<i>Appendix 2: Useful websites</i>	169
<i>Index</i>	175

About the author

Alan Calder, founder director of IT Governance Ltd, led one of the first organizations to achieve BS7799. His 30-year international management career, at CEO and director level in both the private and public sectors, has increasingly focused on the challenge of making information security as simple and as natural as household security. He is the author of *IT Governance* and *Corporate Governance* (both published by Kogan Page).
