

Foreword

Dear, respected readers!

You are looking at the fourth issue in the year 2014 in which you will find ten best submissions, as only the best can find their place in the Croatian Journal of Education. In addition to one professional paper, which we publish regularly so as not to neglect the close ties with educational practice, the issue contains three preliminary papers, five original scientific papers, and one review paper. The section Teaching Methodology and Related Fundamental Sciences selected four papers as did the section on Information-Communication Technology and Other Sciences and Arts, while two articles fall into the section of Basic Educational Sciences. Four papers come from Croatia, while two come from Slovenia, and Turkey respectively. Bosnia and Herzegovina, Serbia and Portugal submitted one paper each. This issue is a presentation of a variety of scientific areas and branches with a sincere focus on education as one of the pillars of people, society and civilization.

In April 2015, the Faculty of Teacher Education, University of Zagreb, our publisher, will be organizing a conference on the topic Researching Paradigms of Childhood and Education, and we are expecting authors, readers and members of the editorial board to join in the effort to best serve what is the most valuable part of man, society, and civilization – the child.

This issue is being published prior to the holiday season and therefore, we wish everyone a Merry Christmas and a lot of personal and professional success in the coming year.

Uvodnik

Poštovani i dragi čitatelji!

Pred vama je 4 izdanje u 2014. godini. I u ovom broju naći ćete deset najboljih priloga jer samo najbolji imaju mesta u Hrvatskom časopisu za odgoj i obrazovanje. Uz jedan stručni rad što tradicionalno objavljujemo ne zaboravljajući tjesnu vezu s odgojno-obrazovnom praksom tu su tri prethodna priopćenja, pet izvornih znanstvenih radova i jedan pregledni rad. Sekcija Metodike i supstratne znanosti je odabrala četiri članka kao i sekcija Informacijsko-komunikacijske i ostale znanosti i umjetnosti, a dva članka su iz sekcije Temeljne odgojno-obrazovne znanosti. Četiri priloga su iz Hrvatske, po dva iz Slovenije i Turske te po jedan Bosne i Hercegovine, Srbije i Portugala. I u ovom broju se očituje raznovrsnost znanstvenih područja i grana ali s istinskom usmjerenošću ka odgoju i obrazovanju jednom od stupova naroda, društva i civilizacije.

Kako nas već u travnju 2015. godine očekuje Konferenciju Učiteljskog fakulteta Sveučilišta u Zagrebu i našeg nakladnika s temom Istraživanja paradigmi djetinjstva, odgoja i obrazovanja, očekujemo da će nam se mnogi autori, čitatelji i članovi uredništva pridružiti u zajedničkim naporima što boljeg služenja najvrjednijem dijelu i naroda i društva i civilizacije – djetetu.

Ovaj broj izlazi uoči blagdana, te stoga čitateljima čestitamo Božić, a u novoj 2015. godini mnogo uspjeha u radu i ostvarenje svih svojih snova.
