

Contents

Preface vii

Introduction 1

1

Guidelines for Safe Training 23

2

Basic Physical Fitness	1
Health-related Fitness	2
The Energy Continuum	2
Weight Training vs Weight Lifting	4
<i>Subclasses of Weight Lifting</i>	
<i>Body Building</i>	
Fact and Fiction	6
<i>Myth 1: Weight Training Injures Joints</i>	
<i>Myth 2: Weight Training Depresses</i> <i>Growth and Development</i>	
<i>Myth 3: Loss of Flexibility, Speed, and</i> <i>Coordination</i>	
<i>Myth 4: Women Hypertrophy as much</i> <i>as Men</i>	
<i>Myth 5: Muscle Turns to Fat</i>	
<i>Myth 6: Spot Reduction</i>	
<i>Other Myths and Misconceptions</i>	
Advantages and Disadvantages of Weight Training	14
<i>Enhances Strength, Local Endurance,</i> <i>Flexibility, and Relaxation</i>	
<i>Increases Aerobic Capacity?</i>	
<i>Decreases Body Fat?</i>	
<i>Reduces Cardiovascular Disease Risk?</i>	
Emphasis for the Beginning Weight Trainer	18
Summary	20
Preliminary Guidelines	23
<i>Medical Clearance</i>	
<i>Adequate Sleep and Diet</i>	
<i>Dress for Safety</i>	
<i>Be Aware of Individual Differences</i>	
<i>Be Aware of Body Position</i>	
<i>Avoid Horseplay</i>	

Training Guidelines	28
---------------------	----

<i>Warm Up and Cool Down</i>	
<i>Check Equipment</i>	
<i>Use Spotters</i>	
<i>Choose a Low Resistance and Use Logical Progressions</i>	
<i>Use Lower Body Muscles in Lifting</i>	
<i>Bend Knees and Contract Abdominals when Standing</i>	
<i>Stress the Form, Not the Weight</i>	
<i>Breathe Continuously</i>	

Summary	39
---------	----

Exercise and System Classifications 41

3

Isometric Exercise	41
Isotonic Exercise	43

<i>Concentric versus Eccentric Movements</i>	
<i>Constant Load Isotonic Exercise</i>	
<i>Dynamic Accommodating Resistance</i>	
<i>Plyometric Training</i>	
<i>Speed Resistance Training</i>	

Isokinetic Exercise	51
Summary	54

How Muscles Work and Adapt 55

4

Cardiac, Smooth, and Skeletal Muscle	55
Skeletal Muscle Makeup	57

Actin and Myosin

How Muscles Work	60
------------------	----

<i>Filaments Slide during Contraction</i>	
<i>The Sequence of Events in Muscle Contraction</i>	

Muscle Control, Integration, and Communication	60
--	----

Connections that Provide for Voluntary Control

<i>The Cerebellum Conductor</i>	
<i>Receptors for Regulating Length and Tension</i>	
<i>Reciprocal Innervation</i>	

How Muscles Adapt	69
-------------------	----

<i>Hypertrophy vs Atrophy</i>	
<i>Hyperplasia?</i>	
<i>Skeletal Muscle Fiber Types</i>	
<i>Adaptations to Training</i>	
<i>Muscle Soreness</i>	

Fundamental Training Principles

87

5

Muscles in Action 79

Body Lever Systems

Basic Hand Positions

Active Movements

Summary 84

Total Program Balance 87

Program Variables 88

Mode

Intensity

Duration

Frequency

Guidelines for Developing and
Maintaining Fitness 93

Designing Your Aerobic Fitness Program

Weight Training Program Balance 96

*Anterior-Posterior and Superior-Inferior
Balance*

Fundamental Training Principles 99

*Full Range of Motion (FROM) Principle
Homeostasis*

The Overload Principle

Principle of Reversibility

Principle of Specificity

Principle of Individuality

Periodization or Cyclic Training 104

Volume

Base Phase

Load Phase

Peak Phase

Taper Phase

Recovery or Off-Season Phase

Summary 108

Beginning Weight Training 111

6

Weight Training Program Design and
Emphasis 111

The Basic Dozen 112

Program Design for the Basic Dozen

Workout Frequency

Exercise Sets

*Resistance, Repetition Schedules,
and Rest Intervals*

Lower Body Exercises	117
<i>Squat (1a)</i>	
<i>Front Squat (1b)</i>	
<i>Leg Press (1c)</i>	
<i>Leg Extension (2a)</i>	
<i>Lunge (2b)</i>	
<i>Leg Curl (3a)</i>	
<i>Lunge (3b)</i>	
<i>Calf Raise (4a and b)</i>	
Upper Body Exercises	140
<i>Bench Press (5a)</i>	
<i>Supine Chest Fly (5b)</i>	
<i>Upright Row (6a)</i>	
<i>Parallel Dip (6b)</i>	
<i>Military Press (7a)</i>	
<i>Behind-the-Neck Press (7b)</i>	
<i>Lat Pull (8a)</i>	
<i>Bent-over Row (8b)</i>	
<i>Pull-up (8c)</i>	
<i>Triceps Extension (9)</i>	
<i>Biceps Curl (10)</i>	
<i>Back Extension (11)</i>	
<i>Sit-up (12)</i>	
Summary	180
A Medical Screening	183
B Waiver Form	187
C Basic Dozen Warm-up/Cool-down Routine	189
D Safe Maximum Testing	197
E Predicting Maximum Lifts	201
F Muscles Worked by Intermediate and Advanced Exercises	205
G Selected Competitive Lifts	207
H Intermediate and Advanced Program Designs	211
I Circuit Weight Training	215
J Androgenic-Anabolic Steroids	217
K Association and Equipment Company Directory	221
