Preface			ix
Par	t 1 St	atics and strength of materials	1
1	The ef	ffects of forces on materials	1
	1.1	Introduction	1
	1.2	Tensile force	2
	1.2 1.3	Compressive force	2
	1.4		2
	1.5	Stress	2 2 2 2 3
	1.6	Strain	3
	1.7	Elasticity, limit of	
		proportionality and elastic limit	6
	1.8	Hooke's law	7
	1.9	Ductility, brittleness	
		and malleability	11
	1.10	Modulus of rigidity	12
	1.11	Thermal strain	12
	1.12	Compound bars	13
2	Tanail	4.0.4 ¹	10
2		e testing	18
	2.1	The tensile test	18
	2.2	Worked problems	10
	2.2	on tensile testing	19
	2.3	Further worked problems	01
		on tensile testing	21
3	Forces	acting at a point	25
	3.1		25
	3.2	Centre of gravity and equilibrium	25
	3.3	Forces	26
	3.4	The resultant of	
		two coplanar forces	27
	3.5	Triangle of forces method	28
	3.6	The parallelogram	
		of forces method	29
	3.7	Resultant of coplanar	
		forces by calculation	29
	3.8	Resultant of more than	
		two coplanar forces	30
	3.9	Coplanar forces in equilibrium	32
	3.10		34
	3.11	Summary	37
4	Fores	in atmatumed	40
4	Forces 4.1	s in structures Introduction	40 40
	4.1	muouucuon	40

4.2	Worked problems on mechanisms	
	and pin-jointed trusses	41
4.3	Graphical method	42
4.4	Method of joints (a	
	mathematical method)	46
4.5	The method of sections	50
	(a mathematical method)	52
	Assignment 1	55
Simply	supported beams	57
5.1	The moment of a force	57
5.2	Equilibrium and the	
	principle of moments	58
5.3	Simply supported beams	
	having point loads	61
5.4	Simply supported	()
	beams with couples	64
Pondin	g moment and	69
	orce diagrams	09
6.1		69
62	Bending moment (M)	69
6.3	Shearing force (F)	69
6.4	Worked problems on	
	bending moment and	
	shearing force diagrams	70
6.5	Uniformly distributed loads	78
First o	nd second moment of areas	84
7.1	Centroids	04 84
7.1	The first moment of area	84
7.3	Centroid of area between	01
7.0	a curve and the <i>x</i> -axis	84
7.4	Centroid of area between	
	a curve and the y-axis	85
7.5	Worked problems on	
	centroids of simple shapes	86
7.6	Further worked problems on	
	centroids of simple shapes	87
7.7	Second moments of	
	area of regular sections	88
7.8	Second moment of area	
	for 'built-up' sections	96
	Assignment 2	102

5

6

7

8	Bendi	ng of beams	103
	8.1	Introduction	103
	8.2	To prove that $\frac{\sigma}{y} = \frac{M}{I} = \frac{E}{R}$ Worked problems on	103
	8.3	Worked problems on	
	0.0	the bending of beams	105
9	Torqu	P	109
-	9.1	Couple and torque	109
	9.2	Work done and power	
		transmitted by a constant torque	110
	9.3	Kinetic energy and moment of inertia	112
	9.4		112
	7.4	sion and efficiency	116
		5	
10	Twisti	ng of shafts	120
		Introduction	120
	10.2	To prove that $\frac{\tau}{r} = \frac{T}{J} = \frac{G\theta}{L}$	120
	10.3	$\begin{array}{ccc} r & J & L \\ \text{Worked problems on} \end{array}$	
		the twisting of shafts	122
		Assignment 3	126
Par	t2 Dy	vnamics	127
11	I inon	ond angular motion	127
11		and angular motion	
11	11.1	The radian	127
11	11.1	The radian	127 127
11	11.1	The radian	127
11	11.1 11.2 11.3 11.4		127 127 129
	11.1 11.2 11.3 11.4 11.5	The radian Linear and angular velocity Linear and angular acceleration Further equations of motion Relative velocity	127 127 129 130 132
11	11.1 11.2 11.3 11.4 11.5	The radian Linear and angular velocity Linear and angular acceleration Further equations of motion Relative velocity momentum and impulse	127 127 129 130
	11.1 11.2 11.3 11.4 11.5 Linear 12.1	The radian Linear and angular velocity Linear and angular acceleration Further equations of motion Relative velocity momentum and impulse	127 127 129 130 132 136
12	11.1 11.2 11.3 11.4 11.5 Linear 12.1 12.2	The radian Linear and angular velocity Linear and angular acceleration Further equations of motion Relative velocity momentum and impulse Linear momentum Impulse and impulsive forces	127 127 129 130 132 136 136 139
	11.1 11.2 11.3 11.4 11.5 Linean 12.1 12.2 Force,	The radian Linear and angular velocity Linear and angular acceleration Further equations of motion Relative velocity momentum and impulse Linear momentum Impulse and impulsive forces mass and acceleration	127 127 129 130 132 136 136 139 144
12	11.1 11.2 11.3 11.4 11.5 Linean 12.1 12.2 Force, 13.1	The radian Linear and angular velocity Linear and angular acceleration Further equations of motion Relative velocity momentum and impulse Linear momentum Impulse and impulsive forces mass and acceleration Introduction	127 127 129 130 132 136 136 139 144 144
12	11.1 11.2 11.3 11.4 11.5 Linean 12.1 12.2 Force,	The radian Linear and angular velocity Linear and angular acceleration Further equations of motion Relative velocity momentum and impulse Linear momentum Impulse and impulsive forces mass and acceleration Introduction Newton's laws of motion	127 127 129 130 132 136 136 139 144
12	11.1 11.2 11.3 11.4 11.5 Linean 12.1 12.2 Force, 13.1 13.2	The radian Linear and angular velocity Linear and angular acceleration Further equations of motion Relative velocity momentum and impulse Linear momentum Impulse and impulsive forces mass and acceleration Introduction Newton's laws of motion Centripetal acceleration Rotation of a rigid	127 127 129 130 132 136 136 139 144 144 144
12	11.1 11.2 11.3 11.4 11.5 Linean 12.1 12.2 Force, 13.1 13.2 13.3 13.4	The radian Linear and angular velocity Linear and angular acceleration Further equations of motion Relative velocity momentum and impulse Linear momentum Impulse and impulsive forces mass and acceleration Introduction Newton's laws of motion Centripetal acceleration Rotation of a rigid body about a fixed axis	127 127 129 130 132 136 136 139 144 144 144 147 149
12	11.1 11.2 11.3 11.4 11.5 Linean 12.1 12.2 Force, 13.1 13.2 13.3	The radian Linear and angular velocity Linear and angular acceleration Further equations of motion Relative velocity momentum and impulse Linear momentum Impulse and impulsive forces mass and acceleration Introduction Newton's laws of motion Centripetal acceleration Rotation of a rigid	127 127 129 130 132 136 136 139 144 144 144
12	11.1 11.2 11.3 11.4 11.5 Linean 12.1 12.2 Force, 13.1 13.2 13.3 13.4	The radian Linear and angular velocity Linear and angular acceleration Further equations of motion Relative velocity momentum and impulse Linear momentum Impulse and impulsive forces mass and acceleration Introduction Newton's laws of motion Centripetal acceleration Rotation of a rigid body about a fixed axis Moment of inertia (<i>I</i>)	127 127 129 130 132 136 136 139 144 144 144 147 149
