Josephine Chau, Hidde P. van der Ploeg, and Adrian Bauman

(Review)

Physical activity prevalence in Australian children and adolescents:

Why do different surveys provide so different estimates, and what can we do about it? 135-145

Clayton L. Camic, Chelsea J. Hahn, Benjamin C. Hendrickson, and Andrew R. Jagim

(Original scientific paper)

Validation of the physical working capacity at the fatigue threshold treadmill test 146-152

Asier Los Arcos, Raúl Martínez-Santos, Javier Yanci, and Alberto Mendez-Villanueva

(Original scientific paper)

Monitoring perceived respiratory and muscular exertions and physical fitness

in young professional soccer players during a 32-week period 153-160

André Luiz Torres Pirauá, Natália Barros Beltrão, Camila Ximenes Santos,
Ana Carolina Rodarti Pitangui, and Rodrigo Cappato de Araújo

(Original scientific paper)

Analysis of muscle activity during the bench press exercise performed

with the pre-activation method on stable and unstable surfaces 161-168

Todd C. Shoepke, Gustavo Vejarano, Nathan P. Reyes, Nicole M. Gobreial, and Jeanette M. Ricci

(Original scientific paper)

Volume estimations for combined free-weight and rubber-band resistance exercise 169-177

Jonathan Sinclair, Lindsay Bottoms, Paul John Taylor, and Khizar Mahmood

(Original scientific paper)

Effects of shoes on kinetics and kinematics of the squash forward lunge in male players 178-184

Gibson Moreira Praça, Filipe Manuel Clemente, André Gustavo Pereira de Andrade,
Juan Carlos Perez Morales, and Pablo Juan Greco

(Original scientific paper)

Network analysis in small-sided and conditioned soccer games:

The influence of additional players and playing position 185-193

Thierry Debanne and Guillaume Laffaye

(Original scientific paper)

Effects of game location, quality of opposition, number of foreign players and anthropometric characteristics in elite handball games 194-201

Yi-Liang Kuo and Yves Shen-Feng Liu

(Original scientific paper)

The foot posture index between elite athletic and sedentary college students 202-207

Rafael Santos Neves, Agnaldo José Lopes, Sara Lucia Silveira de Menezes, Tatiana Rafaela de Lemos Lima, Arthur de Sá Ferreira, and Fernando Silva Guimarães

(Original scientific paper)

Hand grip strength in healthy young and older Brazilian adults: Development of a linear prediction model using simple anthropometric variables 208-216

Hakan Kolayış, İhsan Sarı, and Nurullah Çelik

(Original scientific paper)

Parent-initiated motivational climate and self-determined motivation in youth sport: How should parents behave to keep their child in sport? 217-224

Miguel-Ángel Gómez, Rasa Kreivyte, and Jaime Sampaio

(Original scientific paper)

Short- and long-term effects of using shooting straps on free throw accuracy of young female basketball players 225-234

Reza Abdollahipour and Rudolf Psotta

(Original scientific paper)

Is an external focus of attention more beneficial than an internal focus to ball catching in children? 235-241

Daniel Mayorga-Vega, Maribel Parra Saldías, and Jesús Viciano

(Original scientific paper)

Comparison of moderate-to-vigorous physical activity levels between physical education, school recess and after-school time in secondary school students: An accelerometer-based study 242-251

Željko Pedišić, Dorothea Dumuid, and Timothy S. Olds

(Commentary)

Integrating sleep, sedentary behaviour, and physical activity research in the emerging field of time-use epidemiology: Definitions, concepts, statistical methods, theoretical framework, and future directions 252-269

Philip Edward Kearney

(Letter to the Editor)

Enhancing practice through gradual increases in contextual interference 270-272

Jared Porter

(Response)

Practicing with gradual increases in contextual interference: Methods for testing the predictions of the parallel development hypothesis 273-275

Guidelines for contributors 276-279
