

Contents

Prefacexiii
Preface to the Second Editionxv
1. Prologue	1
Authority	
Intuition	
Reason	
Sensory Data	
Self-Evident Truths	
Historical Perspectives: Plato, Aristotle, Aquinas, Copernicus, Galileo, Newton	
Study Guide: Fundamental Principles, Glossary, Exercises	
2. Science and the Universe	11
The World Around Us	
Nuclear Matter	
Atoms	
Molecules and Crystals	
Complexes of Molecules	
The Earth	
The Solar System	
The Milky Way Galaxy and Beyond	
Summary	
Historical Perspectives: The Emergence of Science	
Study Guide: Fundamental Principles, Glossary, Exercises	
 THE SCIENCE OF MOTION	
3. Laws Governing Motion	19
The First Law of Motion	
Acceleration	
Force	
Mass	
The Second Law of Motion	
The Third Law of Motion	
Applications	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	
4. The Fundamental Interactions	29
Falling Objects	
The Moon's Orbit	
The Law of Universal Gravitation	
Some Simple Experiments with Electricity	

The Electrical Model of Matter	
The Electric Force Law	
Electric Currents	
Electromagnetic Forces	
Applications	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	
5. Applications of the Laws of Force and Motion	.37
Gravitational Acceleration	
Forces within Matter	
Contact Forces	
Finding Forces	
Applications Involving More Than One Force	
Circular Motion	
The Nature of Scientific Laws	
Mechanistic Philosophy	
Applications	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	
6. Some Effects Due to Internal Forces	.47
Forces within Solids	
Pressure	
Buoyant Forces	
Floating Objects	
Buoyancy in the Earth's Crust: Isostasy	
Convection	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	
7. Conservation Laws	.55
Conservation of Mass	
Conservation of Electric Charge	
Conservation of Linear Momentum	
Conservation of Angular Momentum	
Forms of Energy	
Kinetic Energy	
Gravitational Potential Energy	
Electrical Potential Energy	
Internal Energy	
Conservation of Energy	
Energy Transfer and Transformation Processes	
Summary	
Historical Perspectives: Conservation of Energy	
Study Guide: Fundamental Principles, Glossary, Exercises	
8. The Special Principle Relativity	.67
Motion Symmetry	
The Motion of the Earth	
Summary	
Historical Perspectives: The Motion of the Earth	
Study Guide: Fundamental Principles, Glossary, Exercises	
9. Special Relativity	.75
Spacetime	

- Postulates of the Special Theory of Relativity
- Simultaneity
- Time Dilation
- Length Contraction
- Mass Increase
- Mass and Energy
- Summary
- Study Guide: Fundamental Principles, Glossary, Exercises

THE SCIENCE OF MATTER

10. The Physical Properties of Matter87
The Continuous Model of Matter	
The States of Matter	
Density	
Color	
Response to Force	
Electrical Properties	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	
11. The Molecular Model of Matter95
Molecules	
Brownian Motion	
The States of Matter	
Internal Energy and Temperature	
Heat Conduction	
Properties of Gases	
Change of Physical State	
Summary	
Historical Perspectives: Atoms and Molecules	
Study Guide: Fundamental Principles, Glossary, Exercises	
12. The Law of Increasing Disorder105
Irreversible Processes	
Order and Disorder	
Order and Energy	
Ways To Increase Order	
The “Energy” Crisis	
The Efficiency of Energy Conversion	
Pollution	
Equilibrium	
Summary	
Historical Perspectives: The Second Law of Thermodynamics and Materialism	
Study Guide: Fundamental Principles, Glossary, Exercises	
13. Waves115
Types of Waves	
Properties of Waves	
Wave Phenomena	
Reflection	
Refraction	
Diffraction	
Interference	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	

14. The Properties of Light	123
The Speed of Light	
The Source of Radiation	
The Electromagnetic Family	
Wave Phenomena of Light	
The Particulate Nature of Light	
Wave-Particle Duality	
Summary	
Historical Perspectives: What is Light?	
Study Guide: Fundamental Principles, Glossary, Exercises	
15. The Nuclear Atom	133
The Charged Particles in Atoms	
Electrons as Particles	
Mass Spectrometer	
The Rutherford Experiment	
The Bohr Model	
Discrete Spectra	
Continuous Spectra	
Summary	
Historical Perspectives: Rutherford and Bohr Discover the Nuclear Atom	
Study Guide: Fundamental Principles, Glossary, Exercises	
16. Duality of Matter	143
The Two-Slit Experiment	
Waves of Probability	
Electron Microscope	
The Uncertainty Principle	
What is Reality?	
The Role of the Newtonian Laws	
Summary	
Historical Perspectives: deBroglie and Davisson Discover the Electron Wave	
Study Guide: Fundamental Principles, Glossary, Exercises	
17. The Wave Model of the Atom	155
Standing Waves	
Orbitals	
Energy Wells	
Orbital Energies	
Chemical Elements	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	
18. The Periodic Table	163
Periodic Patterns	
Historical Perspectives: The Emergence of Chemistry	
Study Guide: Fundamental Principles, Glossary, Exercises	
19. Molecules and Compounds	171
Molecular Structure	
Chemical Reactions	
Chemical Formulas	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	

20. Metals and their Compounds	183
Pure Metals and Alloys	
Oxidation States	
Compounds Between Metals and Nonmetals	
Formulas and Names of Salts	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	
21. Compounds of Nonmetals	193
Covalent Bonds	
Properties of Covalent Molecules	
Molecular Ions	
Minerals	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	
22. Chemistry of Living Things	201
Carbon Chains	
Functional Groups	
Proteins	
Nucleic Acids	
Summary	
Historical Perspectives: Mechanism versus Vitalism	
Study Guide: Fundamental Principles, Glossary, Exercises	
23. How Life Works	215
How does the cell get its nutrients?	
How does the organism fabricate amino acids and nucleotides?	
How do the enzymes get energy to do their tasks?	
How does the cell make its proteins?	
How are the blueprints delivered to the ribosomes?	
How are the raw materials delivered to the ribosomes?	
How do the ribosomes execute the final assembly?	
How does the cell copy the blueprints before division?	
How do complex organisms develop?	
What are favorable conditions for life?	
Is life inevitable?	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	
24. The Nucleus	223
Protons and Neutrons	
Radioactivity	
Alpha Decay	
Beta Decay	
Gamma Decay	
Electron Capture	
Positron Decay	
Fission	
Application of Radioactive Materials	
Radioactive Half-Life	
Radioactive Dating	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	

25. Nuclear Forces and Nuclear Energy	233
The Strong Interaction	
Nuclear Energy	
Nuclear Fusion	
Nuclear Fission	
The Weak Interaction	
The Structure of Nucleons	
Summary	
Historical Perspectives: The Development of the Atomic Bomb	
Study Guide: Fundamental Principles, Glossary, Exercises	
 MATTER IN MOTION	
26. Cosmology: How the Universe Works	243
Measuring Astronomical Distances	
Measuring Motion	
The Expanding Universe	
Einstein's General Relativity	
The Big Bang Universe	
A Plausible Scenario for the Big Bang	
The Steady State Universe	
Summary	
Historical Perspectives: Is the Universe Infinite?	
Study Guide: Fundamental Principles, Glossary, Exercises	
 27. The History of a Star	 255
From Dust to Star in 10 Million Years	
From Youth to Maturity in another 17 Million Years	
An Adult Life of 10 Billion Years	
The Star Becomes a Red Giant	
Death of a Small Star	
Death of a Massive Star	
Summary	
Historical Perspectives: What are the Stars?	
Study Guide: Fundamental Principles, Glossary, Exercises	
 28. Planet Earth	 263
The Solar System	
A Brief Tour of the Planets	
The Moon	
The Earth	
The Continents	
The Continental Shield	
The Stable Platform	
Fold Mountains Belts	
The Continents Reconsidered	
The Ocean Basins	
The Deep Ocean Floor	
The Oceanic Ridge	
Island Arcs and Other Island Chains	
The Oceans Reconsidered	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	

29. Geologic Time	279
The Principles of Relative Dating	
Examples of Relative Dating	
The Geologic Column	
Absolute Time	
Uniformitarianism	
Early Estimates of the Age of the Earth	
Radiometric Dating	
The Geologic Column Revisited	
The Age of the Earth	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	
30. The Interior of the Earth	291
The Density of the Earth	
Seismic Waves and the Structure of the Earth	
The Composition of the Crust	
The Composition of the Mantle	
The Composition of the Core	
Summary of the Chemical Layering of the Earth—Differentiation	
The Mechanical Layering of the Earth	
Isostasy	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	
31. From Continental Drift to Plate Tectonics: The Evidence	301
The Fit of the Continents	
Continental Structure	
Paleontological Evidence	
Paleoclimatic Evidence	
Paleomagnetic Evidence	
Wegner’s Hypothesis: Mechanism, Test, and Rejection	
Sea-Floor Spreading	
Magnetic Reversals and “Stripes” on the Seafloor	
Further Tests and Triumph	
The Breakup of Pangaea	
Postscript: A Comment on the Way Science Works	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	
32. Plate Tectonics: A Working Model for the Earth	315
Plate Motion	
Divergent Plate Boundaries	
Convergent Plate Boundaries	
Transform Boundaries	
Relative and Absolute Plate Motions—Hotspot Trails	
The Plate-Tectonic Evolution of a Continent	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	
33. Fossils: The Record of Life	327
The Significance of Fossils—A Gradual Awakening	
Preservation of Fossils	
Complete Preservation	
Unaltered Hard Parts	
Replacement	

Molds and Casts	
Carbonized Residues	
Trace Fossils	
Uses of Fossils	
Markers of the Passage of Time	
Indicators of Ancient Environments	
History of Life on Earth	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	
34. The Changing Face of the Earth	337
The Hydrologic Cycle	
The Hydrologic System	
Running Water	
Glaciers	
Groundwater	
Wind	
Oceans	
The Face of the Earth Through Time	
Accretion Stage	
Bombardment and Heating	
The Iron Catastrophe and Differentiation	
Onset of the Tectonic System	
Origin of the Atmosphere and Oceans	
Toward Pangaea	
Since Pangaea	
Summary	
Study Guide: Fundamental Principles, Glossary, Exercises	
Appendix A. Suggestions for Study	347
Appendix B. The Chemical Elements	349
Appendix C. The Periodic Chart of the Elements	351
Appendix D. Hints and Answers to Exercises	353
Sources and Further Readings	387
General Index	389
Biographical Index	397
Notes	399
