<i>what's new in 2.0</i>	<i>xxxiii</i>
<i>about the cover illustration</i>	<i>xxxv</i>

Part 1 Hello Windows Forms 1

<i>1 Getting started with Windows Forms</i>	<i>3</i>
1.1 Programming in C#	4
Namespaces and classes	6 ♦ Constructors and methods 8
C# types	8 ♦ The Main method 11 ♦ The Application class 12 ♦ Program execution 13
1.2 Windows Forms controls	14
The using directive	15 ♦ The Control class 17
The Controls property	18
1.3 Loading files	19
Events	21 ♦ The OpenFileDialog class 23 ♦ Bitmap images 26
1.4 Resizing forms	26
The Anchor property	29 ♦ The Dock property 30
1.5 Recap	32
<i>2 Getting started with Visual Studio</i>	<i>33</i>
2.1 Programming with Visual Studio	34
Creating a project	35 ♦ Executing a program 37
Viewing the source code	38

- 2.2 Windows Forms controls 43
 - The AssemblyInfo file 43 ♦ Renaming a form 46
 - The Toolbox window 46
- 2.3 Loading files 52
 - Handling events in Visual Studio 52 ♦ Handling exceptions 56
- 2.4 Resizing forms 58
 - Assigning the Anchor property 58 ♦ Assigning the Dock property 60
- 2.5 Recap 61

Part 2 Basic Windows Forms 63

3 Menus 67

- 3.1 Controls and containers 68
 - Control classes 68 ♦ Container classes 70
- 3.2 The nature of menus 72
 - Menu terminology 72 ♦ Menus in .NET 73
- 3.3 Menu bars 75
 - Adding a menu strip 75 ♦ Adding a menu item 78
 - Adding drop-down menu items 81
- 3.4 Menu handling 87
 - Adding handlers via the designer window 87
 - Adding handlers via the properties window 88
- 3.5 Recap 90

4 Context menu and status strips 92

- 4.1 Context menu strips 93
 - Creating a context menu 94 ♦ Adding items to a context menu 95 ♦ Sharing a context menu 97
- 4.2 Drop-down events and event arguments 99
 - Handling a submenu item click 100 ♦ Altering a submenu before it appears 105
- 4.3 Status strips 108
 - Creating a status strip 108 ♦ Adding status strip labels 109
- 4.4 Recap 115

5	<i>Reusable libraries</i>	116
5.1	Class libraries	117
	Creating a class library	118 ♦ Using the command-line tools 121 ♦ Creating the Photograph class 122
	Defining class properties	125
5.2	The object class	128
	Comparing object and Object	128 ♦ Overriding object methods 128
5.3	Interfaces	131
	Interfaces and collections	132 ♦ Appreciating collection classes 133
5.4	Generics	138
	Generic classes	138 ♦ Appreciating generic collections 140
	Disposing of resources	144
5.5	Recap	146
6	<i>Files and common dialog boxes</i>	148
6.1	Standard menus	149
	Changing the menu bar	149 ♦ Managing an album 152
6.2	Common file dialog boxes	159
	Creating a new album	159 ♦ Opening an album 161
	Saving an album	163 ♦ Printing and exiting 166
6.3	Streams and writers	167
	Stream classes	167 ♦ Writing an album to disk 169
	Reading an album from disk	173
6.4	Album management	174
	Adding and removing images	174 ♦ Navigating an album 176
	Displaying album status	178
6.5	Recap	178
7	<i>Dialog boxes</i>	180
7.1	Message boxes	181
	Creating an OK message box	183 ♦ Creating a YesNo message box 184 ♦ Creating a YesNoCancel message box 185
7.2	The Form.Close method	188
	Comparing Close and Dispose	188
	Intercepting the Form.Close method	190

- 7.3 Forms and panels 192
 - The Form class 193 ♦ Creating a dialog box 195
- 7.4 Modeless dialog boxes 196
 - Creating a modeless dialog box 197 ♦ Adding panels and labels to a form 199 ♦ Updating the PixelDialog controls 203
 - Displaying a modeless dialog box 206 ♦ Updating the PixelDialog form 208 ♦ Tracking mouse movement 209
- 7.5 Recap 211
- 8 *Text boxes* 212
 - 8.1 Form inheritance 213
 - Creating a base form 214 ♦ Creating a derived form 217
 - 8.2 Standard text boxes 219
 - Adding text boxes 220 ♦ Adding a multiline text box 225
 - Hooking up a dialog box 229
 - 8.3 Masked text boxes 231
 - Handling key presses 231 ♦ Masking text 233
 - 8.4 Recap 239
- 9 *Buttons* 240
 - 9.1 Push buttons 241
 - The Button class 241 ♦ Expanding the PhotoAlbum class 243
 - Storing album data 245
 - 9.2 Radio buttons 246
 - The RadioButton class 247 ♦ Creating an album dialog box 248
 - 9.3 Check box buttons 250
 - The CheckBox class 250 ♦ Using check box buttons 251
 - Completing the AlbumEditDialog form 253 ♦ Hooking up a dialog box (again) 255
 - 9.4 Tooltips and error providers 256
 - The ToolTip class 256 ♦ Displaying tooltips 258
 - Building extender providers 261 ♦ The ErrorProvider class 263
 - 9.5 Recap 266
- 10 *Handling user input and encryption* 268
 - 10.1 Keyboard events 269
 - The three events 269 ♦ Handling the KeyPress event 269
 - Handling the KeyDown and KeyUp events 271
 - Preprocessing command keys 272

- 10.2 Mouse events 274
 - The MouseEventArgs class 274 ♦ Implementing FlybyTextProvider using mouse events 277 ♦ Using the FlybyTextProvider class 280
 - 10.3 Encryption 282
 - The Cryptography namespace 282 ♦ Encrypting data 284
 - Writing encrypted data 286 ♦ Reading encrypted data 287
 - Storing encrypted albums 288
 - 10.4 Link labels 291
 - The LinkLabel class 292 ♦ Saving encrypted albums 293
 - Opening encrypted albums 294
 - 10.5 Recap 297
- 11 *List boxes* 299
- 11.1 List controls 300
 - The ListControl classes 300 ♦ Creating a new solution 302
 - Refactoring application code 303
 - 11.2 Simple list boxes 308
 - The ListBox class 310 ♦ Displaying a data source 311
 - Selecting list items 315
 - 11.3 Multiselection list boxes 317
 - Enabling multiple selection 318 ♦ Reordering list items 321
 - Removing list items 324
 - 11.4 Recap 325
- 12 *Combo boxes* 327
- 12.1 Standard combo boxes 328
 - The ComboBox class 328 ♦ Creating a combo box 330
 - Selecting combo box items 332 ♦ Modifying the data source 333
 - 12.2 Editable combo boxes 335
 - Creating a combo box (again) 336 ♦ Updating a combo box dynamically 339
 - 12.3 Automatic completion 341
 - Understanding automatic completion 341
 - Using auto-completion in a combo box 344
 - 12.4 Item formatting 345
 - The formatting interfaces 345 ♦ Implementing an IFormattable interface 346 ♦ Using formatting in list controls 350
 - Implementing custom formatters 352
 - 12.5 Recap 355

- 13 *Tab controls and pages* 356
 - 13.1 Tab control fundamentals 357
 - The TabControl class 357 ♦ Creating tab controls 358
 - 13.2 Tab page fundamentals 362
 - The TabPage class 362 ♦ Creating tab pages 363
 - Enclosing existing controls in a tab page 366
 - 13.3 Owner-drawn tabs 369
 - The DrawItem event 370 ♦ Drawing page tabs 371
 - Using a custom tab control 375
 - 13.4 Owner-drawn list boxes 376
 - Custom list items 377 ♦ Assigning item size 378 ♦ Drawing list items 380
 - 13.5 Recap 381

- 14 *Dates, calendars, and progress bars* 383
 - 14.1 Date and time display 384
 - The DateTimePicker class 384 ♦ Creating a DateTimePicker control 387
 - 14.2 Date and time formats 389
 - Formatting date and time values 390 ♦ Customizing a DateTimePicker control 393
 - 14.3 Calendars 394
 - The MonthCalendar class 395 ♦ The UserControl class 396
 - Creating a calendar control 397 ♦ Initializing a calendar 399
 - Handling mouse clicks in a calendar control 401
 - 14.4 Progress bars 405
 - Creating an images user control 405 ♦ The ProgressBar class 408 ♦ Performing a background task 410
 - 14.5 Recap 413

- 15 *Bells and whistles* 415
 - 15.1 Images and cursors 416
 - Bitmaps 416 ♦ Icons 420 ♦ Cursors 425
 - 15.2 Embedded resources and sounds 426
 - Embedding a resource 427 ♦ Using the project resource file 428
 - Playing a sound 431
 - 15.3 Track bars 433
 - The TrackBar class 434 ♦ Using track bars 435

- 15.4 Timers 439
 - The Timer class 439 ♦ Using timers 439
- 15.5 Recap 442

16 *Tool strips* 443

- 16.1 Tool strip fundamentals 444
 - The ToolStrip classes 445 ♦ Creating a tool strip 447
- 16.2 Tool strip item fundamentals 448
 - The ToolStripItem classes 448 ♦ Adding standard tool strip items 449 ♦ Item alignment, overflow, and other features 452
- 16.3 Image lists 453
 - The ImageList class 454 ♦ Creating an image list 454
 - Adding custom tool strip buttons 457
- 16.4 Tool strip containers 458
 - The ToolStripContainer class 458 ♦ Embedding a tool strip in a container 460
- 16.5 Specialized button items 463
 - Toggle buttons 463 ♦ Drop-down buttons 467 ♦ Split buttons 469
- 16.6 Recap 473

Part 3 Advanced Windows Forms 475

17 *Custom controls* 477

- 17.1 Extending existing controls 478
 - Designing a scrollable picture box 479 ♦ Creating a scrollable picture box 481 ♦ Implementing a scrollable picture box 483
- 17.2 Control-based classes 485
 - Creating a Control-based class 485 ♦ Common features of custom controls 489
- 17.3 The ScrollablePictureBox class 491
 - Painting the control 491 ♦ Resizing the control 493
 - Handling property changes 495
- 17.4 User controls 497
- 17.5 Custom controls in Visual Studio 497
 - Customizing class behavior 498 ♦ Customizing class member behavior 500 ♦ Customizing design time behavior 503
- 17.6 Recap 506

- 18 *Explorer interfaces and tree views* 507
 - 18.1 Interface styles 508
 - Single document interfaces 508 ♦ Multiple document interfaces 509 ♦ Explorer interfaces 510
 - 18.2 Explorer interfaces in .NET 511
 - The SplitContainer class 511 ♦ The TreeView class 514
 - Creating an explorer interface 516
 - 18.3 Tree nodes 518
 - The TreeNode class 518 ♦ Creating tree nodes 519
 - 18.4 Custom tree views 523
 - Creating a custom tree view 524 ♦ Creating custom tree nodes 525 ♦ Using interfaces with custom nodes 526
 - Expanding and collapsing tree nodes 531 ♦ Selecting and editing tree nodes 533 ♦ Integrating a custom tree view control 537
 - 18.5 Recap 540
- 19 *List views* 541
 - 19.1 List view fundamentals 542
 - The ListView class 542 ♦ Creating a list view 545
 - Populating a list view 548
 - 19.2 List view columns 551
 - Defining column headers 551 ♦ Populating list view columns 554 ♦ Sorting list view columns 557
 - 19.3 List view features 562
 - Selecting items 563 ♦ Editing item labels 566
 - Activating items 569
 - 19.4 Virtual Items 571
 - 19.5 Recap 574
- 20 *Multiple document interfaces* 575
 - 20.1 MDI forms 576
 - Creating an MDI container 577 ♦ Creating an MDI child 578
 - Updating the entry point 579
 - 20.2 Merged menus 581
 - Assigning merge actions 583 ♦ Assigning merge indexes 584
 - Opening and closing child forms 587
 - 20.3 MDI children 589
 - Merging tool strips 590 ♦ Displaying pixel data 594
 - Opening an album twice 599 ♦ Updating the title bar 600

- 20.4 MDI child window management 602
 - Arranging MDI children 603 ♦ Displaying an MDI child list menu 605
- 20.5 Recap 607
- 21 *Data binding* 608
 - 21.1 Data grid views 609
 - The DataGridView class 612 ♦ Creating a data grid view 612
 - Populating a data grid view 614
 - 21.2 Columns and rows 618
 - Creating columns 619 ♦ Creating combo box columns 624
 - Understanding bands and rows 626
 - 21.3 Cells 630
 - The DataGridViewCell class 630 ♦ Using the cell class 631
 - Saving a modified album 634
 - 21.4 Recap 635
- 22 *Two-way binding and binding sources* 637
 - 22.1 Binding lists 638
 - The IListBindingList interface 638 ♦ Creating a binding list 640
 - 22.2 Editable objects 643
 - The IEditableObject interface 644 ♦ Creating an editable object 644
 - 22.3 Simple data binding 647
 - The BindingSource class 648 ♦ Altering the MyAlbumData application 650 ♦ Performing simple binding 652
 - Updating data bound controls 656 ♦ Binding navigators 660
 - 22.4 Recap 663
- 23 *Odds and ends .NET* 665
 - 23.1 Printing 666
 - Using the print classes 667 ♦ Drawing a print page 669
 - 23.2 Drag-and-drop 673
 - Initiating drag-and-drop 674 ♦ Receiving drag-and-drop 676
 - 23.3 Web browsing 679
 - Creating an about box 680 ♦ The WebBrowser class 682
 - Browse to a web site 683
 - 23.4 Application settings 686
 - Storing the Location setting 686 ♦ Defining a custom setting 690

23.5	Deployment	691
	Creating a setup project	692
	Publishing a ClickOnce application	696
23.6	Recap	699

<i>appendix A</i>	<i>C# primer</i>	701
<i>appendix B</i>	<i>.NET namespaces</i>	735
<i>appendix C</i>	<i>Visual index</i>	741
<i>appendix D</i>	<i>For more information</i>	758
	<i>bibliography</i>	760
	<i>index</i>	763
