement of Wave Lengths of Light. | 650 |
| Polarized Light | 653 |
| Polarization by (a) Absorption. | 653 |
| (b) Reflection and Refraction | 655 |
| (c) Fine Particles | 658 |
| (d) Double Refraction | 659 |
| Huygen's Wave Surface. | 662 |
| Rotation of Plane of Polarization | 664 |
| Circular and Elliptical Polarized Light | 667 |
| Electricity and Light | 670 |
| Magnetic Rotation | 670 |
| Kerr Effect | 671 |

CONTENTS

| | PAGE |
|--|------|
| Electromagnetic Theory | 671 |
| Zeeman Effect | 671 |
| APPENDIX I.—Carnot's Theorem and the Absolute Scale of Temperature | 673 |
| APPENDIX II.—Proof of Newton's Wave Formula | 683 |
| TABLES OF CONSTANTS | 686 |
| INDEX | 687 |
