Contents

1 Introduction 1

2 Event Management in Supply Networks 5

2.1 Problem 5
2.1.1 Event-related Information Logistics 5
2.1.2 Supply Networks 9
2.1.3 Formal Specification of the Problem 14
2.2 Requirements of an Event Management Solution 17
2.2.1 General Requirements 19
2.2.2 Functional Requirements 20
2.2.3 Data Requirements 22
2.2.4 Implications 24
2.3 Potential Benefits 24
2.3.1 Benefits for Single Enterprises 24
2.3.2 Analysis of Supply Network Effects 27
2.3.3 Benefits for Supply Networks 30
2.3.4 Summary on Potential Benefits 32
2.4 Existing Approaches 34
2.4.1 Tracking Systems 34
2.4.2 SCEM Software 39
2.4.3 Conclusion on Existing Approaches 47

3 Information Base for Event Management 49

3.1 Data Model 49
3.1.1 Representation of the Supply Network Domain 49
3.1.2 Aggregation and Refinement of Status Data 57
3.1.3 Disruptive Event Data for Decision Support 61
3.1.4 Extendable Data Structures 64
3.2 Semantic Interoperability 65
3.2.1 Requirements for Semantic Interoperability 65
3.2.2 Existing Approaches 68
3.2.3 Ontology for Supply Network Event Management 70

3.3 Data Sources 74
3.3.1 Data Bases 75
3.3.2 Internet Sources and Web Services 78
3.3.3 Radio Frequency Identification Technologies 82

4 Event Management Functions 87

4.1 Information Gathering in Supply Networks 87
4.1.1 Trigger Events 88
4.1.2 Inter-organizational Information Gathering 89
4.2 Proactive and Flexible Monitoring 96
4.2.1 Critical Profiles 97
4.2.2 Discovery of Critical Profiles 100
4.2.3 Continuous Assessment of Critical Profiles 105
4.3 Analysis and Interpretation of Event Data 113
4.3.1 Basic Approach 113
4.3.2 Data Interpretation with Fuzzy Logic 115
4.3.3 Aggregated Order Status 116
4.3.4 Assessment of Disruptive Events 120
4.3.5 Adjustment of Milestone Plans 122
4.4 Distribution of Event Data 127
4.4.1 Alert Management Process 128
4.4.2 Alert Decision Management 129
4.4.3 Escalation Management 133
4.4.4 Selection of Recipient and Media Type 136
4.4.5 Selection of Content 139
4.5 Event Management Process 141
4.5.1 Event Management Functions 141
4.5.2 Distributed Event Management in Supply Networks 143

5 Agent-based Concept 145

5.1 Software Agents and Supply Network Event Management 145
5.1.1 Introduction to Software Agents 145
5.1.2 Benefits of Agent Technology for Event Management 149
5.1.3 Related Work in Agent Technologies 151
5.2 Agent Oriented Software Engineering 154
5.2.1 Approaches 154
5.2.2 AUML for Supply Network Event Management 157
5.3 Agent Society for Supply Network Event Management 161
5.3.1 Roles and Agent Types 161
5.3.2 Agent Interactions 166

5.3.3 Institutional Agreements . . . 173
5.4 Coordination Agent . . . 175
5.4.1 Structure . . . 175
5.4.2 Behaviors . . . 176
5.4.3 Interactions . . . 181
5.5 Surveillance Agent . . . 182
5.5.1 Structure . . . 182
5.5.2 Behaviors . . . 184
5.5.3 Interactions . . . 188
5.6 Discourse Agent . . . 189
5.6.1 Structure . . . 189
5.6.2 Behaviors . . . 190
5.6.3 Interactions . . . 193
5.7 Wrapper Agent . . . 195
5.7.1 Structure . . . 195
5.7.2 Behaviors . . . 196
5.7.3 Interactions . . . 198
6 Prototype Implementations . . . 201
6.1 Generic Prototype . . . 201
6.1.1 Overview . . . 202
6.1.2 Ontology Integration . . . 206
6.1.3 Coordination Agent . . . 211
6.1.4 Surveillance Agent . . . 217
6.1.5 Discourse Agent . . . 222
6.1.6 Wrapper Agent . . . 224
6.2 Supply Network Testbed . . . 226
6.2.1 Simulated Enterprise Data Base . . . 226
6.2.2 Simulator . . . 227
6.3 Industry Showcase . . . 229
6.3.1 Overview . . . 229
6.3.2 Coordination Agent . . . 231
6.3.3 Surveillance Agent . . . 236
6.3.4 Wrapper Agent . . . 240
7 Evaluation . . . 243
7.1 Concept . . . 243
7.1.1 Constraints to an Evaluation . . . 243
7.1.2 Multi-dimensional Evaluation . . . 244

7.2 Analytical Evaluation . . . 248
7.2.1 Effects of SNEM Cycles . . . 248
7.2.2 Costs of Event Management . . . 250
7.2.3 Cost-Benefit-Model and Benchmarks . . . 253
7.2.4 Supply Network Effects . . . 258
7.2.5 Event Management with Profiles . . . 259
7.2.6 Conclusions . . . 266
7.3 Experimental Evaluation . . . 267
7.3.1 Reaction Function . . . 267
7.3.2 Experimental Results . . . 270
7.3.3 Cost-Benefit Analysis . . . 273
7.3.4 Conclusions . . . 275
7.4 Showcase Evaluation . . . 276
7.4.1 Prototype Assessment . . . 276
7.4.2 Analysis of Follow-up Costs . . . 278
7.4.3 Conclusions . . . 282
7.5 Summary - Benefits and Constraints . . . 283
8 Conclusions and Outlook . . . 287
8.1 Supply Network Event Management . . . 287
8.2 Further Research Opportunities . . . 289
8.2.1 Object Chips for Supply Network Event Management . . . 290
8.2.2 Event Management in other Domains . . . 292
8.2.3 Integration and Acceptance Issues . . . 292
Appendices . . . 295
References . . . 309
