

CONTENTS

Preface

Chapter One: INTRODUCTORY CONCEPTS

1.1	Groups, Loops and S-loops	7
1.2	Semigroups and S-semigroups	11
1.3	Groupoids and S-groupoids	13
1.4	Rings, S-rings and S-NA-rings	19
1.5	Semirings, S-semirings and S-semivector spaces	35
1.6	Near-rings and S-near-rings	43
1.7	Vector spaces and S-vector spaces	62

Chapter Two: BIGROUPS AND SMARANDACHE BIGROUPS

2.1	Bigroups and its properties	67
2.2	S-bigroups and its properties	78

Chapter Three: BISEMIGROUPS AND SMARANDACHE BISEMIGROUPS

3.1	Bisemigroups and its applications	87
3.2	Biquasigroups and its properties	96
3.3	S-bisemigroups and S-biquasigroups and its properties	99

Chapter Four: BILOOPS AND SMARANDACHE BILOOPS

4.1	Biloops and its properties	105
4.2	S-biloops and its properties	112

Chapter Five: BIGROUPOIDS AND SMARANDACHE BIGROUPOIDS

5.1	Bigroupoids and its properties	117
5.2	S-bigroupoids and its properties	124
5.3	Applications of bigroupoids and S-bigroupoids	130
5.4	Direct product of S-automaton	134

Chapter Six: BIRINGS AND SMARANDACHE BIRINGS

6.1	Birings and its properties	137
6.2	Non associative birings	153
6.3	Smarandache birings and its properties	166

Chapter Seven: BISEMIRINGS, S-BISEMIRINGS, BISEMIVECTOR SPACES AND S-BISEMIVECTOR SPACES

7.1	Bisemirings and its properties	175
7.2	Non associative bisemirings and its properties	180
7.3	S-bisemirings and its properties	183
7.4	Bisemivector spaces and S-bisemivector spaces	190

Chapter Eight: BINEAR-RING SMARANDACHE BINEAR-RINGS

8.1	Binear-rings and Smarandache binear-rings	195
8.2	S-binear-rings and its generalizations	207
8.3	Generalizations, Smarandache analogue and its applications	218

Chapter Nine: BISTRUCTURES, BIVECTOR SPACES AND THEIR SMARANDACHE ANALOGUE

9.1	Bistructure and S-bistructure	231
9.2	Bivector spaces and S-bivector spaces	233

Chapter Ten: SUGGESTED PROBLEMS 241
