

# Preface

---

Investment in the Federal Republic of Yugoslavia is one of series of booklets published by KPMG, to provide information to those interested in considering investing or doing business in various countries. This publication has been prepared by KPMG Yugoslavia. It covers relevant areas, but it is not designed to provide detailed information necessary to make investment decisions. Its purpose is to provide some general guidelines on investment and business in Yugoslavia. The information presented in this publication is carefully chosen to reflect the situation as at November 1996. Considering the speed with which the economic situation is changing, there is a need for further advice before making specific decisions.

The package of economic laws, adopted by the Federal Parliament confirms the strategy towards more oriented market economy and developing a high degree of compatibility with the standards in the European Union countries. It should be taken in to consideration that Yugoslav legislation system is still going through changes and it is likely that many amendments will be made.

Further information on matters discussed in this publication may be obtained by contacting KPMG Yugoslavia in Belgrade.
