Preface.	ix
Acknowledgments	xv

Part I: The Fundamentals 1

Chapter 1: What Is a Database?	3
Paper Databases versus Computer Databases	5
Limitations of paper databases	6
Advantages of computer databases	6
When should you use a database program?	8
Flat-File and Relational Databases	8
Introducing FileMaker Pro	10
FileMaker concepts	11
Getting “The Big Picture”	17
Business uses for FileMaker Pro	17
Home uses for FileMaker Pro	18
Summary	19
Chapter 2: FileMaker Pro Basic Operations.	21
Starting Up.	21
Quitting.	27
File-Handling Procedures	27
Opening, creating, and closing databases.	27
Saving files	30
Making a backup copy of a file	32
Automatic backups.	35
Issuing Commands	39
Using Tools and Palettes	41
Using Toolbars	45
Getting Help	46
Help for Windows users	46
Help for Macintosh users	48
Summary.	49
Chapter 3: What’s New in FileMaker Pro 8?.	51
The FileMaker Pro 8 Product Family	51
Changes Introduced in FileMaker Pro 8	52
Operating system requirements	53

Database design enhancements	53
Layout enhancements	53
Data entry enhancements	55
Data sharing enhancements	56
ScriptMaker enhancements	56
Advanced enhancements	56
Changes Introduced in FileMaker Pro 7	57
Operating system requirements	57
File format changed	57
Multiple tables per file	58
New relational model	58
New Database Definition dialog and Field options	58
New Accounts methodology eliminates groups	58
New calculation features	60
ScriptMaker enhancements	61
Enhanced Instant Web Publishing (IWP)	61
Unicode support	61
New and updated templates	61

Part II: Database Design Basics

63

Chapter 4: Creating Your First Database. 65

Step 1: Create a New Database	67
Step 2: Define Fields	68
Step 3: Set Field Options	73
Step 4: Design the Layout	74
Creating a new layout	75
Setting field attributes	78
Text attributes	78
Placing the fields	80
Adding the finishing touches	91
Step 5: Design the Home Tab	96
Step 6: Create the Data Entry Buttons and Scripts	105
The script definition process	105
The Data Entry layout scripts	106
Step 7: Design a Report Layout	110
Resizing the fields	114
Formatting the header	115
Formatting the footer	115
Modifying the Business Phone Directory script	116
Generating a report	117
Step 8: Set Startup Actions	117
Tips for Using the Database	119
Summary	120

Chapter 5: Defining Fields 121

Setting Field Definitions.	121
All about field types	124
Defining Calculation, Summary, and Global fields	134
Understanding summary functions.	138
Setting Field Options	143
Auto-enter options	145
Data validation options	154
Repeating fields	157
Value lists	159
Indexing and storage options	164
Modifying Field Definitions, Names, and Options	167
Changing field names.	167
Deleting a field and its data	168
Duplicating fields	170
Setting options for existing fields.	170
Changing a field's type	171
Changing or deleting options for a field	172
Summary	173

Chapter 6: Layouts 175

Layout Basics	176
Creating New Layouts.	179
Standard form layouts	181
Columnar list/report layouts	183
Creating a complex columnar report.	187
Table View layouts	190
Label layouts	192
Vertical Label layouts	197
Envelope layouts	197
Blank layouts	200
Designing Your Own Layouts.	200
Understanding layout parts	200
Adding a layout part	203
Modifying layout parts	205
Adding items to a layout part	208
Formatting Fields and Other Objects	222
Using the measurement and alignment tools	222
Moving and resizing fields and objects.	225
Setting field formatting.	225
Adding and modifying text.	234
Duplicating formats.	235
Applying the finishing touches	235

Duplicating, Renaming, Reordering, and Deleting Layouts	236
Duplicating a layout	238
Reordering layouts	239
Renaming a layout	240
Deleting a layout	240
Summary	241

Chapter 7: Setting Preferences 243

Setting FileMaker Pro 8 Preferences	243
Setting General preferences	245
Setting Layout preferences	246
Setting Memory preferences	248
Setting Plug-Ins preferences	249
Setting Fonts preferences	250
Setting Document-Specific Options	250
Open/Close file options	251
Spelling file options	252
Text file options	254
Graphics file options (Mac only)	256
Summary	257

Part III: Working with Databases 259

Chapter 8: Working with Records 261

Browse Mode Basics	261
Switching to Browse mode	262
Using Browse mode controls	262
Working in different views	270
Data Entry and Editing	272
Creating new records	272
Entering data	272
Editing records	293
Deleting records	295
Using the spell checker	296
Summary	296

Chapter 9: Searching for and Selecting Records 299

Find Mode Basics	299
Switching to Find mode	300
Using Find mode tools and functions	300
Finding Records	302
Matching all criteria: AND searches	303
Using symbols in search criteria	304
Matching one criterion or another: OR searches	305
Matching different kinds of text	306
More about Find Requests	309
Creating additional Find requests	309

Repeating and editing Find requests	310
Deleting Find requests	310
Matching Special Items	311
Matching values in a range	311
Matching the current date	312
Searching for empty fields	312
Searching for values greater or less than a given value	313
Searching for duplicate records	314
Searching for invalid information	314
Finding records that don't match the criteria	315
Working with Found Records	315
Omitting records from a found set	316
Swapping found sets with omitted records	317
Extending and constraining the found set	318
Copying found sets	319
Deleting found sets	319
Replacing values in a found set	320
Working with all records again	325
Finding Matches in Browse Mode	325
Summary	326

Chapter 10: Sorting Records 327

About Sorting	327
Creating a Sort Order	331
Sorting on one field	334
Sorting on multiple fields	336
Modifying Sort Specifications	338
Sorting Data in Portals	338
Additional Sort Options	341
Using a value list to set a sort order	341
Setting an international sort order	342
Sorting by Summary fields	343
Unsort: Restoring the original record order	347
Summary	347

Chapter 11: Reports 349

Report Design Essentials	349
Designing a report layout	350
Selecting records to include in the report	351
Sorting the found set	352
Printing or previewing the report	353
Modifying and Reusing Layouts	356
Working with layout parts	356
Duplicating a report layout	357
Transferring layouts between databases	358
Summary	360

Chapter 12: Using the Spelling Checker 361

Setting Spell-Checking Options	362
Specifying Your Dictionaries	364
Checking Your Spelling	365
Spell checking on request	365
On-the-fly spell checking	369
Working with User Dictionaries	370
Creating a User Dictionary	370
Adding words to a User Dictionary	371
Merging User Dictionaries	374
Spelling Tips and Tricks	376
Creating a spelling list from an existing database	376
Restricting spelling checks to a subset of fields	379
Summary	379

Chapter 13: Printing 381

The Steps in Printing	381
Step 1: Decide what to print	382
Step 2: Specify a printer and print settings	387
Step 3: Print	393
Step 4: Troubleshoot	398
Effective Printing Tips	399
Laser printers	399
Inkjet printers	400
Dot-matrix printers	400
Summary	400

Part IV: Putting FileMaker Pro to Work 403**Chapter 14: Calculations and Computations 405**

About Calculation Fields	405
Arithmetic operators	406
Logical operators	407
Comparison operators	408
Text operators	409
Creating an expression	410
Creating a Calculation Field	411
Using FileMaker Pro's Built-In Functions	413
Validation by Calculation	423
Calculation Logic	423
Summary	423

Chapter 15: Automating FileMaker Pro 425

Using ScriptMaker	426
Listing scripts in the Scripts menu	429
Running a script	429

Modifying a script.	430
Printing scripts	433
Importing scripts from other databases	433
Script Step Reference	434
Script step options	434
Script step definitions	436
Attaching a Script to a Button	503
Advanced Scripting Procedures	505
Decision-making in scripts.	505
Using loops in scripts	505
Environment considerations	506
Executing other scripts from within a script	506
Using AppleEvents	507
Using AppleScript.	508
Summary	510
Chapter 16: Exchanging Data.	511
Moving Data between Programs	511
About importing and exporting.	512
Understanding file formats	513
Importing Data from Other Sources.	516
Format selection	516
Data clean-up prior to importing	517
Opening a foreign data file to create a new database	526
Importing data from a digital camera (Mac only).	529
Importing data from a folder	532
Exporting Data	535
Format selection	535
Data clean-up	536
Exporting records.	536
Moving Data Using Drag-and-Drop	538
Exchanging Data between Macs and PCs.	539
Moving data to and from FileMaker Pro for Windows	539
Understanding the compatibility issues	540
Exchanging Data with Microsoft Office	543
Using Excel Data in FileMaker Pro.	543
Saving FileMaker Pro Data to Excel	546
Summary	547
Chapter 17: Creating and Using Templates	549
The FileMaker Pro 8 Templates	549
Installing a Template	551
Reinstalling a Fresh Copy of a Template	552
Saving a Database as a Template	553
Working with a New Template	556
Summary	556

Part V: Mastering FileMaker Pro**557****Chapter 18: Linking Tables: Relationships and Lookups 559**

Lookups versus Relationships	560
Going Relational with FileMaker Pro	573
Defining a relationship	574
Placing related fields in a layout	576
Self-joins	580
Working with Lookups	583
Defining lookup fields	585
Performing a relookup	587
Additional Relationship/Lookup Options and Requirements	590
Summary	591

Chapter 19: Using FileMaker Pro in Workgroups 593

Running FileMaker Pro on a Network	593
Hosts and clients	595
Notes on cross-platform database sharing	600
Protecting Databases and Setting Privileges	600
Creating accounts.	602
Record-level access privileges	606
Passing out accounts.	607
Modifying accounts.	607
Creating and deleting privilege sets	609
Working with a protected file	612
Summary	616

Chapter 20: Web Publishing with FileMaker Pro 617

Publishing Methods and Views	617
Instant Web Publishing	620
Publishing a database with Instant Web Publishing	620
Testing your published database	625
Instant Web Publishing limitations	625
Interacting with a database published with Instant Web Publishing	626
Publishing Static Pages on the Web	628
Summary	630

Chapter 21: Advanced Database Connectivity with XML and ODBC/JDBC 633

Exporting and Importing XML	634
Exporting XML data for use in other applications	634
Importing XML data into FileMaker Pro	639
FileMaker and ODBC/JDBC	642
Moral of the Chapter	643
Summary	644

Chapter 22: Expanding FileMaker's Capabilities Using Plug-Ins. . . 645

Plug-in Licensing and Use	646
Installing the Troi Plug-Ins	647
Plug-In Examples.	648
Troi Dialog plug-in	649
Troi File plug-in	651
More Plug-Ins.	654
Summary	654

Part VI: Developing Databases for Others to Use 655**Chapter 23: Designing Databases for Others 657**

Simplify the Interface by Using Menus	659
Creating a Navigation Menu	662
Providing Instant Access via Buttons and Scripts.	664
Consider Screen Real Estate	664
Protecting a Template.	665
Creating Help Systems for Your Databases.	667
Suggested Help topics	667
Different approaches to providing help	668
More help with Help	679
Using FileMaker Pro 8 Advanced	682
Summary	682

Chapter 24: Debugging Scripts. 685

Introducing the Script Debugger.	685
Using the Script Debugger	686
Summary	689

Chapter 25: Generating Database Reports. 691

Specifying a Database Design Report	692
Summary	696

Chapter 26: Creating Custom Database Solutions 697

Working with Custom Functions.	698
Defining a custom function	700
Invoking custom functions.	702
Importing Tables from Other FileMaker Databases	704
Adding Tooltips to Your Layouts	704
Creating Custom Menus	706
Using the File Maintenance Command	715
Using the Developer Utilities.	716
Planning for a runtime solution	720
Branding your layout themes	723
Summary	724

Part VII: Appendixes	727
Appendix A: Macintosh Keyboard Shortcuts	729
Appendix B: Windows Keyboard Shortcuts	741
Appendix C: FileMaker Pro Function Reference	751
Appendix D: Glossary	833
Appendix E: Resources	853
Appendix F: About the CD	859
Index	863
