Introduction	xxvii

Part I: Linux First Steps

1

Chapter 1: Starting with Linux 3

Understanding Linux.	5
Exploring Linux History	7
From a Free-Flowing UNIX Culture at Bell Labs	8
To a Commercialized UNIX	10
To a GNU Free-Flowing (not) UNIX	12
BSD Loses Some Steam	13
Linus Builds the Missing Piece	14
What's So Great About Linux?	15
Features in Linux	15
OSI Open Source Definition	16
Vibrant Communities	18
Major Software Projects	19
Linux Myths, Legends, and FUD.	20
Can You Stop Worrying About Viruses?	20
Will You Be Sued for Using Linux?	21
Can Linux Really Run on Everything from Handhelds to Supercomputers?	22
Will Linux Crush Microsoft?	23
Are You on Your Own If You Use Linux?	23
Is Linux Only for Geeks?	23
How Do Companies Make Money with Linux?	24
How Different Are Linux Distributions from One Another?	25
Is the Linux Mascot Really a Penguin?	25
Getting Started with Linux.	26
Summary.	27

Chapter 2: Running Commands from the Shell. 29

Starting a Shell	30
Using the Shell Prompt	30
Using a Terminal Window	31
Using Virtual Terminals	32

Choosing Your Shell	32
Using bash (and Earlier sh) Shells	33
Using tcsh (and Earlier csh) Shells.	33
Using ash	34
Using ksh	34
Using zsh	34
Exploring the Shell	34
Checking Your Login Session	35
Checking Directories and Permissions	36
Checking System Activity	37
Exiting the Shell	38
Using the Shell in Linux	39
Locating Commands	40
Rerunning Commands	42
Connecting and Expanding Commands	48
Creating Your Shell Environment	51
Configuring Your Shell	51
Using Shell Environment Variables.	55
Managing Background and Foreground Processes.	59
Working with the Linux File System	61
Creating Files and Directories	63
Moving, Copying, and Deleting Files	70
Using the vi Text Editor	70
Starting with vi	71
Moving Around the File	74
Searching for Text	74
Using Numbers with Commands	75
Summary.	76

Chapter 3: Getting into the Desktop 77

Understanding Your Desktop	77
Starting the Desktop	78
K Desktop Environment	82
Using the KDE Desktop	82
Managing Files with the Konqueror File Manager	86
Configuring Konqueror Options	92
Managing Windows	95
Configuring the Desktop.	97
Adding Application Launchers and MIME Types.	99
The GNOME Desktop	100
Using the Metacity Window Manager	102
Using the GNOME panels	103
Using the Nautilus File Manager	108
Changing GNOME Preferences	110
Exiting GNOME	113

Configuring Your Own Desktop	114
Configuring X	115
Choosing a Window Manager	118
Choosing Your Personal Window Manager	120
Getting More Information.	121
Summary	121

Part II: Running the Show

123

Chapter 4: Learning Basic Administration 125

Graphical Administration Tools	125
Using Web-Based Administration	126
Graphical Administration with Different Distributions.	127
Using the root Login.	131
Becoming Root from the Shell (su Command)	132
Allowing Limited Administrative Access.	133
Exploring Administrative Commands, Configuration Files, and Log Files	134
Administrative Commands	134
Administrative Configuration Files	135
Administrative Log Files	139
Using sudo and Other Administrative Logins	140
Administering Your Linux System	142
Creating User Accounts.	143
Adding Users with useradd	143
Setting User Defaults	147
Configuring Hardware.	149
Managing Removable Hardware	150
Working with Loadable Modules	153
Managing File Systems and Disk Space	155
Mounting File Systems	158
Using the mkfs Command to Create a File System	165
Adding a Hard Disk	166
Checking System Space	168
Monitoring System Performance	170
Summary	171

Chapter 5: Getting on the Internet 173

Connecting to the Network.	173
Connecting via Dial-Up Service	174
Connecting a Single Computer to Broadband	175
Connecting Multiple Computers to Broadband	176
Connecting Servers.	177
Connecting Other Equipment	179

Using Ethernet Connections to the Internet	180
Configuring Ethernet During Installation.	180
Configuring Ethernet from the Desktop	181
Using Network Configuration GUI.	181
Identifying Other Computers (Hosts and DNS)	183
Understanding Your Internet Connection	185
Using Dial-up Connections to the Internet	187
Getting Information.	188
Setting Up Dial-Up PPP	189
Creating a Dial-Up Connection with the Internet Configuration Wizard.	189
Launching Your PPP Connection	192
Launching Your PPP Connection on Demand	192
Checking Your PPP Connection	193
Summary	194

Chapter 6: Securing Linux 195

Linux Security Checklist	196
Finding Distribution-Specific Security Resources.	198
Finding General Security Resources	199
Using Linux Securely	199
Using Password Protection	199
Choosing Good Passwords	200
Using a Shadow Password File	201
Using Log Files	203
The Role of Syslogd.	206
Redirecting Logs to a Loghost with syslogd.	207
Understanding the messages Log File	208
Using Secure Shell Tools	209
Starting the ssh Service	209
Using the ssh, sftp, and scp Commands	210
Using ssh, scp, and sftp Without Passwords	212
Securing Linux Servers	213
Controlling Access to Services with TCP Wrappers	213
Understanding Attack Techniques	216
Protecting Against Denial of Service Attacks	217
Protecting Against Distributed DOS Attacks.	220
Protecting Against Intrusion Attacks.	224
Securing Servers with SELinux	227
Protecting Web Servers with Certificates and Encryption	228
Using Security Tools Linux Distributions.	239
Summary	239

Part III: Choosing and Installing a Linux Distribution 241

Chapter 7: Installing Linux 243

Choosing a Linux Distribution	244
Linux at Work	244
Other Distributions	245
Getting Your Own Linux Distribution	245
Finding Another Linux Distribution	246
Understanding What You Need	246
Downloading the Distribution	247
Burning the Distribution to CD	248
Exploring Common Installation Topics	249
Knowing Your Computer Hardware	249
Upgrading or Installing from Scratch	250
Dual Booting with Windows or Just Linux?	251
Using Installation Boot Options	252
Partitioning Hard Drives	253
Using LILO or GRUB Boot Loaders	262
Configuring Networking	271
Configuring Other Administrative Features	272
Installing from the Linux Bible CD or DVD	273
Summary	273

Chapter 8: Running Fedora Core and Red Hat Enterprise Linux . . . 275

Digging into Features	277
Red Hat Installer (Anaconda)	277
RPM Package Management	278
Kudzu Hardware Detection	278
Red Hat Desktop Look-and-Feel	279
System Configuration Tools	279
Going Forward with Fedora Core	279
Growing Community Support for Fedora	280
Fedora Extras	280
Fedora Legacy Project	281
Forums and Mailing Lists	282
Listening to the People at Red Hat	282
Listening to the Red Hat Community	283
Installing Fedora Core	285
Choosing Computer Hardware	285
Choosing an Installation Method	287
Choosing to Install or Upgrade	288
Beginning the Installation	289
Running Fedora Setup Agent	296
Summary	297

Chapter 9: Running Debian GNU/Linux 299

Inside Debian GNU/Linux	300
Debian Packages	300
Debian Package Management Tools	301
Debian Releases	303
Getting Help with Debian	303
Installing Debian GNU/Linux	304
Hardware Requirements and Installation Planning	304
Running the Installer	306
Managing Your Debian System	311
Configuring Network Connections	311
Package Management Using APT	314
Package Management Using dpkg	318
Installing Package Sets (Tasks) with Tasksel	320
Alternatives, Diversions, and Stat Overrides	320
Managing Package Configuration with debconf	322
Summary	323

Chapter 10: Running SUSE Linux 325

Understanding SUSE	326
What's in SUSE	327
Installation and Configuration with YaST	327
RPM Package Management	330
Automated Software Updates	331
Getting Support for SUSE	332
Installing OpenSUSE	332
Before You Begin	333
Starting Installation	334
Starting with SUSE	338
Summary	339

Chapter 11: Running KNOPPIX 341

KNOPPIX News	341
KNOPPIX Features	342
Understanding KNOPPIX	342
Looking Inside KNOPPIX	342
What's Cool About KNOPPIX	344
Examining Challenges with KNOPPIX	346
Seeing Where KNOPPIX Comes From	347
Exploring Uses for KNOPPIX	347
Starting KNOPPIX	349
Getting a Computer	349
Booting KNOPPIX	350
Correcting Boot Problems	350

Using KNOPPIX	354
Using the KDE Desktop in KNOPPIX	355
Getting on the Network	356
Installing Software in KNOPPIX	357
Saving Files in KNOPPIX	357
Keeping Your KNOPPIX Configuration	360
Restarting KNOPPIX	361
Summary	362
Chapter 12: Running Yellow Dog Linux.	363
Understanding Yellow Dog Linux	363
Going Forward with Yellow Dog	365
Digging into Yellow Dog.	366
Installing Yellow Dog Linux.	367
Hardware Support	368
Planning Your Installation	369
Beginning the Installation	371
Rebooting Your Linux Mac	378
Updating Yellow Dog Linux.	378
Running Mac Applications with Mac-on-Linux.	379
Support Options	380
Summary	381
Chapter 13: Running Gentoo Linux	383
Understanding Gentoo	383
Gentoo's Open Source Spirit.	384
The Gentoo Community	385
Building, Tuning, and Tweaking Linux	385
Where Gentoo Is Used	386
What's in Gentoo	387
Managing Software with Portage	388
Finding Software Packages.	389
Installing Gentoo.	390
Getting Gentoo	390
Starting Gentoo Installation	391
Summary	398
Chapter 14: Running Slackware Linux	399
Getting into Slackware	399
Characterizing the Slackware Community	401
The Slackware Creator	401
Slackware Users.	403
Slackware Internet Sites	403
Challenges of Using Slackware.	404
Using Slackware as a Development Platform.	405

Installing Slackware	405
Getting Slackware	406
New Features in Slackware 10.2	406
Hardware Requirements	407
Starting Installation	407
Starting with Slackware	412
Summary	414
Chapter 15: Running Linspire	415
Overview of Linspire	415
Getting Into Linspire	417
Installing Software with Click-N-Run	417
Other Installation Options	419
Linspire Support and Software	419
Linspire Forums and Information	420
Audio Assistant	420
Installing Linspire Five-0	420
Linspire Hardware Requirements	421
Installing Linspire	421
Summary	423
Chapter 16: Running Mandriva	425
Mandriva Features	426
Exploring Mandriva	427
Mandriva Installer (DrakX)	428
RPM Package Management with RPMDrake	429
Mandriva Control Center	429
The Mandriva Community	430
RPM Repository on Mandrivaclub	430
Mandriva Forums	431
Installing Mandriva Limited Edition	431
The Right Hardware for Mandriva	432
Begin the DrakX Installation	433
Summary	438
Chapter 17: Running Ubuntu Linux	441
Overview of Ubuntu	441
Ubuntu Releases	442
Ubuntu Installer	442
Ubuntu as a Desktop	443
Ubuntu as a Server	445
Ubuntu Spin-Offs	445
Challenges Facing Ubuntu	446
Installing Ubuntu	447

Starting with Ubuntu	451
Trying Out the Desktop	452
Adding More Software	453
Getting More Information About Ubuntu	456
Summary	457
Chapter 18: Running a Linux Firewall/Router.	459
Understanding Firewalls	460
Protecting Desktops with Firewalls	461
Starting Your Firewall in Red Hat Linux	461
Configuring a Firewall in Mandriva	463
Using Firewalls with iptables.	464
Starting with iptables.	465
Using iptables to Do SNAT or IP Masquerading	470
Adding Modules with iptables.	471
Using iptables as a Transparent Proxy	472
Using iptables for Port Forwarding	473
Making a Coyote Linux Bootable Floppy Firewall	474
Creating a Coyote Linux Firewall	474
Building the Coyote Linux Floppy	475
Running the Coyote Linux Floppy Firewall	481
Managing the Coyote Linux Floppy Firewall.	482
Using Other Firewall Distributions	483
Summary	484
Chapter 19: Running Bootable Linux Distributions	485
Overview of Bootable Linux Distributions	485
Choosing a Bootable Linux.	486
Security and Rescue Bootables	487
Multimedia Bootables	492
Tiny Desktops	494
Damn Small Linux.	495
Special Purpose Bootables	498
Customizing a Bootable Linux	499
Summary	501

Part IV: Running Applications

503

Chapter 20: Playing Music and Video.	505
Playing Digital Media and Obeying the Law	505
Copyright Protection Issues	506
Exploring Codecs	508
Playing Music	510
Setting Up Audio Cards.	510
Choosing an Audio CD Player	512

Using MIDI Audio Players	521
Performing Audio File Conversion and Compression	521
Recording and Ripping Music	525
Creating an Audio CD with cddr	525
Ripping CDs with Grip	526
Creating CD Labels with cddr	528
Working with TV, Video, and Digital Imaging	529
Watching TV with Tvtime	530
Video Conferencing with GnomeMeeting	531
Watching Movies and Video	534
Watching Video with xine	534
Using Helix Player and RealPlayer 10	538
Using a Digital Camera with Gtks and gPhoto2	538
Downloading Digital Photos with Gtks	541
Using Your Camera as a Storage Device	542
Summary	543

Chapter 21: Working with Words and Images. 545

Using OpenOffice.org	546
Other Word Processors	548
Using StarOffice	548
Using AbiWord	549
Using KOffice	550
Getting Away from Windows	551
Using Traditional Linux Publishing Tools	552
Creating Documents in Groff or LaTeX	553
Text Processing with Groff	555
Text Processing with TeX/LaTeX	565
Converting Documents	569
Building Structured Documents	571
Printing Documents in Linux	575
Printing to the Default Printer	575
Printing from the Shell	575
Checking the Print Queues	576
Removing Print Jobs	577
Checking Printer Status	577
Displaying Documents with ghostscript and Acrobat	578
Using the ghostscript and gv Commands	578
Using Adobe Acrobat Reader	578
Working with Graphics	580
Manipulating Images with The GIMP	580
Acquiring Screen Captures	581
Modifying Images with KPaint	582
Using Scanners Driven by SANE	583
Summary	583

Chapter 22: E-Mailing and Web Browsing 585

Using E-Mail	585
Choosing an E-Mail Client	585
Getting Here from Windows	587
Getting Started with E-Mail	588
Tuning Up E-Mail	589
Reading E-Mail with Mozilla Mail	590
Managing E-Mail in Evolution	595
Getting Thunderbird	598
Working with Text-Based E-Mail Readers	598
Choosing a Web Browser	601
Web Browsing with Mozilla	602
Using Mozilla's Other Components	602
Using Text-Based Web Browsers	612
Running the Firefox Web Browser	613
Summary	618

Chapter 23: Gaming with Linux 619

Overview of Linux Gaming	619
Basic Linux Gaming Information.	620
Where to Get Information About Linux Gaming.	620
Choosing a Video Card for Gaming	622
Basic X Window Games	624
GNOME Games	624
KDE Games.	626
Chess Games	627
Freeciv	629
PlanetPenguin Racer (TuxRacer)	634
Commercial Linux Games.	635
Playing Commercial Linux Games	636
id Software Games	637
Playing TransGaming and Cedega Games	638
Loki Software Game Demos	640
Summary	644

Part V: Running Servers**645****Chapter 24: Running a Linux, Apache, MySQL, and PHP (LAMP) Server. 647**

Components of a LAMP Server	648
Apache	648
MySQL	648
PHP	649

Setting Up Your LAMP Server	650
Installing Apache	650
Installing PHP	651
Installing MySQL	652
Operating Your LAMP Server	654
Editing Your Apache Configuration Files.	654
Adding a Virtual Host to Apache	657
User Content and the UserDir Setting	658
Installing a Web Application: Coppermine Photo Gallery	659
Troubleshooting	663
Configuration Errors	663
Access Forbidden and Server Internal Errors	665
Securing Your Web Traffic with SSL/TLS	666
Generating Your Keys	668
Configuring Apache to Support SSL/TLS.	670
Summary	671
Chapter 25: Running a Mail Server	673
Internet E-Mail's Inner Workings.	673
About the System and the Software Used	675
Preparing Your System	676
Configuring DNS for Direct Delivery	676
Configuring for Retrieval from a Mail Host	678
Installing and Configuring the Mail Server Software	678
Installing Exim and Courier	678
Installing ClamAV and SpamAssassin.	680
Testing and Troubleshooting.	682
Checking Logs	683
Common Errors (and How to Fix Them).	684
Configuring Mail Clients	687
Configuring Fetchmail	687
Configuring Web-Based Mail.	688
Securing Communications with SSL/TLS	688
Summary	690
Chapter 26: Running a Print Server	691
Common UNIX Printing Service	692
Setting Up Printers	693
Using Web-Based CUPS Administration	693
Using the Red Hat Printer Configuration Window	696
Working with CUPS Printing	705
Configuring the CUPS Server (cupsd.conf)	705
Starting the CUPS Server.	706
Configuring CUPS Printer Options Manually	707

Using Printing Commands	708
Printing with lpr	708
Listing Status with lpc	709
Removing Print Jobs with lprm	709
Configuring Print Servers.	710
Configuring a Shared CUPS Printer	710
Configuring a Shared Samba Printer	712
Summary	714

Chapter 27: Running a File Server 715

Setting Up an NFS File Server	716
Getting NFS	718
Sharing NFS File Systems.	718
Using NFS File Systems.	723
Unmounting NFS File Systems.	729
Other Cool Things to Do with NFS	729
Setting Up a Samba File Server.	730
Getting and Installing Samba	731
Configuring Samba with SWAT	732
Working with Samba Files and Commands	742
Using Samba Shared Directories	745
Troubleshooting Your Samba Server	746
Summary	749

Part VI: Programming in Linux

751

Chapter 28: Programming Environments and Interfaces 753

Understanding Programming Environments	754
Using Linux Programming Environments.	754
The Linux Development Environment	755
Graphical Programming Environments	764
The Command-Line Programming Environment	768
Linux Programming Interfaces	770
Creating Command-Line Interfaces	770
Creating Graphical Interfaces	776
Application Programming Interfaces	778
Summary	782

Chapter 29: Programming Tools and Utilities 785

The Well-Stocked Toolkit	785
Using the GCC Compiler	787
Compiling Multiple Source Code Files	788
GCC Command-Line Options	791
Automating Builds with make	792

Library Utilities	795
The nm Command	796
The ar Command	797
The ldd Command	798
The ldconfig Command	799
Environment Variables and Configuration Files	799
Source Code Control	800
Source Code Control Using RCS	800
Source Code Control with CVS	803
Debugging with GNU Debugger	807
Starting GDB	808
Inspecting Code in the Debugger	810
Examining Data	811
Setting Breakpoints	813
Working with Source Code	814
Summary	815
Appendix A: Media	817
Finding Linux Distributions on the DVD	817
Fedora Core 4 Linux	818
SUSE Linux	818
KNOPPIX Linux	818
Slackware 10.1	818
Ubuntu 5.1	819
Finding Linux Distributions on the CD	819
Debian GNU/Linux	819
Gentoo Linux	819
Damn Small Linux	820
Inside Security Rescue Toolkit	820
System Rescue CD	820
Coyote Linux	820
Slax	821
Linux Distributions Not on the DVD or CD	821
Creating Linux CDs	821
Appendix B: Entering the Linux Community	825
General Linux Sites	825
Linux Distributions	827
Companies and Groups Supporting Linux	828
Major Linux Projects	829
Linux User Groups	829
Index	831
GNU General Public License	873
