Conventions Used in this Book .....	xiv
About the Authors .....	xvi
Foreword.....	xix

## Section One - Datafiles

---

<b>Chapter 1 - Measuring Oracle Segment I/O .....</b>	<b>1</b>
What is Really Going On? by John Weeg.....	1
Theory .....	1
Test It .....	2
What Happens When We Update? .....	4
What Else? .....	5
So What? .....	5
<b>Chapter 2 - Datafile Resizing Tips .....</b>	<b>6</b>
Setting Free Your Space by John Weeg .....	6
Alter Database.....	7
Double Checking the Work .....	9
<b>Chapter 3 - Reducing Disk I/O on Oracle Datafiles.....</b>	<b>12</b>
Oracle Expert Tuning Secrets to reduce disk I/O by Don Burleson .....	12
Oracle tuning and Disk I/O .....	12
Tuning with RAM Data Buffers.....	13
The KEEP Pool.....	13
Locating Tables and Indexes for the KEEP Pool.....	14
The RECYCLE Pool .....	16
Using Multiple Block Sizes.....	16
Disk I/O Tuning .....	19
STATSPACK Reports for Oracle Datafiles.....	20
Conclusion .....	22
<b>Chapter 4 - Measuring Data Segment Statistics .....</b>	<b>24</b>

Digging at the Segment Level : Performance Diagnosis Reaches A Deeper Level by Arup Nanda .....	24
Background / Overview.....	25
Setting the Statistics Levels .....	26
Segment Level Statistics Collection .....	28
<i>Column Explanation</i> .....	29
Examining Detailed Statistics .....	30
Improvements .....	30
Case Study.....	31
Solution .....	34
Conclusion .....	35

## **Chapter 5 - Optimizing Oracle Physical Design ..... 37**

Optimal Physical Database Design for Oracle8i by Dave Ensor .....	37
Introduction.....	37
Physical Database Design 101 .....	37
What is Physical Database Design? .....	38
Database Block Structure .....	39
Block Size.....	40
Unstructured Data .....	41
Freelists .....	41
Extents.....	42
AutoExtension .....	43
Partitioning .....	44
Index Compression .....	46
Index Organized Tables (IOT's) .....	47
Insert Times.....	48
Retrieval Times .....	50
Application Impact.....	50
Online Table Reorganization.....	51
Temporary Tables.....	52
Application Impact.....	54
Locally Managed Tablespaces.....	55

Transportable Tablespaces.....	56
Conclusions .....	58
<b>Chapter 6 - Verifying Segment Backup Scripts .....</b>	<b>60</b>
Did the Backup Work? by John Weeg.....	60
Problem.....	60
How Do We Know? .....	61
Parsing This String .....	61
Bring It In .....	62
Use It.....	64
Use it Elsewhere .....	65
<b>Chapter 7 - Data Segment Update Internals .....</b>	<b>66</b>
How Much Does an Update Cost? by Jonathan Lewis.....	66
A Brief History of Screen Generators.....	66
What Does It Cost to Update a Column? .....	67
But There's More.....	69
Triggers.....	70
Indexes .....	71
Referential Integrity.....	72
There's Always a Trade-off.....	73
Conclusion .....	74
<b>Chapter 8 - Segment Transaction Slot Internals.....</b>	<b>75</b>
Interested Transaction List (ITL) Waits Demystified by Arup Nanda .....	75
<i>What is ITL?</i> .....	75
What Is an ITL Wait .....	76
Simulation .....	79
How to Reduce ITL Waits.....	80
How to Diagnose the ITL Wait .....	81
What INITRANS Value is Optimal .....	83
Automatic Block Management in Oracle9i .....	85
Conclusion .....	86

---

---

## Section Two - Tablespaces

<b>Chapter 9 - Automated Space Cleanup in Oracle .....</b>	<b>87</b>
Automated Space Cleanup in Oracle by Mike Hordila .....	87
Stray Temporary Segments .....	87
Manual Cleanup of Temporary Segments .....	90
<i>Recommendations Regarding Temporary Segments</i> .....	92
<i>Locking</i> .....	93
Problems with Rollback Segments.....	93
<i>Recommendations Regarding Rollback Segments</i> .....	93
Automated Space Cleanup .....	94
<i>Prerequisites</i> .....	94
<i>Overview of the Package</i> .....	94
Setup .....	96
<b>Chapter 10 - Using Oracle TEMP Files .....</b>	<b>98</b>
Temporarily Yours: Tempfiles by John Weeg .....	98
Don't Wait to Create .....	98
Don't Backup .....	99
Don't Recover .....	99
Don't Copy for Standby .....	100
Don't Add Overhead .....	100
Give It a Try .....	101
<b>Chapter 11 - Monitoring TEMP Space Usage .....</b>	<b>102</b>
Who Took All the TEMP? by John Weeg .....	102
Where Are My TEMP Tablespace? .....	102
Show Me the Objects.....	103
Who Are the Users? .....	103
A Happy Ending.....	105
<b>Chapter 12 - Oracle9i Self-Management Features .....</b>	<b>106</b>
Oracle9i Self-Management Features: The Early Winners by Dave Ensor.....	106
Introduction.....	106
Test Environment .....	107
Self-Management .....	108

<i>Goals</i> .....	108
<i>Examples</i> .....	109
Instance Parameter Management.....	110
Self-Tuning Memory Management.....	112
Memory Made Simple.....	112
PGA Aggregate Target.....	113
Cache Advice.....	115
Automatic Undo Management.....	117
<i>Background</i> .....	117
Rollback Segments.....	118
The Oracle9i Solution.....	119
Database Resource Manager.....	120
Unused Index Identification.....	121
Oracle Managed Files.....	123
Conclusions.....	125
<b>Chapter 13 - Internals of Locally-Managed Tablespaces ..</b>	<b>126</b>
Locally Managed Tablespaces by Jonathan Lewis.....	126
Tablespaces Past and Present.....	126
The Past.....	127
The Present.....	128
Where Are the Benefits?.....	131
Conclusion.....	138
<b>Chapter 14 - Multiple Block Sizes in Oracle9i .....</b>	<b>139</b>
Using Multiple Block Sizes in Oracle9i by Don Burleson .....	139
Indexes and Large Data Blocks.....	144
Allocating Objects into Multiple Block Buffers.....	144
Tools for Viewing Data Buffer Usage.....	147
Creating Separate Data Buffers.....	148
Conclusion.....	149
<b>Section Three - Tables</b>	
<b>Chapter 15 - Automated Table Reorganization in Oracle8i150</b>	

Automated Table/Index Reorganization In Oracle8i by Mike Hordila .....	150
When Reorganizing, How Many Extents to Use?.....	151
Possible Reorganizing Strategies .....	151
Assumptions and Experimental Figures .....	152
Some Procedures Related to Table Reorganization.....	152
Important Issues Regarding Table/Index Moving/Rebuilding .....	153
The Behavior of the "Alter Table/Index Move/Rebuild" Commands.....	155
Limitations of the "ALTER TABLE MOVE" Command:....	155
Manual Object Reorganization.....	156
<i>Step 1</i> .....	157
<i>Step 2</i> .....	157
Automated Object Reorganization .....	159
<i>Prerequisites</i> .....	160
<i>Associated Tables</i> .....	160
Overview of the Package.....	161
Setup .....	164
<b>Chapter 16 - Using External Table in Oracle9i.....</b>	<b>165</b>
External Tables in Oracle9i by Dave Moore.....	165
Example .....	166
Limitations .....	170
Performance .....	171
Practical Applications.....	173
Database Administration.....	174
<b>Chapter 17 - Instructors Guide to External Tables.....</b>	<b>176</b>
An Oracle Instructor's Guide to Oracle9i - External Tables by Christopher Foot .....	176
External Tables .....	176
Tablespace Changes .....	180
Online Table Reorganizations .....	185
Index Monitoring.....	188
<hr/>	
Table of Contents	ix

## Section Four - Indexes

---

### Chapter 18 - Using Locally-Managed Indexes ..... 191

Locally Managed Indexes by John Weeg .....	191
Rebuild in the same Tablespace .....	191
No Fragment .....	192
8.1 to the Rescue.....	193
More Than One .....	193
What Goes Where .....	194
Break Points .....	194
Script.....	195
Conclusion .....	195

### Chapter 19 - Sizing Oracle Index Segments – Part 1 ..... 197

How Big Should This Index Be? by John Weeg.....	197
B-tree Theory .....	197
Estimate Leafs.....	198
Estimate Branches .....	199
Making the Index.....	200

### Chapter 20 - Sizing Oracle Index Segments – Part 2..... 201

Is This Index the Right Size? by John Weeg.....	201
Validate Structure .....	201
Dba_Indexes .....	201
Logical Steps for Resizing and Defragging.....	203
All Together Now.....	206

## Section Five - Partitioning

---

### Chapter 21 - Oracle Partitioning Design..... 208

Partitioning in Oracle 9i, Release 2 by Lisa Hernandez.....	208
Introduction.....	208
Background.....	209
Partitioning Defined.....	209
When To Partition.....	210
Different Methods of Partitioning.....	211

Partitioning Of Tables .....	212
<i>Range Partitioning</i> .....	212
<i>Hash Partitioning</i> .....	213
<i>List Partitioning</i> .....	214
<i>Composite Range-Hash Partitioning</i> .....	214
<i>Composite Range-List Partitioning</i> .....	215
Conclusion .....	216
<b>Chapter 22 - Oracle Partitioning Design – Part 2 .....</b>	<b>217</b>
Partitioning in Oracle 9i, Release 2 -- Part 2 by Lisa Hernandez .....	217
Introduction.....	217
Background.....	217
Globally Partitioned Indexes .....	218
Locally Partitioned Indexes.....	221
When to Use Which Partitioning Method.....	225
Real Life Example .....	225
Conclusion .....	226
<b>Chapter 23 - Effective Segment Partitioning – Part 1 .....</b>	<b>227</b>
Perils and Pitfalls in Partitioning — Part 1 by Arup Nanda..	227
Plan Table Revisited.....	227
The New Tool DBMS_XPLAN .....	228
Partition Pruning or Elimination .....	231
Partition-wise Joins.....	235
Character Value in Range Partitioning.....	240
<b>Chapter 24 - Effective Segment Partitioning – Part 2.....</b>	<b>243</b>
Perils and Pitfalls in Partitioning — Part 2 by Arup Nanda..	243
Multi-Column Partition Keys .....	243
Subpartition Statistics.....	248
<i>PARTNAME</i> .....	248
<i>GRANULARITY</i> .....	248
Rule Based Optimizer .....	252
Coalesce vs. Merge .....	252

Other Questions .....	254
<i>What about Rebuild Partition and Global Indexes?</i> .....	254
<i>While using partitioning, should you use bind variables?</i> .....	254
<i>How many partitions can be defined on a table?</i> .....	255

## **Section Six - Replication**

---

### **Chapter 25 - Multi-Master Replication ..... 256**

A Four-phase Approach to Procedural Multi-master Replication by Don Burleson .....	256
Introduction.....	256
Why Consider Oracle Multi-master Replication? .....	257
Oracle Multi-master Replication .....	258
Multi-master Conflicts and Resolutions.....	258
<i>Conflict Types</i> .....	259
<i>Conflict Resolution Mechanisms</i> .....	260
Implementing Procedural Multi-master Replication.....	261
<i>Phase I: Pre-configuration Steps for Multi-master Replication</i> .....	262
<i>Phase II: Set-up REPADMIN User and Database Links</i> .....	263
<i>Phase III: Create the Master Database and Refresh Groups</i> .....	264
<i>Phase IV: Monitoring Multi-master Replication</i> .....	265
Resources for Defining Multi-master Replication.....	267
Conclusion .....	268
References.....	268

### **Chapter 26 - Replication Management ..... 270**

Automated Replication Management by Mike Hordila .....	270
Basic Replication.....	270
Automated Replication Management .....	272
<i>Prerequisites</i> .....	272
<i>Associated Tables</i> .....	273
<i>Overview of the Package</i> .....	273
<i>Setup</i> .....	275
Test Environment .....	277

### **Chapter 27 - Replication Master Table ..... 279**

---

Altering the Master Table in a Snapshot Replication Environment without Recreating the Snapshot by Arup Nanda .....	279
Background.....	280
The Usual Method.....	281
The Alternative Approach.....	283
Detailed Steps.....	283
Conclusion .....	286
<b>Index .....</b>	<b>287</b>
