About the Authors	xxv
Introduction	xxvii

Part I: New Features Overview

<i>Chapter 1</i>	Exploring the Sybase Galaxy	3
	Part I — New Features Overview	4
	System Maintenance Improvements.	4
	Partition Management — Semantic Partitions	5
	Scrollable Cursors	5
	Overview of Changes to Query Processing	6
	Detection and Resolution of Performance Issues in Queries	6
	Computed Columns	7
	Functional Indexes.	7
	Capturing Query Processing Metrics	8
	Plan Viewer	9
	Sybase Software Asset Management (SySAM) 2.0.	9
	Installation of ASE 15.	9
	Part II — Pre-15 Improvements	10
	Multiple tempdb Databases	10
	MDA Tables	10
	Java and XML	11
	The Appendices.	11
	Sample Certification Exam.	11
	Use Cases.	11
	3, 2, 1, Contact!	12
<i>Chapter 2</i>	System Maintenance Improvements	13
	Recent Pre-ASE 15 Improvements	13
	Multiple tempdb	14
	Native Data Encryption/Security Enhancements	14
	Automatic Database Expansion	15
	The Basics	16
	Job Scheduler.	18
	Basic Components.	18
	Installation of Job Scheduler	18
	ASE 15 Improvements	19

	Row Locked System Catalogs	19
	Update Statistics	20
	Updates to Partition Statistics	20
	Automatic Update Statistics	22
	Datachange	22
	Why Use datachange?	27
	Datachange, Semantic Partitions, and Maintenance Schedules	28
	Local Indexes.	31
	Benefits	31
	sp_helpindex	32
	Partition-level Utilities	33
	Partition Configuration Parameters	34
	Utility Benefits from Semantic Partitions	35
	Partition-specific Database Consistency Checks (dbccs)	35
	Reorg Partitions	38
	Changes to the bcp Utility.	39
	Truncate Partitions	43
	Very Large Storage System.	44
	Disk Init	45
	Large Identifiers	45
	Long Identifiers	46
	Short Identifiers	46
	Unicode Text Support.	47
	New Datatypes	47
	New Functions	48
	Deprecated Functions	50
	New Configuration Parameters	51
	Eliminated Configuration Parameters.	52
	New Global Variables.	52
	Summary	52
Chapter 3	Semantic Partitions and Very Large Database (VLDB) Support	53
	Introduction	53
	Why Partition Data?	55
	Benefits of Partitioning.	56
	Partition Terminology	57
	Semantic Partitions	61
	Configuring ASE for Semantic Partitioning	62
	Partition Support in ASE 15	63
	Partition Types	64
	Range Partitioning.	65
	Hash Partitioning	70
	List Partitioning	75
	Round-robin Partitioning	78

Partitioning Strategies.	83
Inserting, Updating, and Deleting Data in Partitions	84
Inserting Data into Semantic Partitions	84
Inserting Data into Range Partitions	84
Inserting Data into Hash Partitions.	86
Inserting Data into List Partitions	86
Deleting Data from All Semantic Partitions	86
Updating Data in All Semantic Partitions	86
Built-in Functions.	87
Data Partition Implementation and Upgrade Strategies	89
Index Partitioning.	93
Local Index.	94
Clustered Prefixed Index on Range Partitioned Table	95
Clustered Non-Prefixed Index on Range Partitioned Table	97
Clustered Prefixed Index on List Partitioned Table.	99
Clustered Non-Prefixed Index on List Partitioned Table	101
Clustered Prefixed Index on Round-robin Partitioned Table	104
Clustered Non-Prefixed Index on Round-robin Partitioned Table	106
Clustered Non-Prefixed Index on Hash Partitioned Table	108
Clustered Prefixed Index on Hash Partitioned Table	110
Global Index	113
Global Nonclustered Prefixed Index on Range Partitioned Table	114
Global Nonclustered Prefixed Index on List Partitioned Table	116
Global Nonclustered Prefixed Index on Round-robin Partitioned Table	118
Global Nonclustered Prefixed Index on Hash Partitioned Table	120
Query Processor and Partition Support	122
ASE 15 Optimizer	124
Partition Maintenance	124
Altering Data Partitions.	124
Unpartition a Table.	125
Change the Number of Partitions	126
Add a Partition to a Table	126
Drop Partitions.	130
Modifications to the Partition Key.	131
Partition Information	134

	Influence of Partitioning on DBA Activities	143
	Influence of Partitioning on Long-time Archival	143
	Summary.	144
<i>Chapter 4</i>	Scrollable Cursors	145
	Introduction	145
	Scrollable Cursor Background.	146
	Cursor Scrollability	146
	Cursor-related Global Variables.	148
	Changes to the sp_cursorinfo System Procedure	150
	Be Aware of Scrollable Cursor Rules!	151
	Cursor Sensitivity	152
	Demonstration 1: Update to a Row Already Fetched.	154
	Demonstration 2: Update to a Row Not Yet Fetched.	156
	Cursor Sensitivity — An Exception	157
	Locking Considerations with Cursors	158
	Impact on tempdb Usage	159
	Worktable Materialization with Scrollable Sensitive Cursors.	160
	Conclusion of Sensitive vs. Insensitive Cursors	163
	Sybase Engineer’s Insight	164
	Summary.	164
	Future Direction.	165
<i>Chapter 5</i>	Overview of Changes to the Query Processing Engine.	167
	Introduction	167
	Optimization Goals	168
	allrows_oltp.	168
	allrows_mix.	169
	allrows_dss	169
	Determining the Current Optimization Goal	170
	Optimization Criteria	170
	merge_join	171
	merge_union_all	171
	merge_union_distinct.	171
	multi_table_store_ind.	171
	opportunistic_distinct_view	171
	parallel_query.	171
	hash_join	172
	Optimization Timeout Limit.	172
	Query Processor Improvements	174
	Datatype Mismatch	175
	Partition Elimination and Directed Joins	177
	Tables with Highly Skewed Histogram Values.	179
	Group By and Order By	181

	or Queries	182
	Star Queries	182
	Summary.	185
Chapter 6	Detection and Resolution of Query Performance Issues	187
	Introduction	187
	An Approach to Poor Query Performance Diagnosis	188
	Common Query Performance Factors	190
	Eliminating Causes for Sub-Optimal Plan Selection	191
	Find Missing or Invalid Statistics	191
	Consider Range Cell Density on Non-Unique Indexes	191
	Identify Index Needs	192
	Identify Poor Index Strategy	192
	Fragmentation of Data	192
	Resolve Partition Imbalance	193
	Reset Server- or Session-level Options	193
	Overengineered Forceplan	194
	Invalid Use of Index Force.	194
	Inefficient Query Plan Forced by Abstract Plan	195
	Query Processor “set options” — The Basics	195
	Query Optimizer Cost Algorithm.	198
	ASE 15 vs. 12.5.x Cost Algorithm	199
	Query Processor “set options” — Explored	200
	show_missing_stats	200
	show_elimination	203
	show_abstract_plan	204
	Why Use Abstract Plans for ASE 15?	207
	Application of Optimization Tools	208
	Optimization Goal Performance Analysis	208
	Optimization Criteria Performance Analysis	210
	Optimization Timeout Analysis	212
	Suggested Approach to Fix Optimization	
	Timeout Problems	216
	Detection, Resolution, and Prevention of Partition-related	
	Performance Issues	217
	Data Skew Due to Incorrect Partition Type or	
	Poor Partition Key Selection	218
	Effect of Invalid Statistics on Table Semantically	
	Partitioned	220
	Summary.	223
Chapter 7	Computed Columns	225
	Introduction	225
	Key Concepts	226
	Materialization	226

	Deterministic Property	228
	Relationship between Deterministic Property and Materialization.	229
	Deterministic and Materialized Computed Columns . . .	229
	Deterministic and Nonmaterialized Computed Columns.	229
	Nondeterministic and Materialized Computed Columns.	230
	Nondeterministic and Nonmaterialized Computed Columns.	230
	Benefits of Using Computed Columns	231
	Provide Shorthand and Indexing for an Expression	231
	Composing and Decomposing Datatypes.	231
	User-defined Sort Order	232
	Rules and Properties of Computed Columns	233
	Sybase Enhancements to Support Computed Columns	235
	Create Table Syntax Change	235
	Alter Table Syntax Change	235
	System Table Changes	236
	Stored Procedure Changes	237
	Summary.	239
Chapter 8	Functional Indexes	241
	Computed Column Index	242
	Purpose	242
	Rules and Properties of a Computed Column Index	246
	Feature Benefits.	246
	Feature Limitations	248
	Impacts to tempdb	248
	Impact to Existing Application Code.	249
	Determining When to Use a Computed Column Index. . . .	250
	Optimizer Statistics	251
	Function-based Index	251
	Purpose	251
	Rules and Properties of a Function-based Index	252
	Feature Benefits.	253
	Feature Limitations	256
	Impacts to tempdb	256
	Impact to Existing Application Code.	257
	Determining the Use of a Function-based Index	257
	Optimizer Statistics	258
	Behind the Scenes	258
	Getting Index Information.	258
	Summary.	259

<i>Chapter 9</i>	Capturing Query Processing Metrics	261
	Alternatives to Query Processing Metrics	261
	Introduction to Query Processing Metrics	262
	Contents of sysquerymetrics	263
	Contents of the sysquerymetrics View	264
	How to Enable QP Metrics Capture	265
	Captured Information Explored	266
	Stored Procedures	266
	Triggers and Views	270
	Execute Immediate	270
	Accessing Captured Plans	271
	How Is the QP Metrics Information Useful?	273
	Identification of Performance Regression	276
	Comparing Metrics for a Specific Query between	
	Running Groups	277
	Comparing Metrics for All Queries between Running	
	Groups	279
	Why Separate the QP Metrics Data by gid?	280
	Syntax Style Matters; Spacing Does Not	281
	Clearing and Saving the Metrics	283
	Relationship between Stats I/O and QP Metrics I/O Counts	284
	Information for Resource Governor	285
	Space Utilization Considerations	285
	Limitations	286
	Summary	286
<i>Chapter 10</i>	Graphical Plan Viewer	287
	Graphical Plan Viewer from Interactive SQL	287
	Graphical Query Tree Using Set Options	294
	Summary	296
<i>Chapter 11</i>	Sybase Software Asset Management (SySAM) 2.0.	297
	Introduction	297
	Prior to ASE 15	298
	With ASE 15.	299
	Components of Asset Management	299
	SySAM Server	299
	SySAM Utility Program — lmutil	300
	SySAM Reporting Tool.	300
	System Environment Variables	301
	License File	302
	Options File	303
	Properties File.	303
	The SySAM Environment	304
	Standalone License Server	304

	Networked License Server	305
	Redundant License Server	305
	Acquiring Product Licenses	306
	Product Licenses.	309
	Try and Buy.	309
	License Activation	309
	SySAM Administration	310
	sp_lmconfig.	310
	ASE 15 SySAM Upgrade Process.	312
	SySAM Reporting	313
	Summary Reports.	313
	Server Usage Reports	319
	Raw Data Reports.	320
	Summary.	321
<i>Chapter 12</i>	Installation of ASE Servers	323
	Prior to Installation for All Methods	324
	Installation with Resource Files	325
	Notes for Resource File Installation of ASE	325
	Installation of ASE Components with a Resource File.	330
	GUI Installation Method with srvbuild Executable	332
	Installation with the Dataserver Executable	352
	Summary.	356

Part II: Pre-15 Improvements

<i>Chapter 13</i>	Multiple Temporary Databases	359
	Introduction	359
	Purposes for Multiple Temporary Databases	360
	Prior to ASE 15	360
	With ASE 15	361
	System Catalog Changes.	361
	directio Support	361
	update statistics	363
	Insensitive Scrollable Cursors	364
	Semi-sensitive Scrollable Cursors	364
	Sensitive Scrollable Cursors	364
	How to Decide When to Add a Temporary Database	365
	Strategies	365
	What Are Your Needs?	366
	Implementation Steps	367
	Determining Available Temporary Databases.	368
	Sample Setup for Temporary Database for “sa” Use Only	369
	Other Issues	371

	Dropping Temporary Databases	371
	Altering a Temporary Database.	372
	@@tempdb	372
	Summary.	372
Chapter 14	The MDA Tables	373
	What Are the MDA Tables?.	373
	Past Solutions	374
	MDA Table Installation	376
	MDA Table Server Configuration Options	377
	The Parent Switch.	379
	The MDA Tables	380
	Changes from ASE 12.5.3	382
	What Is Meant by “stateful” Tables?	383
	Stateful MDA Table Data Management.	385
	SQL Use	391
	Useful MDA Table Queries	391
	MDA Alternatives	393
	Summary.	393
Chapter 15	Java, XML, and Web Services in ASE.	395
	Introduction	396
	Java in the Database	396
	Installing Java Classes	397
	Creating Java Classes and JARs	397
	Using the installjava Utility	398
	Configuring Memory for Java in the Database	398
	Java Classes as Datatypes.	399
	An Example of Table Definition Using a Java Class	400
	Performance Considerations	400
	An Example of Using a Java Class within a Select	400
	Executing Java Methods	400
	Class Static Variables	401
	Recommendations and Considerations	401
	XML in the Database	402
	XML Stored in the Database	402
	Option 1: Store the XML Document into a Text Datatype	403
	Option 2: Store the XML Document into an Image Datatype Using xmlparse	404
	Option 3: Store the XML Document into an Image Datatype Using Compression	404
	Option 4: Store the XML Document Outside the Database.	405
	HTML Stored in the Database	406

- Recommendations and Considerations 406
 - Performance and Sizing 407
 - SQL Result Sets Converted to Return an XML Document. . . 410
 - Web Services 411
 - Web Services Producer 411
 - Web Services Consumer 413
 - Recommendations and Considerations 415
- Appendix A* **Sybase ASE 15 Certification Sample Questions and Answers 417**
- Appendix B* **Use Cases 447**
- Index 467
