

# CONTENTS

## Preface

### **Chapter 1**      *Introducing XP* .....1

Programming, team practices, and processes.

## Section 1: Programming

### **Chapter 2**      *How do you program in XP?* .....11

XP uses incremental, test-first programming.

### **Chapter 3**      *What is refactoring?* .....29

“Refactoring: Improving the design of existing code.”

—Martin Fowler

## Section 2: Team Practices

### **Chapter 4**      *What are XP’s team practices?* .....51

We’ll explore these practices and their alternatives.

### **Chapter 5**      *What’s it like to program in pairs?* ..65

Pair programming is exhausting but productive.

**Chapter 6**      *Where's the architecture?* .....77

Architecture shows up in spikes, the metaphor, the first iteration, and elsewhere.

**Chapter 7**      *What is the system metaphor?* .....87

“The system metaphor is a story that everyone—customers, programmers, and managers—can tell about how the system works.”  
—Kent Beck

## Section 3: Process

**Chapter 8**      *How do you plan a release? What are stories like?* .....101

Write stories, estimate stories, and prioritize stories.

**Chapter 9**      *How do you plan an iteration?* .....115

Iteration planning can be thought of as a board game.

**Chapter 10**      *Customer, Programmer, Manager: What's a typical day?* .....125

Customer: questions, tests, and steering; Programmer: testing, coding, and refactoring; Manager: project manager, tracker, and coach.

**Chapter 11**      *Conclusion* .....143

**Chapter 12**      *Annotated Bibliography*.....145
