

Contents

1	Introduction	13
1.1	How the Book Works	15
1.2	An Outline of the Book	16
1.3	Service After the Sale	17
1.4	Supplements	18
1.5	Acknowledgments	18
2	Getting Started	19
2.1	Download the Practice Files	19
2.2	In the Beginning Was the Command Line	20
2.3	Do You Need to Install Ruby?	22
2.4	Installing Ruby	22
2.5	Your Two Basic Tools	23
2.6	Prompts, Command Lines, Prompts, and irb	24
2.7	It's Time to Make Mistakes	26
I	The Basics	29
3	A First Script: Comparing File Inventories	30
3.1	A Script in Action	30
3.2	The Ruby Universe	31
3.3	Objects Send and Receive Messages	31
3.4	Variables Name Objects	33
3.5	Comparing Arrays	34
3.6	Printing to the Screen	35
3.7	Making a Script	36
3.8	Where Do We Stand?	38
3.9	Exercises	38

4	Ruby Facts: Arrays	39
5	Three Improvements and a Bug Fix	43
5.1	Command-line Arguments	43
5.2	Ignoring Case	45
5.3	Methods	49
5.4	Dissecting Strings	51
5.5	Fixing a Bug	53
5.6	Where Do We Stand?	55
5.7	Prelude to the Exercises	56
5.8	Exercises	58
6	Ruby Facts: If, Equality Testing, and Unless	61
6.1	if . . . elsif . . . else	61
6.2	When Are Objects Equal?	63
6.3	A Shorthand Version of if	63
6.4	unless	64
6.5	The Question Mark Operator	64
II	Growing a Script	66
7	The Churn Project: Writing Scripts without Fuss	67
7.1	The Project	67
7.2	Building a Solution	69
7.3	Where Do We Stand?	91
7.4	Exercises	91
8	Ruby Facts: Booleans	94
8.1	Other Boolean Operators	94
8.2	Precedence	94
8.3	Every Object Is a Truth Value	96
8.4	Boolean Expressions Can Select Objects	96
9	Our Friend, the Regular Expression	98
9.1	Regular Expressions Match Strings	99
9.2	Dissecting Strings with Regular Expressions	101
9.3	Reordering an Array	102
9.4	Where Do We Stand?	104
9.5	Exercises	104

10 Ruby Facts: Regular Expressions	106
10.1 Special Characters	106
10.2 Grouping and Alternatives	108
10.3 Taking Strings Apart	108
10.4 Variables Behind the Scenes	109
10.5 Regular Expression Options	109
10.6 Wait, There's More.	110
10.7 Exercises	110
 11 Classes Bundle Data and Methods	 112
11.1 Classes Define Methods	115
11.2 Objects Contain Data	116
11.3 Where Do We Stand?	120
11.4 Exercises	121
 12 Ruby Facts: Classes (with a Side Order of Symbols)	 126
12.1 Defining Accessors	126
12.2 Self	129
12.3 Class Methods	133
12.4 Class Variables and Globals	136
12.5 Exercises	136
 III Working in a World Full of People	 138
 13 Scraping Web Pages with Regular Expressions	 139
13.1 Treating Web Pages Like Files	140
13.2 Restricting Attention to Part of the Page	142
13.3 Plucking Out the Title and Authors	144
13.4 Hashes Store Named Data	146
13.5 Taking the Trip	147
13.6 Exercise Yourself	149
 14 Other Ways of Working with Web Applications	 152
14.1 Handling XHTML	152
14.2 Driving the Browser	154
14.3 Direct Access to Underlying Protocols	155

15 Working with Comma-Separated Values	158
15.1 The CSV Library	159
15.2 Using Blocks for Automatic Cleanup	159
15.3 More CSV Operations	160
15.4 Applying It All to affinity-trip.rb	160
15.5 Discovering and Understanding Classes in the Standard Library	161
15.6 Replacing Code with Data	163
16 Ruby Facts: Hashes	166
17 Ruby Facts: Argument Lists	169
17.1 Optional Arguments	169
17.2 Rest Arguments	170
17.3 Keyword Arguments	171
18 Downloading Helper Scripts and Applications	174
18.1 Finding Packages	174
18.2 Using setup.rb	175
18.3 Using RubyGems	176
18.4 Understanding What You've Downloaded	178
19 A Polished Script	180
19.1 The Load Path	181
19.2 Avoiding Filename Clashes	181
19.3 Avoiding Class Name Clashes Using Modules	182
19.4 A Script to Do the Work for You	184
19.5 Working Without Stepping on Yourself	187
19.6 The rakefile	188
19.7 Location-independent Tests	191
19.8 Exercises	193
20 Ruby Facts: Modules	195
20.1 Nested Modules	196
20.2 Including Modules	197
20.3 Classes Are Modules	199

21 When Scripts Run into Problems	201
21.1 Use Exceptions to Report Problems	202
21.2 An Error-handling Strategy	202
21.3 Your Exception-handling Options	204
21.4 Methods That Use Blocks	208
21.5 Exercises	210
 IV The Accomplished Scripter	 212
22 Frameworks: Scripting by Filling in Blanks	213
22.1 Using the watchdog Script	214
22.2 Inheritance	217
22.3 Gathering User Choices	223
23 Discovery Is Safer Than Creation	230
23.1 The Story of Barker	231
23.2 What Happens Where?	234
23.3 Modules Instead of Superclasses	239
24 Final Thoughts	241
 V The Back of the Book	 243
A Glossary	244
B Solutions to Exercises	256
B.1 Solutions for Chapter 3	256
B.2 Solutions for Chapter 5	258
B.3 Solutions for Chapter 7	261
B.4 Solutions for Chapter 9	265
B.5 Solutions for Chapter 10	269
B.6 Solutions for Chapter 11	270
B.7 Solutions for Chapter 12	281
B.8 Solutions for Chapter 21	286
C Bibliography	288
Index	289
