Foreword.....	xvii
About the Author	xix
About the Technical Reviewer	xxi
Acknowledgments	xxiii
Preface	xxv
Introduction	xxvii

PART 1 ■ ■ ■ Fast Track to C++/CLI

■ CHAPTER 1	Hello, World.....	3
	Starting the Visual Studio 2005 Console	4
	Retrieving the Source Files	4
	Executing HelloCpp.cpp	5
	A Quick Tour of the Visual C++ IDE	5
	Understanding Projects and Solutions	6
	Understanding the Differences	7
	Window Layout.....	10
	Building, Executing, and Debugging.....	12
	Summary	14
■ CHAPTER 2	There's No Place Like Home.....	15
	Developing the Program.....	15
	Deal Me In.....	15
	The Completed C# Program.....	18
	A Quick Look at the Code.....	19
	Projects and Solutions	19
	A Quick Look.....	20
	Building and Executing the Project.....	21
	Binding C++	22

Doing the Shuffle Without the IDE	26
Basic Command-Line Compilation	26
Using a Module	26
Summary	27

■ CHAPTER 3 **Syntax** 29

C# class (Reference Type)	31
C# struct (Value Type)	31
Caveat	31
Lack of Locality	32
The C++ Approach	33
Types of Member Access Operators	34
Keyword Differences	34
Arrays and Functions	36
The Conversion Operators	37
Memory Allocation	38
Accessibility and Visibility	38
Properties, Events, and Delegates	39
Generics	39
Built-in Types	40
Summary	40

■ CHAPTER 4 **C# to C++/CLI** 41

Add the Keyword namespace After using	43
Add the Punctuator ^ to the Reference Type Declarations	43
Modify the Built-in Types	44
Change the Array Declarations and Type Parameters	45
Change the Enumeration Declarations	45
Change the Object Allocations and Instantiations	46
Change the Pass by Reference Parameters	46
Change the Class Member Access Operators for Handles	47
Change the Separators for Namespaces and Static Accesses	47
Change the Class Declarations	48
Add the Function main()	48
Summary	50

CHAPTER 5	Tools	51
	Lutz Roeder's .NET Reflector	51
	What Is Reflection?	51
	Lutz Roeder's .NET Reflector	52
	Installing and Loading .NET Reflector and the C++/CLI Add-in	54
	Executing .NET Reflector	56
	Instant C++	57
	Tools Shipped with Visual Studio	58
	Microsoft .NET Framework IL Disassembler (ILDasm)	58
	Dependency Walker (Depends)	58
	More Visual Studio Tools	59
	Summary	60
CHAPTER 6	Data Types	61
	C# Types vs. C++ Types	61
	The C++ struct Keyword	62
	Native Classes	62
	Value Types and Reference Types	62
	Dynamic Memory Pools	63
	Garbage Collection	64
	Initialization	64
	Boxing	73
	Constructor Forwarding	77
	C# Partial Classes	78
	Reference Types on the Stack	79
	Basic Types	79
	Basic Type Differences	79
	Missing Keywords	80
	Marshaling Required	80
	Summary	82
CHAPTER 7	Arrays	83
	Native Arrays	83
	Managed Arrays	84

Managed Array Details	84
A Simple Example	84
Arrays as Parameters and Return Values	86
Sophisticated Example	91
Higher Dimensional Arrays	93
Native Arrays	97
Summary	97

■ CHAPTER 8 **Polymorphism and Protection** 99

Polymorphism	99
Inheritance	100
Interfaces	102
Abstract Classes	105
Sealed Classes	106
Static Classes	106
Methods	107
Virtual Methods	107
Working with Methods	109
Virtual Methods Summary	115
Accessing Base Class Fields and Methods	115
Protection Mechanisms	117
Visibility	117
Accessibility	119
Inheritance	119
Declaring ref struct and ref class	122
Overload Resolution	123
Hide by Name and Hide by Signature	124
Summary	126

PART 2 ■ ■ ■ **Details**

■ CHAPTER 9 **Pointers and Unsafe Code** 129

The C# View: A Blessing and a Curse	129
Pointers: A Definition and a Caveat	130
Valid Targets and Syntax	131
Common Pointer Operators	132
Example of Pointer Usage	132
Verifiable Code and Pointer Usage in C#	132

Side Effects of Writing Unsafe Code	133
Pointer Usage in C++	134
Verifiable Code in C++	134
C++ Handles	137
C++/CLI Address Operators	138
Complex Examples	139
Nightmares	140
Summary	140
CHAPTER 10 Properties and Events	141
A Basic Example Using Properties in C#	141
A Basic Example Using Properties in C++/CLI	143
A Look Inside the Grammar	144
Trivial Properties	145
Indexed Properties	146
C# Properties	149
Advanced Properties of Properties	151
Property Caveats	158
Miscellaneous Property Details	159
Events and Delegates	159
Delegates	160
Multicast Delegates	166
Instance Delegates	167
Events	168
Summary	170
CHAPTER 11 Expressions and Operators	171
Operator Overloading	173
Complex Numbers, a Basic Example	174
A Mathematical Diversion: Numbers Modulo Primes	179
Implicit and Explicit Conversions of Built-in Types	182
User-Defined Conversions	188
CLS-Compliant Operators	190
Summary	194
CHAPTER 12 The End of the Beginning	195
Include Files	195
Forward Declarations	195
The Problem	196

The Solution	196
Include File Caveats	196
Types of Declarations	197
Scope Resolution Operator	199
Nullable Types	201
Examples in C# and C++/CLI	201
The ?? Operator in C#	203
Under the Hood	204
Checked Expressions	205
Anonymous Methods	206
Context-Sensitive Keywords	206
Method Group Conversion	207
Constructor-Initialized Variables	208
Expression Statements with No Effect	209
Exceptions	210
Basic Exception Handling	210
Function-Try Blocks	213
Summary	215

■ CHAPTER 13 **Fun, Fun, and More Fun** 217

Dropping Light Bulbs	217
Initial Thoughts	217
A Rough Approximation	218
A Little Algebra	218
Discovering a Recursive Algorithm	219
Implementation	221
First Drop	222
Bridge Crossing	222
Background	222
Algorithm and Implementation	223
The Code	224
Taking the Algorithm for a Spin	226
Dealing with Cannibals	226
Assumptions	227
The Code	227
Summary	229

PART 3 ■ ■ ■ Advanced Concepts

■ CHAPTER 14	Generics	233
	A Queue of Tasks	233
	C# Implementation Under .NET 1.0	233
	Moving to Generics	239
	Creating Generic Classes in C++/CLI	252
	Summary	257
■ CHAPTER 15	Introduction to Templates	259
	Comparison with Generics	259
	Syntactic Differences	260
	Summary	260
	Compilation Process	261
	Templates Don't Really Exist	263
	Constraining Freedom Is a Good Thing	264
	The Template Paradigm	264
	Specialization	265
	Partial Specialization	266
	Partial Ordering of Function Templates	268
	Nontype Template Parameters	270
	Complex Numbers	273
	Overview	273
	Mathematical Formulas	274
	Generic Implementation	274
	Templates to the Rescue	275
	Core Differences: Templates and Generics	279
	Summary	279
■ CHAPTER 16	Advanced Generics and Casts	281
	Constraints	281
	Kinds of Constraints	281
	Type Constraints	282
	Satisfying Type Constraints	284
	The gnew Constraint	285
	The value class Constraint	285
	The ref class Constraint	286
	Summary	287

Cast Operators	288
Runtime Type Identification	288
const_cast<>()	289
static_cast<>()	290
dynamic_cast<>()	290
reinterpret_cast<>()	292
safe_cast<>()	292
An Adder	293
Generic Delegates	295
Summary	296

■ CHAPTER 17 The Preprocessor 297

C# Preprocessor Commands	297
Code Regions	297
Conditional Code Compilation	298
C++ Preprocessor Commands	298
Full Text Substitution Language	299
Debugging Support	299
Function Syntax	299
Concatenation Operator	300
String Operator	301
Macros on Macros	301
Special Preprocessor Predefined Macros	303
#define	304
#undef	305
Conditional Directives	305
#include	305
#using	306
#error	306
#pragma	306
Some Useful Pragmas	307
Summary	314

■ CHAPTER 18 Native C++ 315

The iostream Library	315
Pointers to Members	316
Operators new and delete	319
/Zc:forScope	321

/Zc:wchar_t	322
Default Parameters	322
C++ Runtime Library Functions	323
stdio.h	323
stdlib.h	324
Other Include Files	325
STL	326
vector	326
deque	327
list	333
auto_ptr	333
Summary	333
CHAPTER 19 Multiple Language Support	335
.NET Language Integration	335
Gathering Metadata	336
Tracking Students Example	336
Summary	343
.NET Interoperability	343
Wait for the Beep	344
C# Platform Invoke	344
C++ Built-in Support	346
Using C++ for C# InterOp	347
Summary	349
CHAPTER 20 Final Thoughts	351
Standard Dispose Pattern	351
Destructors and Finalizers	352
Implementation in C#	352
Implementation in C++/CLI	354
For Further Study	355
Function Objects	355
Special Pointers	357
Interior Pointers	357
Pinning Pointers	358
Templates Revisited	359
Class Hierarchy Pitfalls	361
Type Aliases (typedef)	364

Friends..... 366

Volatile Data..... 366

Constant and Mutable Data..... 367

Attributes..... 368

More on IntelliSense and Source Browsing 369

Summary 369
