Acknowledgments	xv
Introduction	xvi
Part I Report Initiation and Source Data	1
Chapter 1 Taking a First Look at Excel's Reporting Tools	3
Why Use Excel for Reports?	3
PivotTable Reports	6
PivotChart Reports	9
Spreadsheet Reports	10
Parameter Queries	13
Web Queries	14
Related Office Components	15
Microsoft MapPoint	16
Microsoft FrontPage	17
Microsoft Access	18
Chapter Review	18
Chapter 2 Getting Started with PivotTables	19
PivotTable Data Organization	19
Creating Your First PivotTable	22
Modifying the PivotTable	27
Removing a Field from a PivotTable	27
Changing the Summary Type	28
Refreshing Report Data	31
Drilling Down on Report Data	34
Basic Components and Terminology	36
PivotTable Areas	37
PivotTable Toolbar	42

PivotTable Field List	43
Terminology	45
Trying It Out in the Real World	45
Getting Down to Business	46
Reviewing What You Did	49
Chapter Review	49
Chapter 3 Understanding and Accessing Source Data	51
Characteristics of a Data Source	52
Types of Data Sources	52
Data Source Locations	53
Authenticating to a Data Source	53
Importing Text Files	53
Delimited Files	54
Fixed-Width Files	59
Creating Data Source Name Files	64
Creating a Data Source for a Text File	65
Setting the Directory	67
Defining the File Format	68
Supporting Files of Text File DSNs	72
Creating a Data Source for an SQL Database	75
Authenticating to the Database	77
Supporting Files of Database DSNs	81
Creating a Data Source for an OLAP Cube	82
Accessing the OLAP Cube	85
Supporting Files of OLAP Cube DSNs	87
Viewing the DSN File for an OLAP Cube	88
Trying It Out in the Real World	88
Getting Down to Business	89
Reviewing What You Did	93
Chapter Review	93
Chapter 4 Using the Query Wizard	93
Overview of the Query Wizard	93
Starting the Wizard	95
Selecting Objects	96
Using Table Options for Object Selection	97
Choosing Fields	99
Filtering Data	101
Using the Wizard to Filter Data	102
Applying Multiple Filters	104
Mathematical Operators	104
String Operators	105
Viewing and Changing Filter Conditions	106
Sorting Data	106
Finishing Up	107
Saving the Query	108
Viewing a Saved Query	109

	Opening a Saved Query	111
	Editing with Microsoft Query	112
	Trying It Out in the Real World	113
	Getting Down to Business	113
	Reviewing What You Did	115
	Chapter Review	116
Chapter 5	Getting Started with Microsoft Query	117
	Introducing the Microsoft Query Program	118
	Starting Microsoft Query	119
	With New Reports	119
	With Existing Reports	121
	Understanding the Basics	122
	Getting to Know the Environment	123
	Customizing the Environment	131
	Working in the Environment	138
	Trying It Out in the Real World	141
	Getting Down to Business	141
	Reviewing What You Did	143
	Chapter Review	143
Chapter 6	Working with SQL in Microsoft Query	145
	Managing the SQL Query	145
	Before You Begin	146
	Working in the Select Part of an SQL Query	147
	Working in the Where and Having Parts	156
	Working in the Order By Part	165
	Managing Table Joins	166
	Before You Begin	167
	Understanding Joins and Join Types	170
	Executing SQL Commands	178
	Managing Tables	179
	Understanding How Microsoft Query Uses SQL	180
	Automatic Query Modification	181
	Hiding an SQL Query	182
	Use Brackets instead of Single Quotes	182
	Criteria Incorrectly Put into the Having Clause	184
	Stored Procedures with Input Parameters	184
	Inserting a Stored Procedure	184
	Using Parameters	185
	Accessing Multiple Databases in a Single Session	188
	Multiple Databases on a Single Server	188
	Multiple Databases on Different Servers	189
	Trying It Out in the Real World	191
	Getting Down to Business	191
	Reviewing What You Did	193
	Chapter Review	194

Part II	Advanced Reporting Features	195
Chapter 7	Designing PivotTable Reports	197
	A Review of the PivotTable Components	198
	Before You Begin	198
	Layout Manager	199
	PivotTable Toolbar	204
	Formatting the PivotTable Report	205
	Auto and Manual Formatting Features	206
	Formatting Options	209
	Preparing the Report for Printing	213
	Designing and Working with Page Area Fields	214
	Sorting	217
	Conditional Formatting	219
	Grouping Items	220
	Managing Inner and Outer Fields	222
	Renaming Fields	226
	Managing How Data Items Are Displayed	227
	Formatting Data Area Fields	227
	Managing PivotTable Functions	229
	Creating Calculated Items and Calculated Fields	229
	Managing Data Area Fields	236
	Trying It Out in the Real World	241
	Getting Down to Business	242
	Reviewing What You Did	244
	Chapter Review	244
Chapter 8	Managing PivotTable Data	245
	Before You Begin	245
	Configuring PivotTable Data Options	247
	Saving Data with the Table Layout	248
	Enable Drill To Details	249
	Refresh On Open	249
	Refresh Every	250
	Save Password	251
	Managing Data Sources	252
	Identifying and Changing Valid Data Sources	252
	Configuring a PivotTable to Share Source Data	255
	Configuring a PivotTable to Use Separate Source Data	256
	Purging Ghost Values	257
	Trying It Out in the Real World	258
	Getting Down to Business	258
	Reviewing What You Did	260
	Chapter Review	260

Chapter 9	Exploring PivotChart Functionality	261
	Before You Begin	262
	Basic Components and Terminology	264
	Creating a PivotChart	264
	Terminology and Display	264
	PivotChart Toolbar	267
	Changing the PivotChart's Location	268
	Field List Window	269
	Formatting the PivotChart	270
	Selecting a Chart Type	270
	Managing the View of 3-D Charts	271
	Formatting the Plot Area	274
	Formatting the Data Series	274
	Working with PivotChart Options	277
	Setting the Chart Title	278
	Configuring the Chart Legend	279
	Adding a Data Table	280
	Trying It Out in the Real World	281
	Getting Down to Business	282
	Reviewing What You Did	284
	Chapter Review	284
Chapter 10	Working with OLAP Cubes	285
	Introducing OLAP	286
	Understanding OLAP Cubes and Data Warehouses	287
	Key OLAP Concepts and Terminology	288
	Client- and Server-Based OLAP Processing	292
	Understanding Server-Based OLAP	292
	Understanding Client-Based OLAP	294
	Working with Server-Based Cubes	296
	Accessing an OLAP Cube on the Analysis Server	296
	Creating and Working with Offline Cube Files	297
	Working with Client-Based OLAP	301
	Option 1 — Retrieving Data on Demand	302
	Option 2 — Retrieving All Data at Once	303
	Option 3 — Saving a Cube File	304
	Security Options Related to Offline Cubes	305
	Using the OLAP Cube Wizard	307
	Working with OLAP Data in a PivotTable	312
	Comparing OLAP and OLTP	312
	Understanding the Display of OLAP Report Fields	313
	Working with Dimensions	314
	Working with Measures	317
	Trying It Out in the Real World	318
	Getting Down to Business	319
	Reviewing What You Did	322
	Chapter Review	322

Chapter 11 Creating and Using Spreadsheet Reports	323
Introducing Spreadsheet Reports	323
Looking at Some Features of Spreadsheet Reports	324
Comparing Spreadsheet Reports to PivotTable Reports	324
A Review of Spreadsheet Report Components	327
Before You Begin	327
Using the Spreadsheet Report Toolbar	329
Managing the Spreadsheet Report	331
Configuring Spreadsheet Report Formatting Options	331
Changing Column Location	334
Using Filters	335
Sorting Data	337
Calculating Subtotals	339
Using Fill-Down Formulas	341
Conditional Formatting	342
Configuring Spreadsheet Report Data Options	343
Using a Web Query	346
Trying a Web Query	346
Working in the Web Query Dialog Box	348
Using a Parameter Query	350
Understanding Parameters	351
Integrating a Parameter into an SQL Query	351
Integrating a Parameter into a View	353
Integrating a Parameter into a Stored Procedure	355
Customizing the Parameters	357
Using Parameters in the Report	358
Trying It Out in the Real World	367
Getting Down to Business	367
Reviewing What You Did	368
Chapter Review	369
 Chapter 12 Using Excel Reports on the Web	 371
The Basics of Publishing Excel Reports to the Web	372
Before You Begin	373
Reviewing the Converted PivotTable List	377
Introducing PivotTable Lists	378
Basic Components and Terminology	381
Using the PivotTable List Toolbar	381
Accessing the PivotTable List Menus	383
Understanding the Terminology and Display of a PivotTable List	384
Dragging Fields to the PivotTable List	386
Using the PivotTable Field List Window	393
Managing the PivotTable List	394
Working with Total Fields	394
Working with Data Fields	402
Exporting Data to Microsoft Excel	406

Formatting the PivotTable List	408
Configuring Display Behavior Options	409
Formatting and Renaming Captions and Fields	411
Trying It Out in the Real World	415
Getting Down to Business	415
Reviewing What You Did	416
Chapter Review	417
Closing Thoughts	417
Part III Appendixes	419
appendix A Configuring Your System	421
Displaying File Extensions	421
Creating the NorthwindCS SQL Database	423
Appendix B SQL Reference	427
Dissecting a Basic SQL Query	428
Working in the Select	428
Working in the From	430
Working in the Where	430
Working with More Sophisticated SQL Queries	431
Dissecting a Sophisticated SQL Query	431
Using String Functions	432
Using Case Logic	434
Using Aggregate Functions	435
Joining Tables	436
Using Operators	437
Sorting the Result Set	439
Appendix Review	440
Index	441
