About the Author xxxiii

1 Introduction to ClickOnce 1

What Is a Smart Client Application? 2

Smart Clients Are Rich Client Applications 3

Smart Clients Are Typically Distributed Applications 4

Smart Clients Run Securely on the Client Machine 4

Smart Clients Support Offline Operations 4

Smart Clients Are Automatically Network Deployed and Updated 6

Why Choose Smart Clients? 6

Smart Client Deployment Challenges 7

Design Goals of ClickOnce 8

ClickOnce Features 9

Terminology 10

ClickOnce Deployment Modes 12

ClickOnce Deployment Architecture 14

ClickOnce Deployment Process Overview 16

First ClickOnce Deployment: ClickOnce Hello World 17

Creating an Application to Deploy 18

Publishing the Application 18

Deploying the Application with ClickOnce 20

Creating an Updated Application Version 23

Publishing the Update 24

Applying the Update from the Client 25

HelloWorld Wrap Up 26

Software Requirements for ClickOnce 26

Client Requirements 27

Server Requirements 27

What to Deploy (and What Not to Deploy) with ClickOnce 28

ClickOnce Versus Other Deployment Technologies 30

Smart Client Architecture Overview 32

Where Are We? 34

2 Initial Deployment with ClickOnce 37

Publishing an Application with Visual Studio 2005 38

ClickOnce Publishing Options 38

Deployment Protocols or Media 39

Publishing Location 40

Installation URL 42

Install Mode 43

Update Policy 45

Publish Version 46

Publish Options 46

Security Settings 49

Publisher Certificate 49

Visual Studio Publishing Step by Step 50

Designing the Application 51

Publishing the Application via HTTP from Visual Studio 53

Publishing the Application to CD 55

Publishing Location Folder Structure 57

Manifest Generation and Signing 59

Deployment Manifest 60

Application Manifest 62

Setup.exe File 63

Publish.htm Test Page 63

ClickOnce Application Initial Deployment Step by Step 64*Installation Prerequisites 65**Launching the Application 67**Manifest Validation 70**Install and Runtime Security 71**User Cache 72**Start Menu Item 74**Add or Remove Programs 75***Moving an Application to Production 76***Moving a Published Application into Production with Visual Studio 76**Moving an Application into Production with Mage 77***Where Are We? 80****3 Automatic Application Updates 83****Automatic Update Walkthrough 84***Publishing an Update 84**Updating the Application on the Client 86**Manually Publishing the Update with Mage 88***ClickOnce Update Options 91***Install Mode and Updates 93**Checking for Updates 94**Checking for Updates Before the Application Launches 95**Checking for Updates after the Application Launches 95**Scheduled Update Checking 96**Setting Minimum Required Version 96**Specifying an Update Location 98***Behind the Scenes on the Deployment Server 99****Behind the Scenes of an Update on the Client Machine 100***File Validation 102**Transactions 103**Client Cache Scavenging 103***Removing or Restoring Applications on the Client 104****Restoring an Application Version from the Deployment Server 105****Republishing a Previous Version 105****Where Are We? 106**

4	On-Demand Updates	107
	When Do On-Demand Updates Make Sense?	108
	Introducing the ClickOnce API	109
	Adding Synchronous On-Demand Updates	110
	Performing Updates Asynchronously	114
	<i>Using the BackgroundWorker Component for Asynchronous Updates</i>	116
	<i>Asynchronous Updates Through the ApplicationDeployment API</i>	120
	Update Progress Notifications	122
	Combining On-Demand Updates with Automatic Updates	123
	Checking Detailed Update Information	125
	Gathering Information about the Current Deployment	126
	Where Are We?	128
5	Application and Data File Management	131
	Application Executable Deployment	132
	Adding Application Files in Visual Studio	134
	Configuring ClickOnce Application Files	135
	Embedding Files in the Assembly	138
	Localizing Your ClickOnce Deployment	141
	<i>Publishing for a Single Target Language</i>	143
	<i>Publishing for Multiple Target Cultures</i>	145
	<i>Publishing for On-Demand Download of Other Cultures</i>	146
	Programmatic Download of Application Files	147
	Deploying Extensible Plug-In Applications with ClickOnce	151
	Managing Application Files with Mage	157
	Managing Data Files Through Visual Studio	160
	Dealing with Data Files on the Client	161
	Data File Update Process	164
	Deploying a Client Database with Your Application	167
	Migrating SQL Compact Edition Database Files	168
	Where Are We?	174
6	ClickOnce Security	177
	ClickOnce Security Overview	177
	<i>ClickOnce Deployment-Time Protections</i>	178
	<i>ClickOnce Runtime Protections</i>	179

<i>ClickOnce Size Limitations for Online-Only Applications</i>	186
<i>ClickOnce Tamper Protections</i>	186
Internet Explorer Security Settings Affecting ClickOnce	188
Configuring ClickOnce Security Permissions	189
<i>Configuring ClickOnce Security Permissions with Visual Studio</i>	190
<i>Calculating Permissions with Visual Studio</i>	194
<i>Configuring ClickOnce Security Permissions with Mage</i>	195
Understanding and Managing Publisher Certificates	197
<i>Generating or Configuring a Publisher Certificate with Visual Studio 2005</i>	200
<i>Installing a Certificate in a Store with Visual Studio 2005</i>	203
<i>Command Line Certificate Tools</i>	207
Signing Application Updates	208
User Prompting	210
<i>Low-Risk Install</i>	211
<i>Medium-Risk Install</i>	212
<i>High-Risk Install</i>	213
<i>User Prompting for Online-Only Applications</i>	214
Trusted Applications' User Security Policies	215
Trusted Publishers' Permission Elevation	216
Adding Restricted Code Sections	219
Securing the Application Based on User Roles	221
Securing Access to ClickOnce Application Files on the Server	222
Where Are We?	223

7 Prerequisite Deployment with the Bootstrapper 225

Bootstrapper Features	226
<i>Flexible Launch Capabilities</i>	227
<i>Prerequisite Download Options</i>	227
<i>Minimal Dependencies</i>	228
<i>Installer Requirements Detection</i>	228
<i>Reboot Management</i>	228
<i>License Presentation</i>	228
Bootstrapper and ClickOnce Sample Deployment	229
Adding Items to the Bootstrapper	234
<i>Creating a Shared Assembly Project</i>	235
<i>Creating a Windows Installer Package</i>	237

	<i>Creating the Bootstrapper Manifests</i>	239
	<i>Deploying the Shared Assembly with the Bootstrapper</i>	242
	Generating Bootstrapper Manifests	245
	Where Are We?	248
8	Advanced ClickOnce Topics	249
	Using URL Query String Parameters	249
	<i>Enabling URL Parameters</i>	251
	<i>Using URL Parameters</i>	253
	Executing Custom Install/Initialization Code	255
	Debugging ClickOnce Applications	256
	<i>Debug in Zone</i>	256
	<i>Attaching the Debugger to a ClickOnce Application</i>	257
	<i>Using Debugger.Break to Debug ClickOnce Startup Code</i>	260
	Deploying Unmanaged Applications with ClickOnce	261
	Reg-Free COM	264
	Deploying ClickOnce Applications with Firefox	266
	Launching a ClickOnce Application Programmatically	267
	Pushing ClickOnce Installations to the Client Machine	268
	Web Server ClickOnce Configuration	272
	MSBuild ClickOnce Publishing	273
	Where Are We?	274
A	ClickOnce Deployment of WPF Applications	277
	WPF Anatomy 101	278
	ClickOnce Deployment of WPF Applications	280
	Sample Web Browser Application Walkthrough	281
	<i>Creating the Application</i>	281
	<i>Publishing the Application</i>	283
	Where Are We?	284
	<i>Index</i>	287
