Introduction	xix

Part I: Tools, Planning, and Content 1

Chapter 1: Setting up a Master Toolbox 3

Web Browsers	5
Choosing a Code Editor	8
File Management with FTP	11
Telnet and SSH	12
Validation Tools	14
PNH Toolbar	16
Sidebar Reference Panels	17
Bitmap Image Programs	17
Vector Image Programs	21
Web Animation Utilities	22
Screen Capture Utilities	24
Rename Utilities	25
Tag Strippers	26
HTML Tidy	26
Compression Utilities	27
Audio and Video Players	29
Plug-Ins	29
SVG and SMIL Support	30
Software for Security and Safety	30
Collaborative Communication Software	32
Summary	33

Chapter 2: Managing Your Web Project 35

The Challenge of Web Project Management	36
Toward Consistent Organizational Structure	36
Creating Industry-Wide Standards for Web Project Management	37
Fixing Disparities in Problem-solving Approaches	37
Selecting the Project Manager	38
Defining the Budget	39
Identifying Goals	39
Determining the Stakeholders	40
Determining Market Needs	41
Identifying Roles and Responsibilities	41
Creating a Project Workflow	43
Listing Creative Tasks	44
Clarifying Technical Tasks	44
Defining Administrative Tasks	44

Listing Marketing Tasks	45
Addressing Quality Assurance Concerns	45
Setting Milestones	46
Getting Signoff Throughout the Process	46
Encouraging Collaboration	47
Managing Scope Creep	48
Summary	49
Chapter 3: Architecting Your Information	51
What Is Information Architecture?	52
Sites Big and Small, New and Old	52
Organic Growth and the Web	52
Performing a Content Audit	53
Determining Hierarchies of Content	54
Defining Technical Infrastructure	56
Determining Naming Conventions	57
Site Mapping	59
Understanding Wireframing	60
Developing Prototypes	61
Creating User Pathways	62
Creating Archive Systems	63
Considering Frequency of Updates and Redesigns	64
Setting Site-Wide Standards	65
Developing a Site-Wide Style Guide	65
Summary	66
Chapter 4: Making Sites Usable and Persuasive	67
Create Consistent Branding	68
Determining Primary Navigation	69
Secondary Navigation	71
Grouping Navigation by Like Items	72
Iconography and Language Use	74
Managing External Links	77
Direct Access to Site Features	81
Placement of Critical Information	83
Consistent Placement of Elements	84
Drop-Down Menus	84
Pop-Up Windows	85
Consider Tabbed Navigation	87
Provide Orientation	88
Date and Time Formats	89
Cost-Controlled Usability Testing	90
Summary	91
Chapter 5: Creating and Managing Fantastic Content	93
Finding Your Voice	94
Clarifying Site Purpose	95
Text and the Computer Screen	96
Writing Effective Paragraphs	99
Varying Pace	100

Removing Extraneous Information	102
Using Tables to Organize Data	102
Using Lists to Simplify Ideas	104
Using Headers Meaningfully	105
Applying Style Standards	106
Avoiding Problem Grammar	107
Understand Copyright!	107
Extending Copyright with Creative Commons	108
Protecting Intellectual Property with Trademarks	109
The Role of Patents on the Web	110
What Is Digital Rights Management?	110
Exploring Content Management Systems	111
Summary	112

Part II: HTML, XHTML, CSS, and Accessibility 113

Chapter 6: Crafting Pages with HTML 115

Is HTML Easy?	116
HTML is a Markup Language	116
Face the Changes	116
Document Conformance	117
Author to the Specification	117
Validate the Document	118
Create a Markup Style and Stick to It	118
Understand Document Types and Language Versions	119
Use DOCTYPEs	122
HTML is Root	123
Use <head> and <body> Appropriately	124
Always Use <title>	125
Manage Character Sets	125
Author Documents Structurally	127
Use Lists to Enhance Structure and Readability	128
 and versus <i> and 	130
Know your Document Tree	131
Elements, Tags, and Attributes	133
Intrinsic Events	134
Special Characters	135
Limit Color Names to Standard Colors	136
Avoid the font Element	136
Avoid the center Element	138
Avoid All Deprecated, Obsolete, and Proprietary Elements and Attributes	138
Use Elements as They Were Intended	139
Restrict Use of Tables	140
Restrict Use of Frames	141
Validate, Validate, Validate!	141
Summary	142

Chapter 7: Moving Ahead with XHTML 143

About XHTML	144
History	144

Goals of XHTML	144
XHTML Versions and DTDs	145
So Is XHTML Better?	147
Choose a DTD	147
Avoid the XML Declaration	148
Use Correct XHTML DOCTYPEs	149
Add the Namespace to Root	150
Implementing Style in XHTML	151
Adding Scripts in XHTML	152
XHTML and Case Sensitivity	153
Quotation of Attribute Values in XHTML	154
Managing Nonempty Elements	155
Terminating Empty Elements	155
Managing Minimized Attributes	156
Entities and XHTML	156
alt Attribute Required	157
Understand Well-Formedness	158
Proper Nesting of Lists	159
DOCTYPE Switching	162
Enclose Inline Elements in Blocks	163
name Becomes id	164
The target Attribute is Unavailable in Anchor	165
Summary	165
Chapter 8: Style Tips for Type and Design	167
Learning CSS	168
When to Use Linked Style	168
When to Use Embedded Style	169
When to Use Inline Styles	170
Importing Style	170
Understand the Cascade	171
Work with Inheritance	171
Be Aware of Specificity	173
Creating Multiple Link Styles	174
Link Effects	177
CSS Borders and Border Styles	179
Gaining Space with Padding	181
Understanding Type Sizing Options in CSS	182
Type Effects	182
Styling Lists with CSS	186
Using Lists for Vertical Navigation	188
Using Lists for Horizontal Navigation	190
Spice Up Forms	191
Add Visual Effects to Data Tables	193
Using Background Graphics in CSS	195
Image Replacement Techniques	196
CSS-Based Text Mouseovers	198
Text and Image Mouseovers	201
Dynamic CSS Menus	202
Rounded Tabs	205
Sliding Doors	205
Cool Rules	207
Summary	207

Chapter 9: Laying Out Pages with CSS 209

CSS Layout Basics	210
Two-Column Layout, Positioned Left Navigation	211
Float-Based Layout	212
Nested Float	214
Three-Column Layout	218
Vertical Centering in CSS	220
Ordering DIVs for Backward Compatibility	226
@import for Graceful Degradation	227
CSS Hacking Strategies	228
The Box Model Hack	230
The High Pass Filter	231
The Mid Pass Filter	232
IE 5.0 Windows Band Pass Filter	232
IE 5.5 Windows Band Pass Filter	233
Opera Hacks	233
Understanding CSS Media Types	234
Alternate Style Sheet for Print	235
Alternate Style Sheet for Small-screen Media	236
Alternate Style Sheet for Projection	237
CSS Best Practices	237
Summary	241

Chapter 10: Adding Accessibility Features 243

What is Web Accessibility?	244
The Advent of Accessibility Challenges	244
Accessibility and Law	246
Accessibility and You	247
Describing Visual and Aural Content	247
Providing Alternate Content	247
They're NOT alt "Tags!"	249
Use the title Attribute in Links	249
Using the abbr Element for Abbreviations	251
Using the acronym Element for Acronyms	252
Understand the accesskey Attribute	254
Index Link and Form Controls Using tabindex	255
Group Form Selections with select and optgroup	256
Add fieldset and legend to Forms	258
Using the label Element with Forms	259
Summarize and Caption Data Tables	260
Consider Using Skip Links	263
Making Frames Accessible	265
Testing with Accessibility Validators	266
Testing with Lynx	267
Testing with Screen Reader Software	267
Summary	268

Part III: Designing Sites for Long-Term Success 269**Chapter 11: Sophisticated Visual Design 271**

Visual Design and Site Intent	272
-------------------------------------	-----

Defining and Maintaining Your Brand	272
GIFs and JPEGs: Still Your Secret Graphic Weapon	273
Refinding the Lost Promise of PNG	276
GIF Animation Do's and Don'ts	278
Image Maps: To Use or Not to Use	278
Make the Most Out of Text-Based Type	279
Combine Graphics and Markup for Effective Typography	280
What Is White Space and Why Do I Care?	280
The Importance of Proximity	282
There's No Such Thing as Web-Safe Color	284
Making the Most Out of Web Color	285
The Symbolic Meaning of Shapes	287
The Psychology of Color	287
Color and Culture	288
Color and Gender	290
Color Tips	290
Exploring Scalable Vector Graphics	291
Summary	292
Chapter 12: Spicing It Up with Dynamic Content.....	293
All about Scripting and Rich Media	294
JavaScript, ECMAScript, and DOM	294
Using Rich Media	296
Providing the Current Date	297
Doing Popups Properly	298
Randomize Images and Text	301
Open a New Window Without target	307
Check for Plug-Ins	309
Text Size Switching	310
Style Sheet Switching for Visual Design	315
Dynamic Menu Systems	317
Forms Validation with JavaScript	319
The Trouble with applet, object, and embed	320
Adding Flash and Complying with Standards	322
Adding Audio	323
Adding Video	324
About Digital Storytelling	326
Summary	327
Chapter 13: Keeping Sites Fresh and Engaging.....	329
Use Personalization	330
Offer Useful Information and Applications	332
Provide Random or Frequently Changed Features	334
Add a Weblog	335
Consider Weblog Commenting Systems	337
Offer Site Registration	338
Consider Cookies to Track Usage	340
The Power of Polls	341
Add Discussion Groups	343
Use Web-based Chat	343
Refresh Your Page Style Regularly	346

Style Sheet Switching for Customization	347
Add Search Technology	349
Aggregate Content	349
Summary	351
Chapter 14: Improving Site Ranking and Managing	353
About Web Site Marketing	354
Now Focus Is on Structure and Content	354
Avoid Unscrupulous Marketing Techniques	355
Targeting Keywords for meta Elements	356
Writing Effective meta Descriptions	357
Using Targeted Words in Headers	358
Using Keywords in Text	359
Keeping URLs Short and Relevant	360
Solicit Reciprocal Links	361
Consider Affiliate Programs	361
Use Opt-In E-mail Newsletters to Drive Traffic	363
Run Regular and Seasonal Promotions	364
Learn More About Web Ads	365
Add Sponsored Links	366
Search Engine Submission	367
Don't Forget Offline Promotions!	368
Summary	368
Chapter 15: Dealing with Growth and Redesigns	369
The Importance of Server Logs	370
Develop a Regular Assessment Cycle	372
Ensure Scalability	373
Manage Content Growth	374
When to Redesign	374
Map Redesign Projects and Timelines Carefully	375
Express Upcoming Changes to Audience Members	376
Re-Evaluate Long-Term Goals	377
Summary	378
Part IV: Appendixes	379
Appendix A: Demystifying Service Provision	381
Appendix B: Overview of Application and Database Technology	387
Appendix C: Helpful Reading, Web Sites, and Resources	393
Index	399
