

Table of Contents

Chapter 1 Introduction

Chapter 2 Means and Variances

- 2.1 Mean (Expectation) and Variance of a Random Variable
- 2.2 Covariance and Correlation Coefficient
- 2.3 Mean and Variance of a Sum of Random Variables
- 2.4 Mean and Variance of a Product of Two Random Variables
- 2.5 Mean and Variance of a Quotient of Two Random Variables
- 2.6 Conditional Mean and Variance for Jointly Distributed
Random Variables
- 2.7 Conditional Mean of a Constrained Random Variable
- 2.8 Mean and Variance of the Sum of a Random Number of
Random Variables
- 2.9 Mean of a Function of a Random Variable
- 2.10 Approximations for the Mean and Variance of a Function of a
Random Variable
- 2.11 Mean and Variance of the Maximum of Exponentially Distributed
Random Variables
- 2.12 Mean and Variance of the Maximum of Normally Distributed
Random Variables

Chapter 3 Discrete Probability Distributions

- 3.1 Bernoulli Distribution
- 3.2 Binomial Distribution
- 3.3 Geometric Distribution
- 3.4 Negative Binomial Distribution
- 3.5 Poisson Distribution
- 3.6 Hypergeometric Distribution
- 3.7 Multinomial Distribution

Chapter 4 Continuous Probability Distributions

- 4.1 Uniform Distribution
- 4.2 Exponential Distribution
- 4.3 Erlang Distribution
- 4.4 Gamma Distribution

- 4.5 Beta Distribution
- 4.6 Normal Distribution
 - 4.6.1 Sum of Normally Distributed Random Variables
 - 4.6.2 Standard Normal Distribution
 - 4.6.3 Partial Moments for the Normal Distribution
 - 4.6.4 Approximations for the Cumulative Normal Distribution Function
- 4.7 Lognormal Distribution
- 4.8 Weibull Distribution
- 4.9 Logistic Distribution
- 4.10 Gumbel (Extreme Value) Distribution
- 4.11 Pareto Distribution
- 4.12 Triangular Distribution

Chapter 5 Probability Relationships

- 5.1 Distribution of the Sum of Independent Random Variables
- 5.2 Distribution of the Maximum and Minimum of Random Variables
 - 5.2.1 Example for the Uniform Distribution
 - 5.2.2 Example for the Exponential Distribution
- 5.3 Change of Variable in a Probability Distribution
- 5.4 Conditional Probability Distribution for a Constrained Random Variable
- 5.5 Combination of Poisson and Gamma Distributions
- 5.6 Bayes' Formula
- 5.7 Central Limit Theorem
- 5.8 Probability Generating Function (z -Transform)
- 5.9 Moment Generating Function
- 5.10 Characteristic Function
- 5.11 Laplace Transform

Chapter 6 Stochastic Processes

- 6.1 Poisson Process and Exponential Distribution
 - 6.1.1 Properties of the Poisson Process
 - 6.1.2 "Lack of Memory" Property of the Exponential Distribution
 - 6.1.3 Competing Exponentials
 - 6.1.4 Superposition of Independent Poisson Processes
 - 6.1.5 Splitting of a Poisson Process

- 6.1.6 Arrivals from a Poisson Process in a Fixed Interval
- 6.2 Renewal Process Results
 - 6.2.1 Mean and Variance of Number of Arrivals in a Renewal Process
 - 6.2.2 Distribution of First Interval in a Renewal Process
- 6.3 Markov Chain Results
 - 6.3.1 Discrete-Time Markov Chains
 - 6.3.2 Continuous-Time Markov Chains

Chapter 7 Queueing Theory Results

- 7.1 Notation for Queue Types
- 7.2 Definitions of Queueing System Variables
- 7.3 Little's Law and General Queueing System Relationships
- 7.4 Extension of Little's Law
- 7.5 Formulas for Average Queue Length L_q
- 7.6 Formulas for Average Time in Queue W_q
- 7.7 References for Formulas for Average Queue Length and Time in Queue
- 7.8 Pollaczek-Khintchine Formula for Average Time in Queue W_q
- 7.9 Additional Formulas for Average Time in Queue W_q
- 7.10 Heavy Traffic Approximation for Distribution of Time in Queue
- 7.11 Queue Departure Process
- 7.12 Distribution Results for Number of Customers in $M/M/1$ Queue
- 7.13 Distribution Results for Time in $M/M/1$ Queue
- 7.14 Other Formulas in Queueing Theory

Chapter 8 Production Systems Modeling

- 8.1 Definitions and Notation for Workstations
- 8.2 Basic Relationships between Workstation Parameters
- 8.3 Distribution of the Time to Produce a Fixed Lot Size at a Workstation
- 8.4 Throughput of a Serial Production Line with Failures
- 8.5 Throughput of a Two-Station Serial Production Line with Variable Processing Times
 - 8.5.1 Two Stations without Buffer
 - 8.5.2 Two Stations with Buffer
- 8.6 Throughput of an N -Station Serial Production Line with Variable Processing Times

Chapter 9 Inventory Control

- 9.1 Economic Order Quantity (EOQ)
- 9.2 Economic Production Quantity (EPQ)
- 9.3 “Newsboy Problem”: Optimal Inventory to Meet Uncertain Demand in a Single Period
- 9.4 Inventory Replenishment Policies
- 9.5 (s, Q) Policy: Estimates of Reorder Point (s) and Order Quantity (Q)
- 9.6 (s, S) Policy: Estimates of Reorder Point (s) and Order-Up-To Level (S)
- 9.7 (T, S) Policy: Estimates of Review Period (T) and Order-Up-To Level (S)
- 9.8 (T, s, S) Policy: Estimates of Review Period (T), Reorder Point (s), and Order-Up-To Level (S)
- 9.9 Summary of Results for Inventory Policies
- 9.10 Inventory in a Production/Distribution System
- 9.11 A Note on Cumulative Plots

Chapter 10 Distance Formulas for Logistics Analysis

- 10.1 “Traveling Salesman Problem” Tour Distance: Shortest Path through a Set of Points in a Region
- 10.2 Distribution of Distance between Two Random Points in a Circle
- 10.3 Average Rectangular Grid Distance between Two Random Points in a Circle
- 10.4 Great Circle Distance

Chapter 11 Linear Programming Formulations

- 11.1 General Formulation
- 11.2 Terminology
- 11.3 Example of Feasible Region
- 11.4 Alternative Formulations
 - 11.4.1 Minimization vs. Maximization
 - 11.4.2 Equality Constraints
 - 11.4.3 Reversed Inequality Constraints
- 11.5 Diet Problem
- 11.6 Duality
- 11.7 Special Cases of Linear Programming Problems

- 11.7.1 Transportation Problem
 - 11.7.2 Transshipment Problem
 - 11.7.3 Assignment Problem
- 11.8 Integer Linear Programming Formulations
 - 11.8.1 Knapsack Problem
 - 11.8.2 Traveling Salesman Problem
- 11.9 Solution Methods
 - 11.9.1 Simplex Method
 - 11.9.2 Interior-Point Methods
 - 11.9.3 Network Flow Methods
 - 11.9.4 Cutting Planes
 - 11.9.5 Branch and Bound

Chapter 12 Mathematical Functions

- 12.1 Gamma Function
- 12.2 Beta Function
- 12.3 Unit Impulse Function
- 12.4 Modified Bessel Functions
- 12.5 Stirling's Formula

Chapter 13 Calculus Results

- 13.1 Basic Rules for Differentiation
- 13.2 Integration by Parts
- 13.3 Fundamental Theorem of Calculus
- 13.4 Taylor Series
- 13.5 Maclaurin Series
- 13.6 L'Hôpital's Rule
- 13.7 Lagrange Multipliers
- 13.8 Differentiation under the Integral Sign (Leibnitz's Rule)
- 13.9 Change of Variable in an Integral
- 13.10 Change of Variables in a Double Integral
- 13.11 Changing the Order of Integration in a Double Integral
- 13.12 Changing the Order of Summation in a Double Sum
- 13.13 Numerical Integration

Chapter 14 Matrices

14.1 Rules for Matrix Calculations

14.2 Inverses of Matrices

14.3 Series of Matrices

Chapter 15 Combinatorics

Chapter 16 Summations

16.1 Finite Sums

16.2 Infinite Sums

Chapter 17 Interest Formulas
