<i>Preface to Second Edition</i>	<i>xiii</i>
<i>Preface to First Edition</i>	<i>xv</i>
Introduction	1
Aims	1
Highlights	2
Categories of Usage (Part I)	3
Structure of the Chapters	5
The Specifications List	5
Structure of the “Next” Programs	6
Structure of the “Random” Programs	7
Arrays and Specifications	8
PART 1 COMBINATORIAL FAMILIES	
I Next Subset of an n-Set (NEXSUB/LEXSUB)	13
(A) The Direct Approach	14
(B) The Gray Code	14
Algorithm NEXSUB	17
(C) Lexicographic Sequencing	17
Algorithm LEXSUB	18
Subroutine Specifications (NEXSUB)	18
Subroutine Specifications (LEXSUB)	19
Sample Output (NEXSUB)	20
Sample Output (LEXSUB)	21

2	Random Subset of an n-Set (RANSUB)	23
	Algorithm RANSUB	23
	Subroutine Specifications	23
	Sample Output	24
3	Next k-Subset of an n-Set (NEXKSB/NXKSRD)	26
	Algorithm NEXKSB (Lexicographic)	27
	Flow Chart NXKSRD	31
	Subroutine Specifications (NEXKSB)	32
	Subroutine Specifications (NXKSRD)	33
	Sample Output (NEXKSB)	35
	Sample Output (NXKSRD)	36
4	Random k-Subset of an n-Set (RANKSB)	39
	Algorithm RANKSB	41
	Algorithm RKS2	43
	Subroutine Specifications	43
	Sample Intermediate Result	45
	Sample Output	45
5	Next Composition of n into k Parts (NEXCOM)	46
	Algorithm NEXCOM	49
	Subroutine Specifications	49
	Sample Output	50
6	Random Composition of n into k Parts (RANCOM)	52
	Algorithm RANCOM	52
	Subroutine Specifications	52
7	Next Permutation of n Letters (NEXPER)	54
	Algorithm NEXPER	58
	Subroutine Specifications	59
	Sample Output	61
8	Random Permutation of n Letters (RANPER)	62
	Algorithm RANPER	62
	Subroutine Specifications	63
	Sample Output	63
9	Next Partition of Integer n (NEXPAR)	85
	Algorithm NEXPAR	68
	Subroutine Specifications	69
	Sample Output	70

10	Random Partition of an Integer n (RANPAR)	72
	Algorithm RANPAR	74
	Subroutine Specifications	75
	Sample Output	77
	Postscript: Deus ex Machina	78
	Algorithm NEXT PLANE PARTITION	84
11	Next Partition of an n-Set (NEXEQU)	88
	Algorithm NEXEQU	90
	Subroutine Specifications	90
	Sample Output	91
12	Random Partition of an n-Set (RANEQU)	93
	Algorithm RANEQU	95
	Flow Chart RANEQU	96
	Subroutine Specifications	97
	Sample Output	98
13	Sequencing, Ranking, and Selection Algorithms in General Combinatorial Families (SELECT)	99
	(A) Introduction	99
	(B) General Setting	100
	Algorithm NEXT	102
	(C) Examples	103
	(D) The Formal Algorithms	106
	Algorithm SELECT	107
	Subroutine Specifications	108
	(E) Decoding	113
	Sample Output	115
14	Young Tableaux (NEXYTB/RANYTB)	117
	(A) Introduction	117
	(B) Lexicographic Sequencing	120
	Algorithm NEXYTB	122
	(C) Random Selection	123
	Algorithm RANYTB	127
	Subroutine Specifications (NEXYTB)	128
	Subroutine Specifications (RANYTB)	130
	Sample Output	131
PART 2 COMBINATORIAL STRUCTURES		
15	Sorting (HPSORT/EXHEAP)	135
	Algorithm $\mathcal{F}(l, n)$	138
	Algorithm TOHEAP	138
	Algorithm SORTHEAP	139

	Subroutine Specifications (HPSORT)	140
	Subroutine Specifications (EXHEAP)	141
	Sample Output	142
16	The Cycle Structure of a Permutation (CYCLES)	144
	Algorithm TAG	145
	Algorithm INVERT	146
	Subroutine Specifications	146
	Sample Output	148
17	Renumbering Rows and Columns of an Array (RENUMB)	150
	Algorithm RENUMB	155
	Subroutine Specifications	155
	Sample Output	157
18	Spanning Forest of a Graph (SPANFO)	158
	(A) Introduction	158
	(B) Depth-First-Search	160
	Algorithm DEPTHFIRST	161
	(C) A Breadth-First Algorithm	161
	Algorithm LINK (x, ϵ, n, E)	162
	Algorithm VISIT ($x, \epsilon, n, E, q, l_1, m_1, \alpha$)	164
	Algorithm SCAN ($x, \epsilon, n, E, p, l_0, m_0, m, r$)	165
	Algorithm COMPONENT ($x, \epsilon, n, E, p, k, L$)	165
	Algorithm SPANFO (x, ϵ, n, E, k)	166
	Subroutine Specifications	167
	Sample Output	169
19	Newton Forms of a Polynomial (POLY)	171
	Algorithm VALUE	171
	Algorithm NEWTON	172
	Algorithm TAYLOR	173
	Algorithm STIRLING	174
	Algorithm REVERSE STIRLING	174
	Algorithm NWT (m, x, ϵ, γ)	175
	Subroutine Specifications	175
	Sample Output	177
20	Chromatic Polynomial of a Graph (CHROMP)	178
	Algorithm CHROMP	182
	Subroutine Specifications	183
	Sample Output	185
21	Composition of Power Series (POWSER)	187
	Algorithm POWSER (Options 1, 2, and 3)	190
	Algorithm POWSER (Option 4)	191
	Subroutine Specifications	191
	First Sample Output, Option 1	193

Second Sample Output, Option 1	194
Sample Output, Option 3	194
Sample Output, Option 4	195
22 Network Flows (NETFLO)	196
Algorithm SWAP (i, j Option)	203
Algorithm INIT	203
Algorithm SORT	203
Algorithm XREF	204
Algorithm KZNET	205
Algorithm PUSHOUT (p, P)	206
Algorithm OLDFLOW (p)	207
Algorithm PUSHBACK (p)	207
Flow Chart PREFLOW	208
Algorithm PREFLOW	208
Algorithm NETFLO (n, E, ϵ, γ , source, sink, a, b, c, d, x)	209
Subroutine Specifications	209
Sample Output	215
23 The Permanent Function (PERMAN)	217
Computation of the Permanent Function	220
Algorithm PERMAN	223
Subroutine Specifications	224
Sample Output	225
24 Invert a Triangular Array (INVERT)	226
Algorithm INVERT	226
Subroutine Specifications	227
25 Triangular Numbering in Partially Ordered Sets (TRIANG)	228
Algorithm TRIANG	230
Subroutine Specifications	230
Sample Output	231
26 The Möbius Function (MOBIUS)	233
Subroutine Specifications	237
Sample Output	238
27 The Backtrack Method (BACKTR)	240
(A) General (BACKTR)	240
Flow Chart BACKTR	244
Subroutine Specifications	245
(B) Coloring the Vertices of a Graph (COLVRT)	246
Subroutine Specifications	247
Sample Output	248
(C) Euler Circuits (EULCRC)	249
Algorithm EULCRC	250

Subroutine Specifications	250
Sample Output	252
(D) Hamilton Circuits (HAMCRC)	256
Subroutine Specifications	257
Sample Output 1	258
Sample Output 2	260
(E) Spanning Trees (SPNTRE)	262
Subroutine Specifications	263
Sample Output	264
28 Labeled Trees (LBLTRE)	267
Algorithm LBLTRE	271
Subroutine Specifications	272
Sample Output	273
29 Random Unlabeled Rooted Trees (RANRUT)	274
Algorithm RANRUT	279
Subroutine Specifications	279
Sample Output	281
30 Tree of Minimal Length (MINSPT)	283
Algorithm MINSPT	284
Subroutine Specifications	285
Sample Output	286
Exercises	288
Bibliographic Notes	294
References	296
<i>Index</i>	299
