Abstract	I
Table of Contents	II
Preface	VII
Acknowledgement	XII
1 Peano Space and Graßmann-Cayley Algebra	1
1.1 Normed space – normed algebra	2
1.2 Hilbert space, quadratic space – classical Clifford algebra	3
1.3 Weyl space – symplectic Clifford algebras (Weyl algebras)	4
1.4 Peano space – Graßmann-Cayley algebras	5
1.4.1 The bracket	6
1.4.2 The wedge product – join	7
1.4.3 The vee-product – meet	8
1.4.4 Meet and join for hyperplanes and co-vectors	11
2 Basics on Clifford algebras	15
2.1 Algebras recalled	15
2.2 Tensor algebra, Graßmann algebra, Quadratic forms	17
2.3 Clifford algebras by generators and relations	20
2.4 Clifford algebras by factorization	22
2.5 Clifford algebras by deformation – Quantum Clifford algebras	22
2.5.1 The Clifford map	23
2.5.2 Relation of $\mathcal{C}(V, g)$ and $\mathcal{C}(V, B)$	25
2.6 Clifford algebras of multivectors	25
2.7 Clifford algebras by cliffordization	27
2.8 Dotted and un-dotted bases	29
2.8.1 Linear forms	29
2.8.2 Conjugation	30
2.8.3 Reversion	30

3	Graphical calculi	33
3.1	The Kuperberg graphical method	33
3.1.1	Origin of the method	33
3.1.2	Tensor algebra	34
3.1.3	Pictographical notation of tensor algebra	37
3.1.4	Some particular tensors and tensor equations	38
3.1.5	Duality	41
3.1.6	Kuperberg's Lemma 3.1.	41
3.2	Commutative diagrams versus tangles	42
3.2.1	Definitions	42
3.2.2	Tangles for knot theory	45
3.2.3	Tangles for convolution	47
4	Hopf algebras	49
4.1	Algebras	50
4.1.1	Definitions	50
4.1.2	A -modules	54
4.2	Co-algebras	55
4.2.1	Definitions	55
4.2.2	C -comodules	57
4.3	Bialgebras	58
4.3.1	Definitions	58
4.4	Hopf algebras i.e. antipodal bialgebras	61
4.4.1	Morphisms of connected co-algebras and connected algebras : group like convolution	61
4.4.2	Hopf algebra definition	63
5	Hopf gebras	65
5.1	Cup and cap tangles	66
5.1.1	Evaluation and co-evaluation	66
5.1.2	Scalar and co-scalar products	68
5.1.3	Induced graded scalar and co-scalar products	68
5.2	Product co-product duality	70
5.2.1	By evaluation	70
5.2.2	By scalar products	71
5.3	Cliffordization of Rota and Stein	75
5.3.1	Cliffordization of products	75
5.3.2	Cliffordization of co-products	77
5.3.3	Clifford maps for any grade	78
5.3.4	Inversion formulas	79
5.4	Convolution algebra	80

5.5	Crossing from the antipode	82
5.6	Local versus non-local products and co-products	85
5.6.1	Kuperberg Lemma 3.2. revisited	85
5.6.2	Interacting and non-interacting Hopf gebras	87
6	Integrals, meet, join, unipotents, and ‘spinorial’ antipode	91
6.1	Integrals	91
6.2	Meet and join	93
6.3	Crossings	96
6.4	Convolutive unipotents	97
6.4.1	Convolutive ‘adjoint’	98
6.4.2	A square root of the antipode	99
6.4.3	Symmetrized product co-product tangle	100
7	Generalized cliffordization	101
7.1	Linear forms on $\wedge V \times \wedge V$	101
7.2	Properties of generalized Clifford products	103
7.2.1	Units for generalized Clifford products	104
7.2.2	Associativity of generalized Clifford products	105
7.2.3	Commutation relations and generalized Clifford products	107
7.2.4	Laplace expansion i.e. product co-product duality implies exponentially generated bilinear forms	108
7.3	Renormalization group and Z -pairing	109
7.3.1	Renormalization group	109
7.3.2	Renormalized time-ordered products as generalized Clifford products	111
8	(Fermionic) quantum field theory and Clifford Hopf gebra	115
8.1	Field equations	116
8.2	Functionals	117
8.3	Functional equations	121
8.4	Vertex renormalization	122
8.5	Time- and normal-ordering	123
8.5.1	Spinor field theory	124
8.5.2	Spinor quantum electrodynamics	125
8.5.3	Renormalized time-ordered products	127
8.6	On the vacuum structure	128
8.6.1	One particle Fermi oscillator, $U(1)$	128
8.6.2	Two particle Fermi oscillator, $U(2)$	130

A	CLIFFORD and BIGEBRA packages for Maple	137
A.1	Computer algebra and Mathematical physics	137
A.2	The CLIFFORD Package – rudiments of version 5	139
A.3	The BIGEBRA Package	143
A.3.1	&cco – Clifford co-product	144
A.3.2	&gco – Graßmann co-product	144
A.3.3	&gco_d – dotted Graßmann co-product	145
A.3.4	&gpl_co – Graßmann Plücker co-product	146
A.3.5	&map – maps products onto tensor slots	146
A.3.6	&t – tensor product	146
A.3.7	&v – vee-product, i.e. meet	147
A.3.8	bracket – the Peano bracket	148
A.3.9	contract – contraction of tensor slots	148
A.3.10	define – Maple define, patched	149
A.3.11	drop_t – drops tensor signs	149
A.3.12	EV – evaluation map	149
A.3.13	gantipode – Graßmann antipode	149
A.3.14	gco_unit – Graßmann co-unit	150
A.3.15	gswitch – graded (i.e. Graßmann) switch	151
A.3.16	help – main help-page of BIGEBRA package	151
A.3.17	init – init procedure	151
A.3.18	linop/linop2 – action of a linear operator on a Clifford polynom	151
A.3.19	make_BI_Id – cup tangle need for &cco	152
A.3.20	mapop/mapop2 – action of an operator on a tensor slot	152
A.3.21	meet – same as &v (vee-product)	152
A.3.22	pairing – A pairing w.r.t. a bilinear form	152
A.3.23	peek – extract a tensor slot	152
A.3.24	poke – insert a tensor slot	153
A.3.25	remove_eq – removes tautological equations	153
A.3.26	switch – ungraded switch	153
A.3.27	tcollect – collects w.r.t. the tensor basis	153
A.3.28	tsolve1 – tangle solver	153
A.3.29	VERSION – shows the version of the package	154
A.3.30	type/tensorbasmonom – new Maple type	154
A.3.31	type/tensormonom – new Maple type	154
A.3.32	type/tensorpolynom – new Maple type	155
	Bibliography	156
