Introduction	xix

Part I: Customizing Your System 1

Chapter 1: Customizing the Look of the Startup 3

Customizing the Windows XP Boot Screen	3
Changing the boot screen	3
Customizing the Logon Screen	14
Working with the Welcome screen	15
Working with the classic logon screen	28
Global logon/Welcome settings	34
Summary	38

Chapter 2: Customizing User Navigation 39

Customizing the Start Panel	39
Using Group Policy Editor to customize the Start panel	40
Adding and removing navigation icons	44
Switching to small icons for frequently run apps	45
Increasing number of recently run programs displayed on the Start panel	48
Hiding programs from appearing in the Start panel	50
Pinning your programs	51
Adding Web site links to your Start panel	52
Customizing the Classic Start Menu	54
Turning the classic Start Menu back on	54
Customizing the classic Start Menu	54
Customizing the Start Menu/Panel Program Listings	55
Changing program listing display options for users of the Start panel	58
Changing program listing display options for users of the classic Start Menu	59
Removing pop-up Help for users of both the Start panel and Menu	61
Customizing the Taskbar	62
Using and adjusting program grouping	62
Quick Launching your programs	63
Hacking the Start button to replace the Start text	64

Modifying the taskbar location	68
Using the Taskbar Magnifier PowerToy	69
Removing the notification area	71
Removing the clock from the taskbar	71
Summary	71

Chapter 3: Hacking the Desktop 73

Customizing Desktop Icons	73
Removing all icons from the desktop	74
Customizing the icon drop shadow effect	74
Displaying the traditional Windows icons	75
Enabling large icons on the desktop	77
Removing the text below the icons	78
Renaming the Recycle Bin	79
Removing the shortcut arrow from icons on the desktop	80
Changing the icons on the desktop	81
Customizing the Behavior of the Desktop	83
Using the Virtual Desktop Manager PowerToy	84
Fun with Active Desktop	86
Using the wallpaper PowerToy	89
Summary	90

Chapter 4: Customizing the Appearance of the Windows Interface . . . 91

Working with Themes	91
Changing the current theme	92
Making your own themes	92
Modifying the Visual Styles	100
Installing new visual styles	102
Tweaking the visual styles	108
Making your own visual styles	108
Visual Style Alternatives	112
Using WindowBlinds to change the way Windows XP looks	113
Installing additional Windows XP skins for WindowBlinds	114
Summary	115

Chapter 5: Hacking Windows Explorer 117

Hacking File Associations	117
Changing the default launch app	118
Changing the icon of any file type	119
Hacking the Context Menu	120
Removing items from the context menu	121
Adding your own items to the context menu	122
Modifying the Send To menu	125

Customizing Your Folders	126
Changing a folder icon and picture	126
Changing the template of a folder	127
Customizing the view folder	129
Applying your folder settings to all folders	132
Working with Hidden Files	132
Unhiding hidden files	132
Revealing the super hidden files	134
Disabling the Common Tasks Pane	134
Summary	135

Chapter 6: Exploring Other Windows Enhancements 137

Modding Internet Explorer	137
Changing the logo animation	137
Changing the toolbar background	140
Making your own quick search address command	140
Other Visual Enhancements	142
Replacing the task switcher	143
Adding Special Effects to your Windows	144
Fine-Tuning ClearType	150
Branding Windows XP	152
Summary	155

Part II: Increasing Your System's Performance

157

Chapter 7: Analyzing Your System 159

Monitoring Your System Hardware	159
Using performance	159
Using Bootvis to analyze your system start	166
Using Task Manager	170
Benchmarking Your System	173
How to benchmark your system	174
Summary	181

Chapter 8: Speeding Up the System Boot 183

Working with BIOS	183
Changing the boot order of your drives	184
Using the quick boot feature of the BIOS	186
Modifying the Operating System Boot	187
Lowering OS timeout values	187
Disabling the system boot screen	189
Disabling unneeded hardware devices	191
Removing extra fonts for speed	193

Disabling unneeded services	196
Optimizing the location of the boot files	203
Summary	207
Chapter 9: Making Your Computer Load Faster	209
Speeding Up the Logon	210
Enabling automatic logon	210
Removing user passwords	211
Adjust the startup programs	216
Customizing startup programs for different users	223
Other Time-Saving Tips	225
Assigning alternative IP addresses	225
Turning off the logon music	228
Summary	229
Chapter 10: Making Your Computer More Responsive	231
Speeding up file browsing and access	231
Disabling the file access timestamp	232
Disabling legacy filename creation	234
Speeding Up the User Interface	236
Reducing the menu delay	237
Working with the performance options	238
Disable Indexing Service	244
Summary	246
Chapter 11: Speeding Up Your Computer	247
Working with the Windows Prefetcher	247
Hacking the registry to optimize the Prefetcher	248
Accelerate specific applications with prefetch	249
Using the Intel Application Accelerator	251
How well does the Intel Application Accelerator work?	253
What are the system requirements?	253
How to install Intel Application Accelerator	255
Fine-Tuning the Windows Paging File	255
Disabling the paging file	256
Adjusting the size of the paging file	258
Changing the location of the paging file	260
Defragmenting Your Drive	263
Defragmenting the Windows paging file	263
Defragmenting the NTFS master file table	264
Adjusting Your Application Priorities	264
Using Task Manager to adjust priorities	265
Starting applications with a user set priority	265
Using WinTasks to profile your priorities	267
Speeding Up Your Network	268
Increasing network browsing speed	269

Disabling unneeded protocols	270
Tweaking your Internet connection for speed	271
Summary	275

Part III: Securing Your System 277

Chapter 12: Protecting Your Computer from Intruders 279

How Vulnerable Is Your System?	280
Testing your Internet security	280
Updating your computer	281
Firewalls	282
Using the Windows firewall	283
Using ZoneAlarm personal	285
Using Sygate Personal Firewall	289
Disabling Unneeded Services	290
Disabling Remote Desktop connection	290
Disabling Messenger Service	292
Disabling Universal Plug and Play	292
Disabling Remote Registry Access	295
Disable DCOM support	295
Wireless Networks	296
Using WEP for secure communication	297
Using WPA for a more secure wireless connection	298
Controlling access to your computer	298
Managing user accounts	299
Summary	301

Chapter 13: Fighting Spam, Spyware, and Viruses 303

Eliminating Spam	303
Stopping spam in the first place	304
Using filtering software	305
Blocking external links in HTML mail	305
Defending Spyware and Adware	307
Detecting and removing spyware	307
Locking down Internet Explorer	311
Immunizing your computer	312
Defending against Viruses	312
Use an antivirus program	313
Summary	314

Chapter 14: Protecting Your Privacy 315

Internet Explorer	315
Removing address bar suggestions	315
Clearing visited Web sites history	316
Clearing temporary Internet files and cookies	318

- Adjusting your cookie security policy 319
- Saying no to encrypted Web pages 321
- Disabling AutoComplete 321
- Clearing Temporary Internet Files automatically 324
- Windows Interface 325
 - Clearing Frequently Run Programs list 325
 - Clearing the recently opened document list 326
 - Removing temporary files from your hard drive 327
 - Removing saved passwords 329
 - Setting file and folder permissions 329
 - Encrypting Files 331
- Summary 334
- Appendix A: What's on the CD-ROM 335
- Index 343
- End-User License Agreement 355
