C# Web Development with ASP.NET: Visual QuickStart Guide

By [Jose Mojica](#)

Publisher: Peachpit
Press
Pub Date: March 06,
2003
ISBN: 0-201-
88260-4
Pages: 456

[Copyright](#)

[Acknowledgments](#)

[Introduction](#)

[.NET Framework Gossip](#)

[What Is the .NET Framework?](#)

[So What Is C#?](#)

[ASP.NET](#)

[What Is this Book About?](#)

[Whom Is this Book For?](#)

[About the Author](#)

[What You Need in Order to Learn C#](#)

[Final Thoughts](#)

[Chapter 1. Getting Started](#)

[Getting C#](#)

[Installing Internet Information Services \(IIS\)](#)

[Creating a Web Project with Visual Studio .NET](#)

[Debugging Web Projects with Visual Studio .NET](#)

[Writing a Simple ASP .NET Page](#)

[Debugging ASP .NET Applicatons](#)

[Running the Compiler Manually](#)

[Compiling and Executing C# Programs without VS .NET](#)

[Debugging Applications Outside VS .NET](#)

[Chapter 2. C# Building Blocks](#)

[Working with C# Building Blocks](#)

[Writing C# Code](#)

[Declaring Variables](#)

[Defining Constants](#)

[Grouping Constants into Enumerated Types](#)

[Declaring Functions](#)

[Declaring Functions with Parameters](#)
[Returning Function Values](#)
[Defining a Class](#)
[Adding Classes to the Sample Application](#)
[Creating and Using Objects](#)
[Creating Objects in the Sample Application](#)
[Including Class Definitions from Outside Sources](#)
[Grouping Classes into Namespaces](#)
[Adding Fields to Classes](#)
[Initializing Fields in Place](#)
[Adding Properties to Classes](#)
[Adding Methods to Classes](#)
[Adding Members to the Classes in the Sample Code](#)
[Completing the Sample Application](#)
[Adding Comments](#)
[Understanding Parameter Direction for Reference Types](#)

[Chapter 3. Conditionals and Loops](#)

[Working with Loops and Conditionals](#)
[Comparing Numeric Types](#)
[Comparing Reference Types](#)
[Combining Test Clauses](#)
[Writing if-else Statements](#)
[Testing Multiple Conditions with switch](#)
[Conditional Operator](#)
[Adding Conditional Statements to the Sample Program](#)
[Using while Loops](#)
[Using do Loops](#)
[Using for Loops](#)
[Exiting and Continuing Loops](#)
[Adding Loops to the Sample Program](#)

[Chapter 4. Strings](#)

[Preparing Your Machine to Work with Strings](#)
[Working with Strings](#)
[Initializing Strings](#)
[Comparing Strings](#)
[Concatenating Strings](#)
[Finding the String Length](#)
[Comparing and Concatenating Strings in the Sample Application](#)
[Creating Strings from Characters](#)
[Using Escape Characters](#)
[Using Literal Strings](#)
[Accessing the String's Characters](#)
[Finding a Substring within a String](#)
[Extracting Part of the String](#)
[Splitting a String](#)
[Joining a String](#)
[Uppercasing and Lowercasing](#)

[Formatting Strings](#)
[Finishing the Sample Application](#)
[Representing Objects as Strings](#)
[Allocating Strings with StringBuilder](#)

[Chapter 5. Class Inheritance](#)

[Working with Class Inheritance](#)
[Inheriting a Class from Another](#)
[Exposing and Restricting Access to Members](#)
[Enhancing the Sample Application](#)
[Hiding Methods from the Base Class](#)
[Overriding Functions in a Derived Class](#)
[Adding a Generic Button to the Sample Application](#)
[Using the Generic Button in the WorkOrder Form](#)
[Adding Functions that Must Be Overridden](#)
[Requiring Inheritance](#)
[Blocking Inheritance](#)

[Chapter 6. Special Members](#)

[Adding Functions with the Same Name \(Method Overloading\)](#)
[Defining Functions with a Variable Number of Parameters](#)
[Adding Constructors](#)
[Invoking Base Constructors](#)
[Adding Finalizers](#)
[Building Code Libraries with Static Members](#)
[Redefining the Meaning of Operators \(Operator Overloading\)](#)
[Redefining Equality by Overriding ==](#)
[Redefining Equality by Overriding Equals](#)
[Working with Special Members](#)

[Chapter 7. Types](#)

[Working with Types](#)
[Obtaining a Class's Type](#)
[Testing for Type Compatibility](#)
[Converting From One Type to Another \(Casting\)](#)
[Extending the Sample Application](#)
[Defining Casting Rules \(Cast Operator Overloading\)](#)

[Chapter 8. Interfaces](#)

[Working with Interfaces](#)
[Defining Interfaces](#)
[Implementing Interface Members Implicitly](#)
[Implementing Interface Members Explicitly](#)
[Enhancing the Sample Application](#)
[Using Objects through Interfaces](#)
[Interface Discovery](#)
[Using Interfaces for Polymorphism](#)
[Deriving One Interface from Another](#)
[Refactoring](#)
[Re-Implementing Interfaces in a Derived Class](#)

[Finishing the Sample Application](#)

[Chapter 9. Arrays and Collections](#)

[Working with Arrays and Collections](#)

[Creating Arrays of Valuetypes](#)

[Creating Arrays of Reference Types](#)

[Navigating through the Array](#)

[Initializing Array Elements in Place](#)

[Creating Multi-Dimensional Arrays](#)

[Enhancing the Sample Application](#)

[Finding Array Elements Using Linear Searches](#)

[Sorting Arrays](#)

[Finding Array Elements Using Binary Searches](#)

[Making Classes Behave Like Arrays \(Adding Indexers\)](#)

[Adding Indexers to the Sample Application](#)

[Copying an Array](#)

[Creating Dynamic Lists](#)

[Creating Queues](#)

[Creating Stacks](#)

[Creating HashTables](#)

[Navigating through HashTables](#)

[Finishing the Sample Application](#)

[Testing the CodeGridWebControl](#)

[Chapter 10. Delegates and Events](#)

[Working with Delegates and Events](#)

[Declaring a Delegate](#)

[Creating and Invoking Delegates](#)

[Combining Delegates](#)

[Removing Delegates](#)

[Declaring and Firing Events](#)

[Adding Events that are Web Friendly](#)

[Subscribing to Events](#)

[Firing Delegates Asynchronously](#)

[Waiting for Asynchronous Delegates to Complete](#)

[Retrieving Results from Asynchronous Delegates](#)

[Finishing the Sample Application](#)

[Chapter 11. Error Handling](#)

[Working with Exceptions](#)

[Catching Exceptions](#)

[Catching Specific Exceptions](#)

[Obtaining Exception Information](#)

[Working with Exception Chains](#)

[Declaring Your Own Exceptions](#)

[Setting the Error Message](#)

[Generating an Exception](#)

[Catching and Re-throwing Exceptions](#)

[Building an Exception Chain](#)

[Adding Code that Executes Before Exiting the Function](#)

[Using using](#)

[Adding Form Security to the Sample Application](#)

[Handling Unhandled Errors in Web Applications](#)

[Chapter 12. Reflection and Attributes](#)

[Working with Reflection and Attributes](#)

[Identifying an Assembly](#)

[Working with Display Names](#)

[Working with Path Strings](#)

[Loading a Program Dynamically with a Display String](#)

[Loading a Program Dynamically with a Path String](#)

[Instantiating a Class in the Assembly](#)

[Enumerating Through the Classes in an Assembly](#)

[Listing the Members of a Class](#)

[Setting or Getting a Field Dynamically](#)

[Invoking a Method Dynamically](#)

[Completing Task One in the Sample Application](#)

[Applying Attributes to Code](#)

[Defining Attributes](#)

[Searching Code for Attributes](#)

[Completing Task Two in the Sample Application](#)

[Chapter 13. C# Web Projects](#)

[Creating a DLL Project with Visual Studio .NET](#)

[Referencing and Executing DLL Code](#)

[Making DLLs Globally Available](#)

[Creating Web Services](#)

[Consuming Web Services](#)
