Introduction	xxiii

CHAPTER 1	Creating a Pivot Table	1
1.1.	Planning a Pivot Table: Getting Started	1
1.2.	Planning a Pivot Table: Accessing the Source Data	2
1.3.	Planning a Pivot Table: Source Data Fields	3
1.4.	Planning a Shared Pivot Table	3
1.5.	Preparing the Source Data: Using an Excel List	5
1.6.	Preparing the Source Data: Excel List Invalid Field Names	7
1.7.	Preparing the Source Data: Using a Filtered Excel List	7
1.8.	Preparing the Source Data: Using an Excel List with Monthly Columns	7
1.9.	Preparing the Source Data: Using an Excel List with Monthly Columns and Text Fields	10
1.10.	Preparing the Source Data: Using an Access Query	11
1.11.	Preparing the Source Data: Using an Access Query with Parameters	11
1.12.	Preparing the Source Data: Using a Text File	12
1.13.	Preparing the Source Data: Using an OLAP Cube	12
1.14.	Preparing the Source Data: Creating an OLAP Cube	13
1.15.	Preparing the Source Data: Using Multiple Consolidation Ranges	13
1.16.	Preparing the Source Data: Alternatives to Using Multiple Consolidation Ranges	14
1.17.	Preparing the Source Data: Setting Up Multiple Consolidation Ranges	14
1.18.	Preparing the Source Data: Benefits of Using Another PivotTable or PivotChart Report	14
1.19.	Preparing the Source Data: Problems Caused by Using Another PivotTable or PivotChart Report	15

1.20. Preparing the Source Data: Page Field Settings When Using Another PivotTable or PivotChart Report.	15
1.21. Connecting to the Source Data: Selecting a Large Range in an Excel List	16
1.22. Connecting to the Source Data: Using Arrow Keys in an Excel List	17
1.23. Connecting to the Source Data: Installing Drivers for External Data	18
1.24. Connecting to the Source Data: Creating a New Source for External Data	19
1.25. Connecting to the Source Data: Excel Hangs When Using External Data	20
1.26. Connecting to the Source Data: Using Pages with Multiple Consolidation Ranges	21
1.27. Understanding PivotTable Options: Table Name.	23
1.28. Understanding PivotTable Options: Table Naming Rules.	23
1.29. Understanding PivotTable Options: Row and Column Grand Totals.	24
1.30. Understanding PivotTable Options: AutoFormat Table.	24
1.31. Understanding PivotTable Options: Subtotal Hidden Page Items	25
1.32. Understanding PivotTable Options: Merge Labels	25
1.33. Understanding PivotTable Options: Merge Labels Formatting	26
1.34. Understanding PivotTable Options: Preserve Formatting	27
1.35. Understanding PivotTable Options: Repeat Item Labels on Each Printed Page.	27
1.36. Understanding PivotTable Options: Page Layout	28
1.37. Understanding PivotTable Options: Fields per Column/Fields per Row	29
1.38. Understanding PivotTable Options: Error Values.	29
1.39. Understanding PivotTable Options: Empty Cells.	30
1.40. Understanding PivotTable Options: Set Print Titles	31
1.41. Understanding PivotTable Options: Mark Totals with *	32
1.42. Understanding PivotTable Options: Save Data with Table Layout.	32
1.43. Understanding PivotTable Options: Enable Drill to Details.	33
1.44. Understanding PivotTable Options: Refresh on Open	34
1.45. Understanding PivotTable Options: Refresh Every <i>n</i> Minutes.	35

1.46. Understanding PivotTable Options: Save Password	35
1.47. Understanding PivotTable Options: Background Query	36
1.48. Understanding PivotTable Options: Optimize Memory	36
1.49. Understanding Pivot Table Layout.	37

■ CHAPTER 2 **Sorting and Grouping Pivot Table Data** 39

2.1. Sorting a Pivot Field: One Row Field.	39
2.2. Sorting a Pivot Field: Outer Row Field	41
2.3. Sorting a Pivot Field: Inner Row Field.	43
2.4. Sorting a Pivot Field: Renamed Numeric Items	44
2.5. Sorting a Pivot Field: New Items Out of Order	44
2.6. Sorting a Pivot Field: Sorting Items Geographically.	45
2.7. Sorting a Pivot Field: Data Source Order	48
2.8. Sorting a Pivot Field When Some Items Won't Sort Correctly	48
2.9. Using Top 10 AutoShow: Specifying Top Items Overall	49
2.10. Using Top 10 AutoShow: Specifying Items Over a Set Amount	49
2.11. Using Top 10 AutoShow: Referring to a Cell Value.	50
2.12. Grouping: Error Message When Grouping Items in a Date Field	50
2.13. Grouping: Error Message When Grouping Items in a Numeric Field	51
2.14. Grouping: Error Message When Grouping Items in a Date Field with No Blanks or Text	52
2.15. Grouping the Items in a Page Field.	52
2.16. Grouping the Items in a Page Field: Using an External Source	52
2.17. Grouping: Incorrect Error Message About Calculated Items	53
2.18. Grouping Text Items	53
2.19. Grouping Dates by Week	53
2.20. Grouping Dates by Fiscal Quarter.	54
2.21. Grouping Renamed Numeric Items	54
2.22. Grouping Months.	55
2.23. Grouping Dates Using the Starting Date	55
2.24. Grouping Dates by Months and Weeks	56
2.25. Grouping the Items in a Pivot Table Based on an Existing Pivot Table	56
2.26. Grouping Dates Outside the Range	56
2.27. Grouping Nonadjacent Items.	57

CHAPTER 3	Calculations in a Pivot Table	59
3.1.	Using Summary Functions	59
3.2.	Using Summary Functions: Default Functions	63
3.3.	Using Summary Functions: Counting Blank Cells	64
3.4.	Using Custom Calculations: Difference From	65
3.5.	Using Custom Calculations: % Of	66
3.6.	Using Custom Calculations: % Difference From	68
3.7.	Using Custom Calculations: Running Total	69
3.8.	Using Custom Calculations: % of Row	71
3.9.	Using Custom Calculations: % of Column	72
3.10.	Using Custom Calculations: % of Total	72
3.11.	Using Custom Calculations: Index	73
3.12.	Using Formulas: Calculated Field vs. Calculated Item	74
3.13.	Using Formulas: Adding Items with a Calculated Item	75
3.14.	Using Formulas: Modifying a Calculated Item	76
3.15.	Using Formulas: Temporarily Removing a Calculated Item	77
3.16.	Using Formulas: Permanently Removing a Calculated Item	77
3.17.	Using Formulas: Using Index Numbers in a Calculated Item	78
3.18.	Using Formulas: Using Relative Position Numbers in a Calculated Item	78
3.19.	Using Formulas: Modifying a Calculated Item Formula in a Cell	79
3.20.	Using Formulas: Creating a Calculated Field	80
3.21.	Using Formulas: Modifying a Calculated Field	80
3.22.	Using Formulas: Temporarily Removing a Calculated Field	81
3.23.	Using Formulas: Permanently Removing a Calculated Field	81
3.24.	Using Formulas: Determining the Type of Formula	82
3.25.	Using Formulas: Adding a Calculated Item to a Field With Grouped Items	82
3.26.	Using Formulas: Calculating the Difference Between Plan and Actual	82
3.27.	Using Formulas: Correcting the Grand Total for a Calculated Field	83
3.28.	Using Formulas: Counting Unique Items in a Calculated Field	83

3.29. Using Formulas: Correcting Results in a Calculated Field	84
3.30. Using Formulas: Listing All Formulas	85
3.31. Using Formulas: Accidentally Creating a Calculated Item	85
3.32. Using Formulas: Solve Order	86

CHAPTER 4 Formatting a Pivot Table 89

4.1. Using AutoFormat: Applying a Predefined Format	89
4.2. Using AutoFormat: Removing an AutoFormat	90
4.3. Using AutoFormat: Applying a Standard Table AutoFormat	90
4.4. Using the Enable Selection Option	91
4.5. Losing Formatting When Refreshing the Pivot Table	92
4.6. Retaining the Source Data Formatting	93
4.7. Hiding Data Errors on Worksheet	94
4.8. Hiding Errors When Printing	94
4.9. Showing Zero in Empty Data Cells	95
4.10. Using Conditional Formatting in a Pivot Table	95
4.11. Creating Custom Number Formats in the Source Data	96
4.12. Totaling Hours in a Time Field	97
4.13. Displaying Hundredths of Seconds in a Pivot Table	97
4.14. Centering Field Labels Vertically	98
4.15. Applying an Indented AutoFormat	98
4.16. Creating an Indented Format	99
4.17. Applying a Tabular AutoFormat	100
4.18. Displaying Subtotals at the Top of a Group	101
4.19. Separating Field Items with Blank Rows	102
4.20. Turning Off Subtotals	102
4.21. Repeating Row Headings	103
4.22. Retaining Formatting for Temporarily Removed Fields	104
4.23. Applying Formatting with the Format Painter	104
4.24. Grouping Dates Based on Source Data Formatting	105
4.25. Changing Alignment for Merged Labels	106
4.26. Displaying Line Breaks in Pivot Table Cells	107
4.27. Showing Only the Top Items	107
4.28. Freezing Heading Rows	108
4.29. Using the Always Display Items Option	108
4.30. Applying Number Formatting to Page Fields	108
4.31. Displaying Hyperlinks	109
4.32. Changing Total Label Text	109

4.33. Changing Subtotal Label Text	110
4.34. Formatting Date Field Subtotal Labels	110
4.35. Showing Additional Subtotals	111
4.36. Showing Subtotals for Inner Fields	111
4.37. Changing the Grand Total Label Text	112
4.38. Changing Labels for Grand Totals	112
4.39. Displaying Grand Totals at Top of Pivot Table	112
4.40. Hiding Grand Totals	113
4.41. Using a Worksheet Template	113
4.42. Displaying Multiple Pivot Tables in a Dashboard	113

■ CHAPTER 5 **Extracting Pivot Table Data** 117

5.1. Using Drill to Details: Extracting Underlying Data	117
5.2. Using Drill to Details: Re-creating Source Data Table	118
5.3. Using Drill to Details: Receiving Error Messages in a Non-OLAP Pivot Table	119
5.4. Using Drill to Details: Receiving the Saved Without Underlying Data Error Message	120
5.5. Using Drill to Details: Formatting	120
5.6. Using Drill to Details: New Sheets Are Not Using the Worksheet Template	121
5.7. Using Drill to Details: Updating Source Data	121
5.8. Using Drill to Details: Outputting Specific Fields	121
5.9. Using Drill to Details: Preventing Sheet Creation	122
5.10. Using Drill to Details: Deleting Created Sheets	122
5.11. Using GetPivotData: Automatically Inserting a Formula	123
5.12. Using GetPivotData: Turning Off Automatic Insertion of Formulas	125
5.13. Using GetPivotData: Referencing Pivot Tables in Other Workbooks	126
5.14. Using GetPivotData: Using Cell References Instead of Text Strings	126
5.15. Using GetPivotData: Using Cell References in an OLAP-Based Pivot Table	129
5.16. Using GetPivotData: Preventing Cell Reference Errors for Data_Field	129
5.17. Using GetPivotData: Preventing Errors in Data_Fields for OLAP-Based Pivot Tables	130
5.18. Using GetPivotData: Extracting Data for Blank Field Items	130

5.19. Using GetPivotData: Preventing Errors for Missing Field Items	131
5.20. Using GetPivotData: Referencing Two Pivot Tables	131
5.21. Using GetPivotData: Preventing Errors for Custom Subtotals	132
5.22. Using GetPivotData: Preventing Errors for Date References	133
5.23. Using GetPivotData: Referring to a Pivot Table	133
5.24. Using Show Pages: Creating Pivot Table Copies	134
5.25. Using Show Pages: Creating Incorrect Sheet Names	135
5.26. Using Show Pages: Not Creating Sheets for All Items	136
5.27. Using Show Pages: Not Formatting New Sheets	137
5.28. Using Show Pages: Enabling the Show Pages Command	137

■ CHAPTER 6 **Modifying a Pivot Table**

6.1. Using Page Fields: Shifting Up When Adding Page Fields	139
6.2. Using Page Fields: Arranging Fields Horizontally	140
6.3. Using Page Fields: Hiding Entries in Page Field Item List	141
6.4. Using Page Fields: Hiding Page Field Items in OLAP-Based Pivot Tables	141
6.5. Using Page Fields: Including Hidden Items in Total	142
6.6. Using Page Fields: Filtering for a Date Range	143
6.7. Using Page Fields: Filtering for Future Dates	143
6.8. Using Data Fields: Changing Content in the Data Area	144
6.9. Using Data Fields: Renaming Fields	144
6.10. Using Data Fields: Changing the “Total” Field Name	145
6.11. Using Data Fields: Arranging Horizontally	146
6.12. Using Data Fields: Restoring Hidden Fields in the Data Field List	146
6.13. Using Data Fields: Fixing Source Data Number Fields	147
6.14. Using Data Fields: Showing the Source Text Instead of the Count	148
6.15. Using Pivot Fields: Adding Comments to Pivot Table Cells	149
6.16. Using Pivot Fields: Showing Detail for Inner Fields	149
6.17. Using Pivot Fields: Showing Detail for All Items in the Selected Field	151
6.18. Using Pivot Fields: Showing Details in OLAP-Based Pivot Tables	151

6.19. Using Pivot Fields: Changing Field Names in the Source Data	152
6.20. Using Pivot Fields: Clearing Old Items from Field Dropdown Lists	152
6.21. Using Pivot Fields: Changing (Blank) Items in Row and Column Fields.....	153
6.22. Using Pivot Items: Showing All Months for Grouped Dates	153
6.23. Using Pivot Items: Showing All Field Items	154
6.24. Using Pivot Items: Hiding Items with No Data	154
6.25. Using Pivot Items: Ignoring Trailing Spaces When Summarizing Data.....	155
6.26. Using a Pivot Table: Deleting the Entire Table.....	155
6.27. Using a Pivot Table: Changing the Automatically Assigned Name	156

■ CHAPTER 7 **Updating a Pivot Table**

7.1. Using Source Data: Locating and Changing the Source Excel List.....	159
7.2. Using Source Data: Automatically Including New Data	161
7.3. Using Source Data: Automatically Including New Data in an External Data Range.....	162
7.4. Using Source Data: Moving the Source Excel List	163
7.5. Using Source Data: Changing the Source Excel List	164
7.6. Using Source Data: Locating the Source Access File	165
7.7. Using Source Data: Trying to Change an OLAP Source.....	166
7.8. Using Source Data: Changing the Data Source Name File.....	166
7.9. Using Source Data: Changing the Source Access File.....	167
7.10. Using Source Data: Changing the Source for a Shared Cache	168
7.11. Using Source Data: Changing the Source CSV File	169
7.12. Refreshing When a File Opens	170
7.13. Preventing a Refresh When a File Opens	171
7.14. Refreshing Every 10 Minutes	171
7.15. Refreshing All Pivot Tables in a Workbook.....	171
7.16. Reenabling the Refreshing External Data Message.....	172
7.17. Problems Obtaining Data When Refreshing	173
7.18. Stopping a Refresh in Progress.....	174
7.19. New Data Doesn't Appear When Refreshing an OLAP Cube	174

7.20. Refreshing an OLAP Cube Causes Client Safety Options Error Message	174
7.21. Refreshing Pivot Tables with the Same Pivot Cache	175
7.22. Refreshing Part of a Pivot Table	175
7.23. Enabling Automatic Refresh	176
7.24. Refreshing a Pivot Table on a Protected Sheet	176
7.25. Refreshing Automatically When Data Changes	177
7.26. Refreshing When Two Tables Overlap	177
7.27. Refreshing Creates an Error Message After Fields Are Deleted	178
7.28. Refreshing Pivot Tables After Queries Have Been Executed	178
7.29. Refreshing Creates a Too Many Row or Column Items Error Message	179
7.30. Refreshing a Scenario Pivot Table	179

■ CHAPTER 8 **Securing a Pivot Table**

8.1. Using a Password-Protected Data Source	181
8.2. Using a Data Source: No Prompt for Password with OLAP Cube	183
8.3. Using a Data Source: Access Database with User-Level Security	183
8.4. Protection: Preventing Changes to a Pivot Table	185
8.5. Protection: Allowing Changes to a Pivot Table on a Protected Sheet	189
8.6. Protection: Refreshing or Creating a Pivot Table	191
8.7. Privacy: Preventing Viewing of Others' Data	191
8.8. Privacy: Disabling Drill to Details	192
8.9. Privacy: Disabling Show Pages	193

■ CHAPTER 9 **Pivot Table Limits and Performance**

9.1. Understanding Limits: 32,500 Unique Items with External Data Source	195
9.2. Understanding Limits: 32,500 Unique Items with Excel Data Source	198
9.3. Understanding Limits: Only the First 255 Items Displayed	199
9.4. Understanding Limits: 8,000 Items in a Column Field	200
9.5. Understanding Limits: Too Many Row or Column Items	201

9.6. Understanding Limits: Text Truncated in a Pivot Table Cell	203
9.7. Understanding Limits: Number of Records in the Source Data.	204
9.8. Improving Performance When Changing Layout	205
9.9. Improving Performance with the Optimize Memory Option	207
9.10. Reducing File Size: Excel Data Source.	208

■ CHAPTER 10 Publishing a Pivot Table 211

10.1. Publishing a Pivot Table: Understanding HTML	211
10.2. Publishing Without Interactivity: Preparing the Excel File	212
10.3. Publishing with Interactivity: Pivot Charts and Pivot Tables.	215
10.4. Publishing: Interactive Pivot Table Blocked	219
10.5. Using AutoRepublish: The Don't Show This Message Again Option	221

■ CHAPTER 11 Printing a Pivot Table 223

11.1. Repeating Pivot Table Headings	223
11.2. Setting the Print Area to Fit the Pivot Table.	224
11.3. Compacting the Space Required for Row Labels	225
11.4. Printing the Pivot Table for Each Page Item	226
11.5. Printing Field Items: Starting Each Item on a New Page	227
11.6. Printing Field Items: Keeping All Rows for an Item on One Page	228
11.7. Printing Field Items: Including Labels on Each Page	229
11.8. Using Report Manager: Printing Pivot Table Data	230

■ CHAPTER 12 Pivot Charts 235

12.1. Stepping Through the Chart Wizard to Create a Pivot Chart.	235
12.2. Creating a Normal Chart from Pivot Table Data	236
12.3. Restoring Lost Series Formatting	238
12.4. Adjusting Hidden Pie Chart Labels	240
12.5. Formatting Category Axis Date Labels.	241
12.6. Changing Pivot Chart Layout Affects Pivot Table	242

12.7. Resizing and Moving Pivot Chart Elements	242
12.8. Including Grand Totals in a Pivot Chart	243
12.9. Converting a Pivot Chart to a Static Chart.....	243
12.10. Using Page Fields: Page Fields with Hidden Items Shows (All).....	244

■ CHAPTER 13 Programming a Pivot Table..... 245

13.1. Using Sample Code.....	245
13.2. Recording a Macro While Printing a Pivot Table.....	247
13.3. Modifying Recorded Code	252
13.4. Showing Top 10 Items over a Set Amount	253
13.5. Changing the Summary Function for All Data Fields.....	255
13.6. Hiding Rows with a Zero Total for Calculated Items	256
13.7. Hiding All Pivot Field Subtotals	258
13.8. Naming and Formatting the Drill to Details Sheet	259
13.9. Automatically Deleting Worksheets When Closing a Workbook.....	261
13.10. Changing the Page Field Selection in Related Tables	263
13.11. Clearing Old Items from Field Dropdown Lists.....	264
13.12. Hiding All Items in a Pivot Field.....	265
13.13. Changing Content in the Data Area	266
13.14. Identifying a Pivot Table's Pivot Cache.....	267
13.15. Changing a Pivot Table's Pivot Cache	269
13.16. Identifying the Query Used as the Data Source	270
13.17. Refreshing a Pivot Table on a Protected Sheet.....	272
13.18. Refreshing Automatically When Source Data Changes	274
13.19. Preventing Selection of (All) in a Page Field	274
13.20. Disabling Pivot Field Dropdowns	275
13.21. Preventing Layout Changes in a Pivot Table	276
13.22. Preventing Changes to the Pivot Table	277
13.23. Viewing Information on Pivot Caches.....	279
13.24. Resetting the Print Area to Include the Entire Pivot Table	281
13.25. Printing the Pivot Table for Each Page Field	282
13.26. Reformatting Pivot Charts After Changing the Pivot Table	283
13.27. Scrolling Through Page Field Items on a Pivot Chart.....	284

■ INDEX 287
