

Contents

1	Introduction	5
2	Jacobi-type Algorithms and Cyclic Coordinate Descent	8
2.1	Algorithms	8
2.1.1	Jacobi and Cyclic Coordinate Descent	9
2.1.2	Block Jacobi and Grouped Variable Cyclic Coordinate Descent	10
2.1.3	Applications and Examples for 1-dimensional Optimization	12
2.1.4	Applications and Examples for Block Jacobi	22
2.2	Local Convergence Analysis	23
2.3	Discussion	31
3	Refining Estimates of Invariant Subspaces	32
3.1	Lower Unipotent Block Triangular Transformations	33
3.2	Algorithms	37
3.2.1	Main Ideas	37
3.2.2	Formulation of the Algorithm	40
3.2.3	Local Convergence Analysis	44
3.2.4	Further Insight to Orderings	48
3.3	Orthogonal Transformations	52
3.3.1	The Algorithm	57
3.3.2	Local Convergence Analysis	59
3.3.3	Discussion and Outlook	62
4	Rayleigh Quotient Iteration, QR-Algorithm, and Some Generalizations	63
4.1	Local Cubic Convergence of RQI	64

4.2	Parallel Rayleigh Quotient Iteration or Matrix-valued Shifted QR-Algorithms	69
4.2.1	Discussion	72
4.3	Local Convergence Properties of the Shifted QR-Algorithm . .	73
