Introduction

An Introduction to the Book Samples

Part I: Getting Started

Chapter 1. Introduction to Ajax

The XML DOM

Measuring the Benefits.

Chapter 2. The Request

An In-Depth Look at XMLHttpRequest

Creating the Object

Asynchronous Data Transfers

The Ready State.

HTTP Status Codes and Headers.

Chapter 3. The Response

XML

JSON

Chapter 4. Rendering the Response with XHTML and CSS.

XHTML

CSS.

Part II: Creating and Using the JavaScript Engine

Chapter 5. Object-Oriented JavaScript

Object-Oriented Approaches

Using the new Operator.

Literal Notation

Associative Arrays

JScript.NET

Object Constructors.

Prototypes.

Chapter 6. Creating the Engine

Creating a Custom Ajax Wrapper

Creating an Ajax Updater.

Chapter 7. Using the Engine

Getting Started

Making a Request

Engine Methods and Properties

Chapter 8. Debugging

The JavaScript onerror Event

<u>responseText</u>

IE Developer Toolbar

Safari Enhancer

<u>FireBug</u>

Chapter 9. Extending the Engine

Creating a Utilities Object

Handling Status Codes with an HTTP Object

Part III: Creating Reusable Components

Chapter 10. Accordion

Getting Started

Creating the Accordion Object

Panel Functionality and Data Display.

Chapter 11. Tree View.

Structuring the Data

Handling the Response

Rendering the GUI

Chapter 12. Client-Side Validation

Getting Started

Creating a Validation Object

The Server Side.

Chapter 13. Data Grid

Getting Started

Creating a DataGrid Object

Displaying the Data

Part IV: Ajax Patterns.

Chapter 14. Singleton Pattern

An Overview of the Singleton Pattern

Creating an Object Using the Singleton Pattern

Using the Singleton Object

Chapter 15. Model View Controller.

An Overview of the Pattern

Creating the Pattern

Using the Pattern

Chapter 16. The Observer Pattern

Pattern Overview

Creating an Error-Handling Object

Using the Error-Handling Object

Chapter 17. Data Reflection Pattern

An Overview.

Creating the Pattern

Chapter 18. Interaction Patterns.

Creating a History with Cookies

Drag and Drop.

Chapter 19. Usability Patterns.

Handling Feedback, Errors, and Warnings.

Part V: Server-Side Interaction

Chapter 20. Understanding Ajax Database Interaction

Connecting with PHP

Chapter 21. Interacting with a Database: The Server-Side

Connecting to ASP.NET.

Connecting to ColdFusion

Chapter 22. Advanced Ajax Database Interaction

Bulk Updates

Server-Side XML and JSON.

Part VI: Finishing Touches

Chapter 23. Securing Your Application

Security Holes

Password-Protecting Ajax Requests

Verifying Passwords on the Server-Side

Chapter 24. Best Practices

Using the Engine
