<i>Preface</i>	v
1. Basic Concepts of Fluid Mechanics	1
1.1 Introduction	1
1.2 Characteristics of a Fluid	1
1.3 Kinds of Fluids	4
1.4 Fluid Property Definitions	4
1.5 Thermodynamic Concepts	14
1.6 Other Fluid Properties	18
References	
2. Fluid Statics	24
2.1 Introduction	24
2.2 Fluid Statics	24
2.3 Basic Equation of Fluid Statics	25
2.4 Pressure- Height Relations for Incompressible Fluids	27
2.5 Pressure -Sensing Devices	27
2.6 Pressure-Height Relations for Ideal Gases	33
2.7 Atmosphere	35
2.8 Buoyancy and Flotation	36

3. Equations of Fluid Motion	42
3.1 Introduction	42
3.2 Fluid Kinematics	42
3.3 Fluid Dynamics	46
3.4 Gas Dynamics	65
4. Flow in Pipes	140
4.1 Introduction	140
4.2 Background	140
4.3 Physical Analysis for Incompressible Flow	141
4.4 Dynamic Similarity for Incompressible Flow	142
4.5 Reynolds Number Equations	143
4.6 Laminar Flow in Pipes	144
4.7 Turbulent Flow in Pipes	148
4.8 Energy Losses in Piping Systems	150
4.9 Design Velocities	160
4.10 Engineering Design Calculations	162
4.11 Recommended Procedures for Design Calculations	163
4.12 Compressible Flow in Pipes	180
4.13 Noncircular Pipes	188
4.14 Hazen–Williams Equation	190
References	194
5. Flow in Open Channels	196
5.1 Introduction	196
5.2 Background	196
5.3 Definitions	197
5.4 Parameter for Open Channel Flow	198
5.5 Maximum Hydraulic Radius	201
5.6 Specific Energy	203
5.7 Hydraulic Jump	208
5.8 Weirs	211
5.9 Rectangular Weirs	212
5.10 Triangular Weirs	215
References	218
6. Flow Measurement in Closed Conduits	219
6.1 Introduction	219
6.2 Background	219
6.3 Flow Measurement Accuracy	220

Contents

ix

6.4 Dimensional Analysis of Pipeline Flow Meters	220
6.5 Physical Analysis of Pipeline Flow Meters	220
6.6 ASME Venturi Tubes	222
6.7 ASME Flow Nozzles	229
6.8 ASME Orifice Meters	236
6.9 Elbow Flow Meters	244
6.10 Pitot Tubes	248
6.11 ASME Critical Flow Venturi Nozzles	254
References	259
7. Forces on Immersed Objects	261
7.1 Introduction	261
7.2 Background	261
7.3 Drag and Lift	262
7.4 Skin Friction Drag	265
7.5 Shape Drag	268
7.6 Drag of a Sphere	270
7.7 Drag of a Cylinder	275
7.8 Wake Frequency	278
7.9 Resistance of Ships	281
7.10 Lifting Vanes	283
7.11 Propeller Characteristics	287
8. Unsteady Flow	291
8.1 Introduction	291
8.2 Background	291
8.3 Equation of Motion	291
8.4 One-Dimensional Equation of Motion	293
8.5 Unsteady Incompressible Flow in Closed Conduits	294
8.6 Establishment of Steady Flow	295
8.7 Velocity of Pressure Waves in Pipes	296
8.8 Water Hammer	299
8.9 Time to Change Tank Levels with Inflow	303
8.10 Time to Change Tank Levels Without Inflow	306
Reference	308
<i>Appendix A Conversion Factors</i>	309
<i>Appendix B Pipe Schedules</i>	311
<i>Appendix C Properties of Areas, Pipes, and Tubing</i>	313
<i>Appendix D Fluid Properties</i>	333
<i>Index</i>	389
