

CONTENTS

	Preface	xi
CHAPTER 1	Basics	1
	1.0 Introductory Remarks	1
	1.1 Number Systems	1
	1.2 Coordinates in One Dimension	3
	1.3 Coordinates in Two Dimensions	5
	1.4 The Slope of a Line in the Plane	8
	1.5 The Equation of a Line	13
	1.6 Loci in the Plane	15
	1.7 Trigonometry	19
	1.8 Sets and Functions	30
	1.8.1 Examples of Functions of a Real Variable	31
	1.8.2 Graphs of Functions	33
	1.8.3 Plotting the Graph of a Function	35
	1.8.4 Composition of Functions	40
	1.8.5 The Inverse of a Function	42
	1.9 A Few Words About Logarithms and Exponentials	49
CHAPTER 2	Foundations of Calculus	57
	2.1 Limits	57
	2.1.1 One-Sided Limits	60
	2.2 Properties of Limits	61
	2.3 Continuity	64
	2.4 The Derivative	66
	2.5 Rules for Calculating Derivatives	71
	2.5.1 The Derivative of an Inverse	76
	2.6 The Derivative as a Rate of Change	76

CHAPTER 3	Applications of the Derivative	81
	3.1 Graphing of Functions	81
	3.2 Maximum/Minimum Problems	86
	3.3 Related Rates	91
	3.4 Falling Bodies	94
CHAPTER 4	The Integral	99
	4.0 Introduction	99
	4.1 Antiderivatives and Indefinite Integrals	99
	4.1.1 The Concept of Antiderivative	99
	4.1.2 The Indefinite Integral	100
	4.2 Area	103
	4.3 Signed Area	111
	4.4 The Area Between Two Curves	116
	4.5 Rules of Integration	120
	4.5.1 Linear Properties	120
	4.5.2 Additivity	120
CHAPTER 5	Indeterminate Forms	123
	5.1 l'Hôpital's Rule	123
	5.1.1 Introduction	123
	5.1.2 l'Hôpital's Rule	124
	5.2 Other Indeterminate Forms	128
	5.2.1 Introduction	128
	5.2.2 Writing a Product as a Quotient	128
	5.2.3 The Use of the Logarithm	128
	5.2.4 Putting Terms Over a Common Denominator	130
	5.2.5 Other Algebraic Manipulations	131
	5.3 Improper Integrals: A First Look	132
	5.3.1 Introduction	132
	5.3.2 Integrals with Infinite Integrands	133
	5.3.3 An Application to Area	139
	5.4 More on Improper Integrals	140
	5.4.1 Introduction	140
	5.4.2 The Integral on an Infinite Interval	141
	5.4.3 Some Applications	143

CHAPTER 6	Transcendental Functions	147
6.0	Introductory Remarks	147
6.1	Logarithm Basics	147
6.1.1	A New Approach to Logarithms	148
6.1.2	The Logarithm Function and the Derivative	150
6.2	Exponential Basics	154
6.2.1	Facts About the Exponential Function	155
6.2.2	Calculus Properties of the Exponential	156
6.2.3	The Number e	158
6.3	Exponentials with Arbitrary Bases	160
6.3.1	Arbitrary Powers	160
6.3.2	Logarithms with Arbitrary Bases	163
6.4	Calculus with Logs and Exponentials to Arbitrary Bases	166
6.4.1	Differentiation and Integration of $\log_a x$ and a^x	166
6.4.2	Graphing of Logarithmic and Exponential Functions	168
6.4.3	Logarithmic Differentiation	170
6.5	Exponential Growth and Decay	172
6.5.1	A Differential Equation	173
6.5.2	Bacterial Growth	174
6.5.3	Radioactive Decay	176
6.5.4	Compound Interest	178
6.6	Inverse Trigonometric Functions	180
6.6.1	Introductory Remarks	180
6.6.2	Inverse Sine and Cosine	180
6.6.3	The Inverse Tangent Function	185
6.6.4	Integrals in Which Inverse Trigonometric Functions Arise	187
6.6.5	Other Inverse Trigonometric Functions	189
6.6.6	An Example Involving Inverse Trigonometric Functions	193
CHAPTER 7	Methods of Integration	197
7.1	Integration by Parts	197
7.2	Partial Fractions	202
7.2.1	Introductory Remarks	202
7.2.2	Products of Linear Factors	203
7.2.3	Quadratic Factors	206

7.3	Substitution	207
7.4	Integrals of Trigonometric Expressions	210
CHAPTER 8	Applications of the Integral	217
8.1	Volumes by Slicing	217
8.1.0	Introduction	217
8.1.1	The Basic Strategy	217
8.1.2	Examples	219
8.2	Volumes of Solids of Revolution	224
8.2.0	Introduction	224
8.2.1	The Method of Washers	225
8.2.2	The Method of Cylindrical Shells	228
8.2.3	Different Axes	231
8.3	Work	233
8.4	Averages	237
8.5	Arc Length and Surface Area	240
8.5.1	Arc Length	240
8.5.2	Surface Area	243
8.6	Hydrostatic Pressure	247
8.7	Numerical Methods of Integration	252
8.7.1	The Trapezoid Rule	253
8.7.2	Simpson's Rule	256
Bibliography		263
Solutions to Exercises		265
Final Exam		313
Index		339
