

# DATA RECOVERY BOOK V1.0

## FOREWORD

---

The core of information age is the information technology, while the core of the information technology consists in the information process and storage. Along with the rapid development of the information and the popularization of the personal computer, people find information more and more useful and need it ever more than the past. Owing to the massive data, there is a huge challenge to the data storage technology. So how to save so many documents and how to visit document as fast as possible become the key point. We know we need storage devices to save data, while there are so many kinds of storage devices and modes to save data. What's more, when saving the data and information, it is more important to ensure the storage security as well as the accuracy, usability, reliability of data. Often, what is invaluable is that invisible data.
