About the Author	xv
About the Technical Reviewers	xvii
Acknowledgments	xix
Introduction	xxi
CHAPTER 1 Distributed Architecture	1
Logical and Physical Architecture	1
Complexity	3
Relationship Between Logical and Physical Models	4
A 5-Layer Logical Architecture	8
Applying the Logical Architecture	13
The Way Ahead	17
Managing Business Logic	17
Potential Business Logic Locations	18
Business Objects	21
Mobile Objects	24
Architectures and Frameworks	32
Conclusion	33
CHAPTER 2 Framework Design	35
Basic Design Goals	36
N-Level Undo Capability	37
Tracking Broken Business Rules	40
Tracking Whether the Object Has Changed	41
Strongly Typed Collections of Child Objects	41
Simple and Abstract Model for the UI Developer	42
Supporting Data Binding	46
Object Persistence and Object-Relational Mapping	49
Custom Authentication	56
Integrated Authorization	57

Framework Design	58
Business Object Creation	58
N-Level Undo Functionality	63
Data Binding Support	66
Validation Rules	67
Data Portal	70
Custom Authentication	82
Integrated Authorization	84
Helper Types and Classes	85
Namespace Organization	88
Conclusion	90

■ CHAPTER 3 **Business Framework Implementation** 91

Setting Up the CSLA .NET Project	92
Creating the Directory Structure	93
Supporting Localization	93
Csla.Core Namespace	94
IBusinessObject Interface	94
IUndoableObject Interface	95
IEditableCollection Interface	96
IReadOnlyObject Interface	96
IReadOnlyCollection Interface	97
ICommandObject Interface	97
ObjectCloner Class	97
BindableBase Class	98
NotUndoableAttribute Class	101
UndoableBase Class	101
BusinessBase Class	109
ReadOnlyBindingList Class	127
Csla.Validation Namespace	128
RuleHandler Delegate	128
RuleArgs Class	129
RuleMethod Class	130
ValidationRules Class	130
BrokenRule Class	134
BrokenRulesCollection Class	134
ValidationException	135
Csla.Security Namespace	136
RolesForProperty Class	136
AccessType Enum	136
AuthorizationRules Class	137

Csla Namespace	139
BusinessBase Class	139
BusinessListBase Class	142
ReadOnlyBase Class	155
ReadOnlyListBase Class	156
Conclusion	157

■ CHAPTER 4 **Data Access and Security** 159

Data Portal Design	160
Channel Adapter and Message Router Patterns	161
Distributed Transaction Support	164
Context and Location Transparency	166
Enhancing the Base Classes	169
Factory Methods and Criteria	171
Save Methods	172
Data Portal Methods	174
Channel Adapter	177
Csla.MethodCaller Class	177
Csla.Server.CallMethodException	183
Csla.RunLocalAttribute Class	184
Csla.DataPortalEventArgs Class	184
Csla.DataPortal Class	185
Csla.Server.IDataPortalServer	193
Csla.DataPortalClient.IDataPortalProxy	194
Csla.DataPortalClient.LocalProxy	194
Csla.DataPortalClient.RemotingProxy	195
Csla.Server.Hosts.RemotingPortal	198
Csla.DataPortalClient.EnterpriseServicesProxy	200
Csla.Server.Hosts.EnterpriseServicesPortal	201
Csla.DataPortalClient.WebServicesProxy	206
Csla.Server.Hosts.WebServicePortal	208
Distributed Transaction Support	210
Csla.TransactionalTypes	210
Csla.TransactionalAttribute	210
Csla.Server.DataPortal	211
Csla.Server.ServicedDataPortal	215
Csla.Server.TransactionalDataPortal	216
Message Router	217
Csla.CriteriaBase	217
Csla.Server.SimpleDataPortal	218

Context and Location Transparency	224
Csla.Server.DataPortalContext	225
Csla.Server.DataPortalResult	228
Csla.Server.DataPortalException	228
Csla.ApplicationContext	229
Conclusion	233

■ CHAPTER 5 **Completing the Framework** 235

Additional Base Classes	236
CommandBase	236
NameValueListBase	239
Custom Authentication	243
BusinessPrincipalBase	246
Sorting Collections	246
SortedBindingList	247
Date Handling	262
SmartDate	263
Common Business Rules	273
CommonRules	273
Data Access	276
SafeDataReader	277
DataMapper	280
Reporting	285
ObjectAdapter	286
Windows Data Binding	295
ReadWriteAuthorization	295
BindingSourceRefresh	301
Web Forms Data Binding	303
CslaDataSource	305
CslaDataSourceView	307
CslaDataSourceDesigner	310
CslaDesignerDataSourceView	310
ObjectSchema	314
ObjectViewSchema	315
ObjectFieldInfo	316
Conclusion	319

■ CHAPTER 6 **Object-Oriented Application Design** 321

Application Requirements	322
Use Cases	323

Object Design	326
Initial Design	326
Revising the Design	328
Custom Authentication	339
Using CSLA .NET	339
Database Design	343
Creating the Databases	344
PTracker Database	345
Security Database	358
Conclusion	359
 CHAPTER 7 Using the CSLA .NET Base Classes	 361
Business Object Life Cycle	361
Object Creation	362
Object Retrieval	365
Updating Editable Objects	368
Disposing and Finalizing Objects	372
Business Class Structure	374
Common Features	374
Class Structures	379
Conclusion	402
 CHAPTER 8 Business Object Implementation	 405
ProjectTracker Objects	405
Setting Up the Project	406
Business Class Implementation	407
Project	408
ProjectResources	429
ProjectResource	434
Assignment	439
RoleList	442
Resource and Related Objects	444
ProjectList and ResourceList	446
Roles	449
Role	453
Implementing Exists Methods	455
Custom Authentication	457
PTPrincipal	457
PTIdentity	459
Conclusion	462

CHAPTER 9	Windows Forms UI	465
	Interface Design	465
	User Control Framework	467
	User Control Design	469
	Application Configuration	469
	PTWin Project Setup	472
	User Control Framework	472
	WinPart	472
	MainForm	474
	Login Form	481
	Business Functionality	482
	MainForm	482
	RolesEdit	486
	Project List	494
	Project Edit	497
	Conclusion	512
CHAPTER 10	Web Forms UI	513
	Web Development and Objects	513
	State Management	515
	State on the Web Server	516
	Transferring State to or from the Client	518
	State in a File or Database	519
	Interface Design	521
	Application Configuration	523
	PTWeb Site Setup	525
	Master Page	526
	Login Page	531
	Business Functionality	537
	RolesEdit Form	538
	ProjectList Form	548
	ProjectEdit Form	552
	Conclusion	562
CHAPTER 11	Web Services Interface	563
	Overview of Web Services	564
	The SOAP Standard	564
	Message-Based Communication	565
	SOAP and Web Services	565
	SOAP, Web Services, and the .NET Framework	566

Web Services and SOA	567
Services vs. Components	567
Designing a Web Services Interface	571
Component-Based vs. Service-Oriented Design	571
Grouping Web Methods into Web Services	572
Returning and Accepting Data	573
Authentication	575
Web Service Implementation	576
Application Configuration	576
PTWebService Site Setup	579
PTService	580
Authentication	580
Component-Based Web Methods	584
Service-Oriented Web Methods	587
Web Service Consumer Implementation	591
A Simple Smart Client	594
Conclusion	599
 CHAPTER 12	
Implementing Remote Data Portal Hosts	601
Data Portal Channel Comparison	602
Factors for Comparison	602
.NET Remoting	605
Implementation	605
Web Services	609
Implementation	610
Enterprise Services	612
Creating the Proxy/Host Assembly	612
Client Setup	618
Conclusion	619
 INDEX	621
