

# CONTENTS

Preface	v
Syllabus	
Important Conversion/Formula	

## **Part– A: Thermodynamics (40 Marks)**

1. Fundamental concepts, definitions and zeroth law	1
2. First law of thermodynamics	30
3. Second law	50
4. Introduction of I.C. engines	65
5. Properties of steam and thermodynamics cycle	81

## **Part – B: Engineering Mechanics (40 Marks)**

6. Force : Concurrent Force system	104
7. Force : Non Concurrent force system	141
8. Force : Support Reaction	166
9. Friction	190
10. Application of Friction: Belt Friction	216
11. Law of Motion	242
12. Beam	265
13. Trusses	302

## **Part – C: Strength of Materials (20 Marks)**

14. Simple stress and strain	331
15. Compound stress and strains	393
16. Pure bending of beams	409
17. Torsion	432

## **Appendix**

1. Appendix Tutorials Sheets	448
2. Lab Manual	474
3. Previous year question papers (New syllabus)	503
