Chapter 1	△ Introduction to SAS Enterprise Miner 5.2 Software	1
Data Mining Overview		1
Layout of the Enterprise Miner Window		2
Organization and Uses of Enterprise Miner Nodes		7
Usage Rules for Nodes		15
Overview of the SAS Enterprise Miner 5.2 Getting Started Example		16
Example Problem Description		16
Example Data Description		17
Configure SAS Enterprise Miner 5.2 for the Example		17
Chapter 2	△ Setting Up Your Project	21
Create a New Project		21
Define the Donor Data Source		23
Create a Diagram		35
Other Useful Tasks and Tips		36
Chapter 3	△ Working with Nodes That Sample, Explore, and Modify	37
Overview of This Group of Tasks		37
Identify Input Data		37
Generate Descriptive Statistics		38
Create Exploratory Plots		42
Partition the Raw Data		43
Replace Missing Data		45
Chapter 4	△ Working with Nodes That Model	51
Overview of This Group of Tasks		51
Basic Decision Tree Terms and Results		51
Create a Decision Tree		52
Create an Interactive Decision Tree		63
Chapter 5	△ Working with Nodes That Modify, Model, and Explore	85
Overview of This Group of Tasks		85
About Missing Values		85
Impute Missing Values		86
Create Variable Transformations		87
Develop a Stepwise Logistic Regression		98
Preliminary Variable Selection		104
Develop Other Competitor Models		105
Chapter 6	△ Working with Nodes That Assess	109
Overview of This Group of Tasks		109
Compare Models		109

Score New Data 112

Chapter 7 △ Sharing Models and Projects 123

Overview of This Group of Tasks 123

Create Model Packages 123

About SAS Package (SPK) Files 126

Use the SAS Package Reader to View Model Results 126

View the Score Code 129

Register Models 130

Save and Import Diagrams in XML 132

Appendix 1 △ Recommended Reading 135

Recommended Reading 135
