

Poštovani čitaoci,

Konferencija Evropskog centra za liderstvo koja će se održati na Bledu krajem maja, predstavljaće izazovan događaj sa fokusom na ono na šta bi evropski lideri trebalo da obrate pažnju kako bi doprineli da Evropa i svet postanu bolji. Kako će evropsko poslovno okruženje izgledati posle ekonomske krize? Kako će pitanja energije i održivosti uticati na razvoj Evrope u budućnosti? Ovo su samo neka od pitanja na koje očekujemo da čujemo odgovore na bledskoj konferenciji gde će časopis InfoReview učestvovati kao medijski partner.

Časopis InfoReview bio je medijski partner i na osmom biznis okruglom stolu sa Vladom Srbije pod nazivom „Nove smernice za ekonomski rast“ na kome je Predsednik Vlade Republike Srbije Mirko Cvetković najavio niz stimulativnih mera za zaustavljanje rasta nezaposlenosti i povećanje privrednih aktivnosti. Takođe, Cvetković je najavio fiskalne stimulanse koji će podstaći rast domaće tražnje i investicije u infrastrukturu i dodao

da će se raditi na podsticanju efikasnosti javnih preduzeća i njihovih ulaganja, za šta će biti date državne garancije.

Predsednik Republike Srbije Boris Tadić najavio je u Srpskoj akademiji nauka i umetnosti da će u narednih nekoliko godina u razvoj naučne i tehnološke infrastrukture u Srbiji biti uloženo blizu pola milijarde evra. Tadić je naglasio da je ulaganje u naučno-tehnološki razvoj jedna od najvažnijih investicija u ekonomski razvoj Srbije, čiji je bitan element zaustavljanje „odliva mozgova“. Prema njegovim rečima, obezbeđivanje investicije u iznosu od 200 miliona evra predstavlja izuzetan doprinos razvoju naše zemlje i govori o drugačijoj vrednosnoj orijentaciji države Srbije.

Srbija je na putu ka stvaranju konkurentne tržišne privrede. Trenutno je orijentisana na poboljšanje efektivnosti svoje ekonomije, što podrazumeva završetak procesa restrukturiranja i privatizacije društvenih i javnih

preduzeća, kao i uvođenje modernih metoda upravljanja, organizacije rada i poslovanja. Kako svojim radom i zalaganjem za dobrobit Srbije doprineti unapređenju poslovnog okruženja, bilo je pitanje u anketi časopisa InfoReview, a neke od odgovora možete pronaći i na stranicama u ovom izdanju.

S poštovanjem,
Dubravka Dukić

Dear readers,

The conference of the European Leadership Centre, which will be held in Bled in late May, will be a challenging event focusing on what European leaders should bear in mind to make a difference and contribute to a better Europe and a better world. How will the European business environment look after the crisis? How will energy and sustainability issues influence the future development of Europe? These are just some of the questions we expect to hear answers to on the conference in Bled, where InfoReview magazine will participate as a media partner.

InfoReview magazine was the media partner at the Eight Business Round Table with the Government of Serbia, which was held under the name "New Direction for Growth", where the Serbian Prime Minister Mirko Cvetković announced series of stimulative measures for reducing the growth of unemployment and raising economic activities. Cvetković

also announced fiscal incentives which will encourage the growth of domestic demand and attract investments in infrastructure, and added that the focus will also be on the promotion of efficiency of public enterprises and their investments, for which will be given state guarantees.

President of the Republic of Serbia, Boris Tadić, announced at the Serbian Academy of Sciences and Arts that over the next few years around half a billion Euros will be invested in the development of scientific and technological infrastructure in Serbia. Tadić highlighted at the ceremony that these are among the key investments in Serbia's economic development, because in order to achieve such development, Serbia must stop the 'brain drain'. According to him, securing an investment of EUR 200 million is an extraordinary contribution to Serbia's development and it testifies that Serbia is committed to different value orientation.

Serbia is on the way of creating a competitive market economy. Its current focus is on the improvement of the effectiveness of its economy, which includes the completion of the process of restructuring and privatisation of social and public enterprises, as well as implementation of modern management, work, and business organization methods. "How do you contribute to the improvement of the business environment with your business operation and advocacy of the welfare of Serbia?" was the InfoReview's survey question, and some of the answers you can read in this issue.

Sincerely,
Dubravka Dukić
