Foreword	xxv
About the Author	xxvii
About the Technical Reviewer	xxix
Acknowledgments	xxxii
Introduction	xxxiii

PART 1 ■■■ Windows Forms Fundamentals

■ CHAPTER 1	User Interface Architecture	3
	Classes and Objects	4
	The Roles of Classes	4
	Classes and Types	4
	User Interface Classes in .NET	8
	Controls Are Classes	9
	Controls Can Contain Other Controls	9
	Controls Can Extend Other Controls	12
	Inheritance and the Form Class	13
	Accessing Controls	15
	Components	17
	Interacting with a Control	19
	Overriding Methods	19
	The View-Mediator Pattern	20
	Smart Controls	21
	Smart Forms	22
	Visual Studio	22
	Generating User-Interface Code in Visual Studio	24
	The Component Tray	26
	The Hidden Designer Code	27
	The Application Framework	30
	Designing Windows Forms Applications	34
	Encapsulation	34
	Developing in Tiers	37
	The Last Word	40

CHAPTER 2	Control Basics	41
	The Windows Forms Package	41
	The .NET Solution	42
	The Control Class	43
	Control Relations	46
	Windows XP Styles	46
	Position and Size	48
	Overlapping Controls	50
	Color	52
	Alpha Blending	55
	Fonts and Text	56
	System Fonts	57
	Large Fonts	57
	Access Keys	58
	Focus and the Tab Sequence	59
	Responding to the Mouse and Keyboard	61
	Handling the Keyboard	61
	Handling the Mouse	65
	A Mouse/Keyboard Example	67
	Mouse Cursors	68
	Low-Level Members	69
	The Last Word	70
CHAPTER 3	Forms	71
	The Form Class	71
	Form Size and Position	74
	Scrollable Forms	79
	Showing a Form	81
	Custom Dialog Windows	81
	Form Interaction	84
	Form Ownership	88
	Prebuilt Dialogs	90
	Resizable Forms	93
	The Problem of Size	94
	Minimum and Maximum Form Size	95
	Anchoring	95
	Docking	99
	Autosizing	100

Splitting Windows	103
Building Split Windows with Panels	105
Other Split Windows	106
The Last Word	108
CHAPTER 4 The Classic Controls	109
The Classic Control Gallery	109
Labels	109
LinkLabel	110
Button	112
TextBox	113
RichTextBox	115
CheckBox and RadioButton	120
PictureBox	121
List Controls	121
Other Domain Controls	125
The Date Controls	127
The DateTimePicker	128
MonthCalendar	130
Container Controls	132
The TabControl	133
AutoComplete	135
Drag-and-Drop	137
“Fake” Drag-and-Drop	137
Authentic Drag-and-Drop	138
Extender Providers	141
The NotifyIcon	144
ActiveX Controls	147
Should You Import ActiveX Controls?	148
The Last Word	149
CHAPTER 5 Images and Resources	151
The Image Class	151
Common Controls and Images	152
The ImageList	155
Resources	158
Adding a Type-Safe Resource	159
How Type-Safe Resources Work	161
Form Resources	163
Creating Additional Resource Files	165

Localization	166
Creating a Localizable Form	166
How Localization Works	168
The Last Word	171
CHAPTER 6 Lists and Trees	173
ListView Basics	173
View Modes	173
More Advanced ListViews	181
ListView Sorting	182
Label Editing	186
ListView Grouping	187
Searching and Hit Testing	188
ListView Virtualization	189
TreeView Basics	193
TreeView Structure	194
TreeView Navigation	196
Manipulating Nodes	199
Selecting Nodes	200
More Advanced TreeViews	202
Node Pictures	203
Expanding and Collapsing Levels	204
TreeView Drag-and-Drop	205
The Last Word	208
CHAPTER 7 Drawing with GDI+	209
Understanding GDI+	210
Paint Sessions with GDI+	211
Accessing the Graphics Object	211
Painting and Repainting	212
Refreshes and Updates	214
Painting and Resizing	216
The Graphics Class	217
Rendering Mode and Antialiasing	219
Pens	221
Brushes	225
Drawing Text	230
The GraphicsPath	233

More-Advanced GDI+	235
Alpha Blending	235
Clipping	237
Coordinate Systems and Transformations.....	239
Performing a Screen Capture	242
Optimizing GDI+ Painting	243
Painting and Debugging.....	243
Double Buffering.....	244
Painting Portions of a Window	248
Hit Testing	251
Painting Windows Controls	254
The ControlPaint Class.....	255
Visual Styles	256
Visual Style Support	257
Drawing with the VisualStyleRenderer.....	258
Using a Control Renderer.....	260
The Last Word	261

CHAPTER 8	Data Binding	263
	Introducing Data Binding	264
	.NET Data Binding.....	264
	Basic Data Binding	266
	Data Consumers	266
	Data Providers.....	267
	A Data Access Component	267
	Binding to a List (Complex Binding)	270
	Binding to a Grid (Complex Binding).....	272
	Binding to Any Control (Simple Binding)	273
	Unusual Single-Value Binding.....	274
	Common Data-Binding Scenarios	276
	Updating with Data Binding.....	276
	Formatting Data with a Format String	277
	Formatting Data with the Format and Parse Events.....	279
	Advanced Conversions.....	281
	Creating a Lookup Table	284
	Row Validation and Changes.....	285

Data Binding Exposed	286
Navigation with Data Binding	288
Reacting to Record Navigation	289
Creating Master-Detail Forms	290
Creating a New Binding Context	292
Validating Bound Data	293
Binding to Custom Objects	295
Overriding ToString()	299
Supporting Grid Binding	300
Automatic Data Binding	303
Binding Directly to a Database (Table Adapters)	303
Using a Strongly Typed DataSet	309
Binding Directly to a Custom Object	310
Data-Aware Controls	312
A Decoupled TreeView with Just-in-Time Nodes	314
The Last Word	317

PART 2 ■■■ Custom Controls

■ CHAPTER 9 Custom Control Basics	321
Understanding Custom Controls	321
Types of Custom Controls	322
Custom Components	324
Control Projects	326
The Library Project	326
The Disposable Pattern	328
The Client Project	330
Automatic Toolbox Support	330
Customizing the Toolbox	331
The GAC	333
Creating a Key	334
Applying a Key to a Control Assembly	334
Attaching Keys in Visual Studio	335
Installing a Control in the GAC	335
The Last Word	336

CHAPTER 10	User Controls	337
	Understanding User Controls	337
	The Progress User Control	338
	Creating the Progress User Control	338
	Testing the Progress User Control	340
	The Back Door	341
	User Control Design	342
	An Automatic Progress Bar	343
	The Bitmap Thumbnail Viewer	345
	Creating the BitmapViewer User Control	345
	Testing the BitmapViewer Control	351
	BitmapViewer Events	352
	Performance Enhancements and Threading	354
	Simplifying Layout	356
	User Controls and Dynamic Interfaces	356
	The Wizard Model	357
	The Wizard Step	358
	The Wizard Controller	360
	Testing the Wizard	363
	The Last Word	364
CHAPTER 11	Derived Controls	365
	Understanding Derived Controls	365
	Extending Controls	366
	Derived Controls or User Controls?	367
	The ProjectTree Control	368
	The Data Class	369
	Node Images	371
	Node Groups	372
	Adding Projects	373
	Project Selection	375
	A Custom TreeNode	376
	Design-Time Support	377
	The DirectoryTree Control	377
	Filling the Tree	378
	Directory Selection	380

Deriving Forms	380
A Simple Derived Form	381
Making an Ancestor Control Available	383
Adding a Property in the Ancestor Form	383
Dealing with Events	384
The Last Word	387
CHAPTER 12 Owner-Drawn Controls	389
Understanding Owner-Drawn Controls	389
A Simple Owner-Drawn ListBox	390
A More Advanced Owner-Drawn ListBox	391
An Owner-Drawn TreeView	396
Owner-Drawn Custom Controls	403
Double Buffering	404
The MarqueeLabel Control	404
The GradientPanel Control	407
The SimpleChart Control	411
The CollapsiblePanel Control	417
The Last Word	423
CHAPTER 13 Design-Time Support for Custom Controls	425
Design-Time Basics	425
The Key Players	426
Basic Attributes	427
Attributes and Inheritance	431
The Toolbox Bitmap	431
Debugging Design-Time Support	433
Code Serialization	437
Basic Serialization	437
Default Values	439
Making Serialization Decisions Programmatically	440
Serialization Type	442
Batch Initialization	443
Localizable Properties	445

Type Conversion	447
Dealing with Nested Objects	447
Creating a Type Converter	449
Attaching a Type Converter	452
The ExpandableObjectConverter	454
Creating a Nested Object with a Constructor	457
Custom Serialization with CodeDOM	459
Providing Standard Values	459
Type Editors	462
Using Prebuilt Type Editors	463
Using Custom Type Editors	465
The Last Word	474

PART 3 ■■■ Modern Controls

■ CHAPTER 14 Tool, Menu, and Status Strips	477
ToolStrip Basics	477
The ToolStripItem	479
The ToolStripContainer	487
The StatusStrip and MenuStrip	492
Creating a Status Bar	493
ToolStrip Menus	495
Main Menus	499
Context Menus	501
ToolStrip Customization	502
Hosting Other Controls in the ToolStrip	503
Taking Control of Overflow Menus	508
Allowing Runtime Customization	510
Customizing the ToolStrip Rendering	512
The ToolStripManager	513
Customizing a Renderer	515
Changing the Colors of the ProfessionalToolStripRenderer	517
The Last Word	518

CHAPTER 15	The DataGridView	519
	The DataGridView Legacy	519
	Introducing the DataGridView	520
	The DataGridView and Very Large Data Sources	521
	Bare-Bones Data-Binding	522
	The DataGridView Objects	524
	Column Headers	527
	Creating an Unbound Grid	528
	Cell Selection	530
	Navigation Events	533
	Column-Based Sorting	534
	Formatting the DataGridView	536
	Column and Row Resizing	536
	DataGridView Styles	543
	Custom Cell Formatting	546
	Hiding, Moving, and Freezing Columns	548
	Using Image Columns	549
	Using Button Columns	553
	Editing and Validation with the DataGridView	555
	Editing Events	557
	Default Values for New Rows	557
	Handling Errors	558
	Validating Input	560
	Constraining Choices with a List Column	562
	DataGridView Customization	564
	Custom Cell Painting	564
	Custom Cells	567
	Custom Cell Edit Controls	570
	The Last Word	575
CHAPTER 16	Sound and Video	577
	The SoundPlayer	577
	Synchronous and Asynchronous Playback	578
	System Sounds	580
	Advanced Media with DirectShow	581
	Using Quartz.dll Through Interop	581
	Playing MP3, MIDI, WMA, and More	582
	Showing MPEG and Other Video Types	586
	The Last Word	588

CHAPTER 17	The WebBrowser	589
	WebBrowser Basics	589
	Navigating to a Page	590
	WebBrowser Events	592
	A WebBrowser Example	593
	Printing, Saving, and Fine-Tuning	595
	Blending Web and Windows Interfaces	597
	Build a DOM Tree	597
	Extract All Links	600
	Scripting a Web Page with .NET Code	602
	Scripting an HTML Form	605
	The Last Word	607

PART 4 ■■■ Windows Forms Techniques

CHAPTER 18	Validation and Masked Editing	611
	Validating at the Right Time	611
	Validation Events	613
	The Validation Event Sequence	613
	Handling Validation Events	615
	Closing a Form with Validating	616
	The ErrorProvider	617
	Showing Error Icons	618
	Customizing Error Icons	619
	Regular Expressions	621
	Regular Expression Basics	621
	Validating with Regular Expressions	624
	Custom Validation Components	625
	Understanding the ASP.NET Validation Controls	626
	Building the BaseValidator	627
	Building Three Custom Validators	631
	Using the Custom Validators	634
	Masked Edit Controls	637
	Creating a Mask	638
	The MaskedTextBox Class	641
	MaskedTextBox Events	643
	Registering a Custom Mask	645
	Creating Custom Masked Controls	646
	The Last Word	650

CHAPTER 19	Multiple and Single Document Interfaces	651
	The Evolution of Document Interface Models	651
	MDI Essentials	654
	Finding Your Relatives	656
	Synchronizing MDI Children	657
	MDI Window List	659
	MDI Layout	660
	Merging Menus	661
	Managing Interface State	664
	Document-View Architecture	666
	A Document-View Ordering Program	667
	Multiple-Document SDI Applications	680
	Gaps in the Framework	686
	The Last Word	687
CHAPTER 20	Multithreading	689
	Multithreading Basics	689
	The Goals of Multithreading	690
	Options for Asynchronous Programming	691
	Asynchronous Delegates	692
	Polling and Callbacks	694
	Multithreading in a Windows Application	696
	The Worker Component	697
	The Asynchronous Call	699
	Marshalling Calls to the Right Thread	700
	Using a Delayed Update	704
	The BackgroundWorker Component	707
	A Simple BackgroundWorker Test	707
	Tracking Progress	709
	Supporting a Cancel Feature	711
	The Thread Class	712
	Locking and Synchronization	714
	Creating a ThreadWrapper	716
	Creating the Derived Task Class	717
	Creating and Tracking Threads	719
	Improving the Thread Wrapper	721
	Task Queuing	723
	The Last Word	727

CHAPTER 21	Dynamic Interfaces and Layout Engines	729
	The Case for Dynamic User Interface	729
	Dynamic Content	730
	An Adaptable Menu Example	731
	A Database-Driven Adaptable Menu	733
	Creating Controls at Runtime	736
	Managing Control Layout	738
	The Layout Event	738
	A Simple Handmade Layout Manager	739
	Problems with the Simple Layout Manager	743
	Layout Engines	743
	Creating a Custom Layout Engine	745
	The FlowLayoutPanel	746
	The FlowBreak Extended Property	748
	Margins and Padding	749
	Automatic Scrolling and Sizing	750
	The TableLayoutPanel	751
	Row and Column Styles	752
	Generating New Columns and Rows	754
	Positioning Controls	755
	Extended Properties with the TableLayoutPanel	756
	Layout Panel Examples	757
	TableLayoutPanel: A Localizable Dialog Box	757
	TableLayoutPanel: Bi-Pane Proportional Resizing	759
	TableLayoutPanel: A List of Settings	760
	TableLayoutPanel: Forms from a File	762
	FlowLayoutPanel: A Modular Interface	771
	Markup-Based User Interface	773
	XAML	774
	WFML	774
	The Last Word	775
CHAPTER 22	Help Systems	777
	Understanding Help	777
	Classic “Bad Help”	778
	Types of Help	779
	Help-Authoring Tools	783

Basic Help with the HelpProvider	784
Simple Pop-Ups	786
External Web Pages	787
Compiled Help Files	787
HTML Help with the HelpProvider	788
Creating a Basic HTML Help File	788
Using Context-Sensitive Help	793
Control-Based and Form-Based Help	794
Invoking Help Programmatically	795
Using Database-Based Help	796
Using Task-Based Help	797
Creating Your Own Help	799
Application-Embedded Support	800
Affordances	801
Agents	802
The Last Word	807

PART 5 ■■■ Advanced Custom Controls

■ CHAPTER 23 Skinned Forms and Animated Buttons	811
Shaped Forms and Controls	811
A Simple Shaped Form	812
Creating a Background for Shaped Forms	813
Moving Shaped Forms	817
Shaped Controls	818
Animated Buttons	819
Basic Animated Buttons	819
A Base Class for Animated Buttons	819
Improving the Performance of Owner-Drawn Controls	834
Caching Images	834
Reusing Images	837
The Last Word	838
■ CHAPTER 24 Dynamic Drawing with a Design Surface	839
A Drawing Program with Controls	839
The Shape Control	840
The Drawing Surface	843

A Drawing Program with Shape Objects	848
The Shape Class	849
The Shape Collection	857
The Drawing Surface	859
The Last Word	869
CHAPTER 25 Custom Extender Providers	871
Understanding Extender Providers	871
The StatusStripHelpLabel Provider	872
Choosing a Base Class	873
Choosing the Control to Extend	873
Providing the Extended Property	874
Implementing the SetXxx() and GetXxx() Methods	875
Testing the Provider	877
Changing How Extended Properties Appear	877
The HelpIconProvider	878
Choosing a Base Class	878
Providing the Extended Property	879
The Last Word	883
CHAPTER 26 Advanced Design-Time Support	885
Control Designers	885
Filtering Properties and Events	888
Interacting with the Mouse	893
Selection and Resize Rules	894
Designer Verbs	895
Designer Services	899
Smart Tags	904
The Action List	905
The DesignerActionItem Collection	908
The Control Designer	910
Container and Collection Controls	910
Collection Controls	911
Container Controls	918
Licensing Custom Controls	920
Simple LIC File Licensing	921
Custom LIC File Licensing	922
More-Advanced License Providers	923
The Last Word	926

APPENDIX A	Creating Usable Interfaces	927
	Why Worry About the Interface?	928
	A Brief History of User Interfaces	928
	The Command-Line Era	929
	The Question-Answer Model	930
	The Menu-Driven Model	932
	The GUI Era	932
	Creativity vs. Convention	934
	Consistency in .NET	934
	The “Act Like Microsoft Office” Principle	935
	Administrative Utilities	935
	Know Your Application Type	936
	Know Your User	937
	Handling Complexity	937
	Segmenting Information	938
	Inductive User Interface	939
	Helpful Restrictions	939
	Restricting the User’s Ability to Make a Mistake	939
	Restricting the User’s Choices	940
	Restricting the User’s Imagination	941
	The Last Word	941
APPENDIX B	ClickOnce	943
	The Ground Rules	944
	The ClickOnce Installation Model	944
	ClickOnce Requirements	945
	ClickOnce Limitations	946
	A Simple ClickOnce Deployment	946
	Choosing a Location	947
	Deployed Files	951
	Installing a ClickOnce Application	952
	Updating a ClickOnce Application	953
	ClickOnce Options	954
	Publish Version	954
	Updates	955
	Prerequisites	956
	Options	957

ClickOnce Security 958
 ClickOnce Security Prompts 958
 Partial Trust and ClickOnce 959
The Last Word 961

INDEX 963
