	Introduction	xv
<i>Chapter 1</i>	Common Oracle Functions: A Function Review	1
	Calling Simple SQL Functions	3
	Numeric Functions	4
	Common Numerical Manipulation Functions	4
	Near Value Functions	7
	Null Value Function	10
	Log and Exponential Functions	12
	Ordinary Trigonometry Functions	14
	Hyperbolic Trig Functions	16
	String Functions	18
	The INSTR Function	18
	The SUBSTR Function	20
	The REPLACE Function	23
	The TRIM Function	24
	Date Functions	27
<i>Chapter 2</i>	Reporting Tools in Oracle's SQL*Plus	31
	COLUMN	32
	Formatting Numbers	35
	Scripts	39
	Formatting Dates	41
	BREAK	43
	COMPUTE	45
	Remarks in Scripts	48
	TTITLE and BTITLE	49
	References	52

Chapter 3 The Analytical Functions in Oracle (Analytical Functions I) 53

- What Are Analytical Functions? 53
- The Row-numbering and Ranking Functions 55
- The Order in Which the Analytical Function Is Processed in the SQL Statement 65
 - A SELECT with Just a FROM Clause 66
 - A SELECT with Ordering 66
 - A WHERE Clause Is Added to the Statement 67
 - An Analytical Function Is Added to the Statement 67
 - A Join Is Added to the Statement 68
 - The Join Without the Analytical Function 69
 - Adding Ordering to a Joined Result. 70
 - Adding an Analytical Function to a Query that Contains a Join (and Other WHERE Conditions) 71
 - The Order with GROUP BY Is Present 72
 - Adding Ordering to the Query Containing the GROUP BY 73
 - Adding an Analytical Function to the GROUP BY with ORDER BY Version 74
 - Changing the Final Ordering after Having Added an Analytical Function. 75
 - Using HAVING with an Analytical Function 76
- Where the Analytical Functions Can be Used in a SQL Statement 77
- More Than One Analytical Function May Be Used in a Single Statement 78
- The Performance Implications of Using Analytical Functions 80
- Nulls and Analytical Functions 86
- Partitioning with PARTITION_BY. 95
- A Problem that Uses ROW_NUMBER for a Solution 96
- NTILE 101
- RANK, PERCENT_RANK, and CUME_DIST. 105
- References 110

Chapter 4	Aggregate Functions Used as Analytical Functions (Analytical Functions II)	111
	The Use of Aggregate Functions in SQL	111
	RATIO-TO-REPORT	115
	Windowing Subclauses with Physical Offsets in Aggregate Analytical Functions	120
	An Expanded Example of a Physical Window	127
	Displaying a Running Total Using SUM as an Analytical Function	131
	UNBOUNDED FOLLOWING	134
	Partitioning Aggregate Analytical Functions	135
	Logical Windowing	137
	The Row Comparison Functions — LEAD and LAG	143
	LAG and LEAD Options	146
Chapter 5	The Use of Analytical Functions in Reporting (Analytical Functions III)	149
	GROUP BY	150
	Grouping at Multiple Levels	155
	ROLLUP	157
	CUBE	160
	GROUPING with ROLLUP and CUBE	162
Chapter 6	The MODEL or SPREADSHEET Predicate in Oracle's SQL	165
	The Basic MODEL Clause	166
	Rule 1. The Result Set	169
	Rule 2. PARTITION BY	169
	Rule 3. DIMENSION BY	170
	Rule 4. MEASURES	170
	RULES that Use Other Columns	174
	RULES that Use Several Other Rows to Compute New Rows	178
	RETURN UPDATED ROWS	183
	Using Comparison Operators on the LHS	184
	Adding a Summation Row — Using the RHS to Generate New Rows Using Aggregate Data	186
	Summing within a Partition	189

Aggregation on the RHS with Conditions on the
Aggregate 191

Revisiting CV with Value Offsets — Using Multiple
MEASURES Values 193

Ordering of the RHS 198

AUTOMATIC versus SEQUENTIAL ORDER 202

The FOR Clause, UPDATE, and UPSERT 206

Iteration 211

 A Square Root Iteration Example 214

References 221

Chapter 7 **Regular Expressions: String Searching and**

Oracle 10g 223

 A Simple Table to Illustrate an RE 225

 REGEXP_INSTR 226

 A Simple RE Using REGEXP_INSTR 230

 Metacharacters 231

 Brackets 237

 Ranges (Minus Signs) 239

 REGEXP_LIKE 239

 Negating Carets 241

 Bracketed Special Classes 243

 Other Bracketed Classes 246

 The Alternation Operator 247

 Repetition Operators — aka “Quantifiers” 248

 More Advanced Quantifier Repeat Operator

 Metacharacters — *, %, and ? 251

 REGEXP_SUBSTR 253

 Empty Strings and the ? Repetition Character 258

 REGEXT_REPLACE 259

 Grouping 261

 The Backslash (\) 262

 The Backslash as an Escape Character 263

 Alternative Quoting Mechanism in Oracle 10g 264

 Backreference 265

 References 267

Chapter 8	Collection and OO SQL in Oracle	269
	Associative Arrays.	270
	The OBJECT TYPE — Column Objects	273
	CREATE a TABLE with the Column Type in It	274
	INSERT Values into a Table with the Column Type in It	275
	Display the New Table (SELECT * and SELECT by Column Name).	275
	COLUMN Formatting in SELECT	277
	SELECTing Only One Column in the Composite.	277
	SELECT with a WHERE Clause	278
	Using UPDATE with TYPEed Columns.	278
	Create Row Objects — REF TYPE.	279
	Loading the “row object” Table	281
	UPDATE Data in a Table of Row Objects	283
	CREATE a Table that References Our Row Objects.	284
	INSERT Values into a Table that Contains Row Objects (TCRO).	284
	UPDATE a Table that Contains Row Objects (TCRO)	285
	SELECT from the TCRO — Seeing Row Addresses	286
	DEREF (Dereference) the Row Addresses.	286
	One-step INSERTs into a TCRO	287
	SELECTing Individual Columns in TCROs.	288
	Deleting Referenced Rows.	289
	The Row Object Table and the VALUE Function	291
	Creating User-defined Functions for Column Objects.	292
	VARRAYs	297
	CREATE TYPE for VARRAYs	299
	CREATE TABLE with a VARRAY	300
	Loading a Table with a VARRAY in It — INSERT VALUES with Constants	301
	Manipulating the VARRAY	302
	The TABLE Function.	303
	The VARRAY Self-join	305

Contents

	The THE and VALUE Functions	306
	The CAST Function	308
	Using PL/SQL to Create Functions to Access Elements	311
	Creating User-defined Functions for VARRAYs.	320
	Nested Tables	324
	Summary	334
	References	335
<i>Chapter 9</i>	SQL and XML	337
	What Is XML?	338
	Displaying XML in a Browser	342
	SQL to XML	344
	Generating XML from “Ordinary” Tables	344
	XML to SQL	347
	References	355
<i>Appendix A</i>	String Functions	357
<i>Appendix B</i>	Statistical Functions	371
	Index	392
