

Contents

Preface	vii
Chapter 1 The Real Number System	1
1.1 Axioms for a Field	1
1.2 Natural Numbers and Sequences	7
1.3 Inequalities	11
1.4 Mathematical Induction	19
Chapter 2 Continuity and Limits	23
2.1 Continuity	23
2.2 Limits	28
2.3 One-Sided Limits	33
2.4 Limits at Infinity; Infinite Limits	37
2.5 Limits of Sequences	42
Chapter 3 Basic Properties of Functions on \mathbb{R}^1	45
3.1 The Intermediate-Value Theorem	45
3.2 Least Upper Bound; Greatest Lower Bound	48
3.3 The Bolzano–Weierstrass Theorem	54
3.4 The Boundedness and Extreme-Value Theorems	56
3.5 Uniform Continuity	57
3.6 The Cauchy Criterion	61
3.7 The Heine–Borel Theorem	63

Chapter 4	Elementary Theory of Differentiation	67
	4.1 The Derivative in \mathbb{R}^1	67
	4.2 Inverse Functions in \mathbb{R}^1	77
Chapter 5	Elementary Theory of Integration	81
	5.1 The Darboux Integral for Functions on \mathbb{R}^1	81
	5.2 The Riemann Integral	91
	5.3 The Logarithm and Exponential Functions	96
Chapter 6	Elementary Theory of Metric Spaces	101
	6.1 The Schwarz and Triangle Inequalities; Metric Spaces	101
	6.2 Topology in Metric Spaces	106
	6.3 Countable and Uncountable Sets	114
	6.4 Compact Sets and the Heine–Borel Theorem	118
	6.5 Functions on Compact Sets	122
Chapter 7	Differentiation and Integration in \mathbb{R}^N	125
	7.1 Partial Derivatives and the Chain Rule	125
	7.2 Taylor's Theorem; Maxima and Minima	130
	7.3 The Derivative in \mathbb{R}^N	136
	7.4 The Darboux Integral in \mathbb{R}^N	141
	7.5 The Riemann Integral in \mathbb{R}^N	145
Chapter 8	Infinite Series	150
	8.1 Tests for Convergence and Divergence	150
	8.2 Series of Positive and Negative Terms; Power Series	155
	8.3 Uniform Convergence	162
	8.4 Uniform Convergence of Series; Power Series	168
Chapter 9	The Derivative of an Integral. Improper Integrals	178
	9.1 The Derivative of a Function Defined by an Integral. The Leibniz Rule	178
	9.2 Convergence and Divergence of Improper Integrals	183
Chapter 10	The Riemann–Stieltjes Integral	190
	10.1 Functions of Bounded Variation	190
	10.2 The Riemann–Stieltjes Integral	195
Chapter 11	The Implicit Function Theorem. Lagrange Multipliers	205
	11.1 The Implicit Function Theorem	205
	11.2 Lagrange Multipliers	210

Chapter 12 Vector Functions on \mathbb{R}^N ; The Theorems of Green and Stokes..... 214

 12.1 Vector Functions on \mathbb{R}^N 214

 12.2 Line Integrals in \mathbb{R}^N 225

 12.3 Green's Theorem in the Plane 232

 12.4 Area of a Surface in \mathbb{R}^3 239

 12.5 The Stokes Theorem 244

 12.6 The Divergence Theorem 253

Answers to Odd-Numbered Problems..... 261

Index..... 269
